Foreword	7
Part A: Microeconomics	9
Chapter 1: What Economics Is	9
1.1 Allocation of resources.....	9
1.2 Production, trade, and consumption.....	10
1.3 Self-interest.....	13
1.4 Opportunity cost.....	15
Chapter 2: Ownership	17
2.1 Property rights.....	17
2.2 Externalities.....	19
2.3 Trade, Market, and Competition.....	20
2.4 The miracle of exchange.....	21
2.5 Pareto efficiency.....	23
Chapter 3: Comparative Advantage	24
3.1 Specialisation and the division of labour.....	24
3.2 Absolute advantage.....	25
3.3 Comparative advantage.....	26
Chapter 4: Utility	29
4.1 Utility function.....	29
4.2 Marginal utility.....	30
4.3 Rationality.....	34
4.4 Cardinal vs ordinal utility.....	35
Chapter 5: Consumer Choice	36
5.1 Three-dimensional utility function.....	36
5.2 Budget constraint.....	38
5.3 Consumer optimum.....	39
5.4 Substitutes and complements.....	42
Chapter 6: Demand and Supply	48
6.1 The derivation of demand.....	48
6.2 Substitution effect and income effect.....	52
6.3 The elasticity of demand.....	53
6.4 Supply.....	56
Chapter 7: Market Equilibrium	58
7.1 Equilibrium.....	58
7.2 Factors changing the demand.....	61
7.3 Consumer surplus and producer surplus.....	62
Chapter 8: Loans Market and Labour Market	67
8.1 Principal and interest.....	67
8.2 The demand for loans and the supply of loans.....	70
8.3 Nominal and real interest rate.....	71
8.4 Labour market.....	72

Chapter 9: Profit Maximisation	76
9.1 Total revenue and marginal revenue.....	76
9.2 Total cost and marginal cost.....	77
9.3 Profit maximisation	78
Chapter 10: Market Models	82
10.1 Competition and market models	82
10.2 Perfect competition	82
10.3 Monopolist competition	83
10.4 Oligopoly.....	83
10.5 Monopoly	83
10.6 Revenues in market models.....	84
Chapter 11: Production Function	89
11.1 Accumulation of capital	89
11.2 Production function.....	89
11.3 Isoquants and isocost.....	91
11.4 Marginal rate of technical substitution.....	92
Chapter 12: General Equilibrium	95
12.1 Edgeworth box diagram	95
12.2 Contract curve	97
12.3 Idle resources and inefficiency.....	98
Part B: Macroeconomics	99
Chapter 1: Price Level	99
1.1 Price level.....	99
1.2 Inflation	102
1.3 The purchasing power of money	106
Chapter 2: Output	108
2.1 Output.....	108
2.2 Production-possibility frontier	110
2.3 Business cycle	113
2.4 Unemployment.....	116
Chapter 3: Money	118
3.1 The functions of money.....	118
3.2 The evolution of money.....	119
3.3 Central banking	122
3.4 The multiplication of deposits.....	124
Chapter 4: Money Stock	127
4.1 Monetary aggregates	127
4.2 Money stock	127
4.3 Money multiplier.....	129
Chapter 5: Quantity Theory of Money	131
5.1 The velocity of circulation of money	131
5.2 The equation of exchange.....	132
5.3 The relative version of the equation of exchange.....	133

Chapter 6: Aggregate Demand and Aggregate Supply	136
6.1 Aggregate demand.....	136
6.2 Aggregate supply.....	137
Chapter 7: Aggregate Supply in the Short Run	142
7.1 The substitution of labour for leisure.....	142
7.2 Demand shocks.....	144
Chapter 8: Say's Law of Markets and Keynesian Economics	148
8.1 The law of markets.....	148
8.2 Demand for cash balances.....	148
8.3 Keynes's consumption function.....	152
Chapter 9: Foreign Exchange Market	155
9.1 Appreciation and depreciation of a currency.....	155
9.2 Balance of payments.....	157
Chapter 10: Monetary Policy	160
10.1 Monetary policy targets.....	160
10.2 Expansionary and restrictive monetary policy.....	161
10.3 Distortions in monetary policy.....	164
Chapter 11: Fiscal Policy and Public Debt	166
11.1 Debt and deficit.....	166
11.2 Stabilisation policy.....	167
11.3 Crowding-out effect.....	168
Chapter 12: Monetary Integration and Disintegration	170
12.1 Recent currency integration and disintegration in Europe.....	170
12.2 Currency areas and currency unions.....	171
12.3 Arguments for and against currency unions.....	172
Index.....	175
About the autor.....	177
