1.0 The Pronunciation Model	x	20 Summary of Conventions	
1.5 The Sound Oppositions	xii	21 Appressions	
2.0 The Notation	xii	22 English Phonetic Symbols and Signs	
2.2 Vowels and Diphthongs	xiii	Editor's Note: certain changes in the phonetic transcription as well as amendments made with the aim of reflecting more faithfully the current state of affairs, on which the Dictionary had traditionally based its first appearance of the Dictionary.	
2.3 Consonants	xiii	Exploratory Notes have been rewritten. The Glossary of Phonological Terms undertaken a revision more thoroughgoing than that of any previous edition, and the Introduction and most of the technical aspects of phonetic and phonological analysis have been omitted on the grounds that there are textbooks which will supply their needs.	
3.0 Characteristics of the Model	xiv	3.1 Vowels and Diphthongs	xiv
3.5 Consonants	xviii	3.17 Stress Accent	xxi
3.17 Stress Accent	xxi	3.23 Weak Forms	xxiii
3.24 Syllable Division	xxiii	3.24 Syllable Division	xxiii
EXPLANATORY NOTES		In addition, the definition of the speech model described has been modified. Although the traditional term 'received pronunciation' has been retained, I have thought it proper to widen its strict social terms used by Daniel Jones in 1917.
