Table of Contents

Foreword v

Part A: Introduction

1. History of C 1

2. Program Structure in C 2

3. The C Compiler and An Operating Environment 6

Part B: Applications

1. Introduction 9

2. Stacks 9

3. Queues 13

4. Lists 18

5. Trees 32

6. Sorting 35

7. Searching 43

8. Processing of Arrays of Structures 44

9. Processing of Binary Files 46

10. Dump of a Text File 48

11. Application of a Finite Automaton 49

12. Classification of Attributed Patterns 52

13. A Simple Version of ID3 Machine Learning Algorithm 57

Part C: The User's guide

1. The C Preprocessor 68
   1.1. Preprocessor Directives 68
   1.2. Symbolic Constants and Macros 69
   1.3. Inclusion of Files 72
   1.4. Conditional Compilation 73
   1.5. Line Identification Control 75
   1.6. Operators # and ## 77
   1.7. Error Reporting Directive 77

2. Data, Variables, Declarations 78
   2.1. Data 78
   2.2. Declaration of Variables 79
   2.3. Identifiers 80
   2.4. Storage Classes 81
   2.5. Arithmetic Types 87
   2.6. Enumerated Types 91
   2.7. Types Defined by `typedef` 92

3. Operators and Expressions 93
   3.1. Lexical Elements 93
   3.2. Operators 95
   3.3. Expressions 97
   3.4. Arithmetic Operators 99
   3.5. Relational Operators 100
   3.6. Shift Operators 101
   3.7. Bitwise Operators 102
   3.8. Logical Operators 102
   3.9. Conditional Operator 103
   3.10. Assignment Operators 103
   3.11. Operator `sizeof` 105
   3.12. Cast 105
   3.13. Comma Operator 106
   3.14. Constant Expressions 106

4. Control Structures (Statements) 107
   4.1. Definitions 107
   4.2. Expression Statements 107
   4.3. Compound Statements (Blocks) 108
   4.4. Conditional Statements 109
   4.5. Loop Statements 112
   4.6. Null Statement 115
   4.7. Jump Statements 115
   4.8. Functions 117

5. Elementary Input and Output 119
5.1. Levels of Input and Output 119
5.2. Character I/O Functions for Standard Streams 120
5.3. Formatted I/O Functions for Standard Streams 121

6. Pointers, Arrays, and Strings 128
6.1. Pointers 128
6.2. Call by Reference 133
6.3. One-dimensional Arrays 133
6.4. Strings 138
6.5. Multi-dimensional Arrays 147
6.6. Arrays of Strings 150
6.7. Function as an Argument 152
6.8. Memory Allocation 154
6.9. Arguments to `main()` 156
6.10. Functions with Variable Number of Arguments 158

7. Structures and Unions 159
7.1. Declaration of a Structure 159
7.2. Arrays of Structures 161
7.3. Structures with Arrays 164
7.4. Nested Structures 168
7.5. Structures and Functions 169
7.6. Self-referential Structures 173
7.7. Bit Fields 175
7.8. Unions 177

8. Files 179
8.1. File Pointers 179
8.2. File Processing 180
8.3. Error handling 180
8.4. File positioning 180
8.5. Opening/closing a file 181
8.6. File input and output 182
8.7. Operations on Files 187
8.8. Terminal I/O 188
8.9. Low-Level Input and Output 189
8.10. Environment Communication 191
