

<b>1. Preliminaries</b> .....	1
1.1 Basics .....	1
1.1.1 Convention .....	1
1.1.2 Notation .....	1
1.1.3 Spaces of Functions and Their Duals .....	2
1.1.4 Maximal Functions .....	3
1.1.5 Integral Inequalities .....	4
1.1.6 Distributions .....	4
1.1.7 The Fourier Transform .....	5
1.1.8 The Riesz Transform and Singular Integrals .....	5
1.2 Sobolev Spaces and Bessel Potentials .....	6
1.2.1 Sobolev Spaces .....	6
1.2.2 Riesz Potentials .....	8
1.2.3 Bessel Potentials .....	9
1.2.4 Bessel Kernels .....	10
1.2.5 Some Classical Formulas for Bessel Functions .....	11
1.2.6 Bessel Potential Spaces .....	13
1.2.7 The Sobolev Imbedding Theorem .....	14
1.3 Banach Spaces .....	14
1.4 Two Covering Lemmas .....	16
<b>2. <math>L^p</math>-Capacities and Nonlinear Potentials</b> .....	17
2.1 Introduction .....	17
2.2 A First Version of $(\alpha, p)$ -Capacity .....	19
2.3 A General Theory for $L^p$ -Capacities .....	24
2.4 The Minimax Theorem .....	30
2.5 The Dual Definition of Capacity .....	34
2.6 Radially Decreasing Convolution Kernels .....	38
2.7 An Alternative Definition of Capacity and Removability of Singularities .....	45
2.8 Further Results .....	48
2.9 Notes .....	48

<b>3.</b>	<b>Estimates for Bessel and Riesz Potentials</b> .....	53
3.1	Pointwise and Integral Estimates .....	53
3.2	A Sharp Exponential Estimate .....	58
3.3	Operations on Potentials .....	62
3.4	One-Sided Approximation .....	66
3.5	Operations on Potentials with Fractional Index .....	68
3.6	Potentials and Maximal Functions .....	72
3.7	Further Results .....	78
3.8	Notes .....	81
<b>4.</b>	<b>Besov Spaces and Lizorkin–Triebel Spaces</b> .....	85
4.1	Besov Spaces .....	85
4.2	Lizorkin–Triebel Spaces .....	91
4.3	Lizorkin–Triebel Spaces, Continued .....	97
4.4	More Nonlinear Potentials .....	104
4.5	An Inequality of Wolff .....	108
4.6	An Atomic Decomposition .....	111
4.7	Atomic Nonlinear Potentials .....	116
4.8	A Characterization of $L^{\alpha,p}$ .....	122
4.9	Notes .....	125
<b>5.</b>	<b>Metric Properties of Capacities</b> .....	129
5.1	Comparison Theorems .....	129
5.2	Lipschitz Mappings and Capacities .....	140
5.3	The Capacity of Cantor Sets .....	142
5.4	Sharpness of Comparison Theorems .....	146
5.5	Relations Between Different Capacities .....	148
5.6	Further Results .....	150
5.7	Notes .....	152
<b>6.</b>	<b>Continuity Properties</b> .....	155
6.1	Quasicontinuity .....	156
6.2	Lebesgue Points .....	158
6.3	Thin Sets .....	164
6.4	Fine Continuity .....	176
6.5	Further Results .....	180
6.6	Notes .....	185
<b>7.</b>	<b>Trace and Imbedding Theorems</b> .....	187
7.1	A Capacitary Strong Type Inequality .....	187
7.2	Imbedding of Potentials .....	191
7.3	Compactness of the Imbedding .....	195
7.4	A Space of Quasicontinuous Functions .....	199
7.5	A Capacitary Strong Type Inequality. Another Approach .....	203

7.6	Further Results	208
7.7	Notes	213
<b>8.</b>	<b>Poincaré Type Inequalities</b>	<b>215</b>
8.1	Some Basic Inequalities	215
8.2	Inequalities Depending on Capacities	219
8.3	An Abstract Approach	227
8.4	Notes	231
<b>9.</b>	<b>An Approximation Theorem</b>	<b>233</b>
9.1	Statement of Results	233
9.2	The Case $m = 1$	239
9.3	The General Case. Outline	240
9.4	The Uniformly $(1, p)$ -Thick Case	243
9.5	The General Thick Case	245
9.6	Proof of Lemma 9.5.2 for $m = 1$	248
9.7	Proof of Lemma 9.5.2	251
9.8	Estimates for Nonlinear Potentials	257
9.9	The Case $C_{m,p}(K) = 0$	263
9.10	The Case $C_{k,p}(K) = 0, 1 \leq k < m$	266
9.11	Conclusion of the Proof	277
9.12	Further Results	278
9.13	Notes	278
<b>10.</b>	<b>Two Theorems of Netrusov</b>	<b>281</b>
10.1	An Approximation Theorem, Another Approach	281
10.2	A Generalization of a Theorem of Whitney	293
10.3	Further Results	301
10.4	Notes	302
<b>11.</b>	<b>Rational and Harmonic Approximation</b>	<b>305</b>
11.1	Approximation and Stability	305
11.2	Approximation by Harmonic Functions in Gradient Norm	312
11.3	Stability of Sets Without Interior	314
11.4	Stability of Sets with Interior	316
11.5	Approximation by Harmonic Functions and Higher Order Stability	318
11.6	Further Results	324
11.7	Notes	325
