

# CONTENTS

Preface	6	Order Embrithopoda (Arsinoitheres)	72
<b>1. The Age of Mammals</b>	<b>7</b>	Order Desmostylia (Desmostylians)	73
Dating Rocks	8	Order Hyracoidea (Hyraxes)	75
Clocks in Rocks	10	Order Tubulidentata (Aardvarks)	77
What's in a Name?	11	Order Macroscelidia (Elephant Shrews)	78
How Do We Classify Animals?	12	Order Afrosoricida	79
Bones vs. Molecules	15	<b>7. Euarchontoglires: Euarchonta. Primates,</b>	
Bones and Teeth	15	<b>Tree Shrews, and Colugos</b>	<b>80</b>
<b>2. The Origin and Early Evolution of Mammals</b>	<b>20</b>	Archontans	80
Synapsids (Protomammals or Stem Mammals)	20	Order Scandentia (Tree Shrews)	82
Mammals in the Age of Dinosaurs	23	Order Dermoptera (Colugos, or	
Morganucodonts	23	"Flying Lemurs")	82
Docodonts	25	Order Plesiadapiformes (Plesiadapids)	84
Monotremes (Platypus and Echidna) and		Order Primates (Euprimates)	86
Their Relatives	27	<b>8. Euarchontoglires: Glires. Rodents and</b>	
Multituberculates	30	<b>Lagomorphs</b>	<b>94</b>
Triconodonts	31	Chisel Teeth	94
Theria	34	Order Rodentia (Rodents)	95
<b>3. Marsupials: Pouched Mammals</b>	<b>37</b>	Order Lagomorpha (Rabbits, Hares,	
Marsupial vs. Placental	37	and Pikas)	101
Marsupial Evolution	38	<b>9. Laurasiatheria: Insectivores.</b>	
Ameridelphia	39	<b>Order Eulipotyphla and Other</b>	
Australidelphia	41	<b>Insectivorous Mammals</b>	<b>103</b>
<b>4. Placental Mammals (Eutheria)</b>	<b>47</b>	Order Eulipotyphla	103
The Interrelationships of Placentals	50	Extinct Insectivorous Groups	107
<b>5. Xenarthra: Sloths, Anteaters, and Armadillos</b>	<b>51</b>	<b>10. Laurasiatheria: Chiroptera. Bats</b>	<b>112</b>
"Edentate" vs. Xenarthran	51	Bat Origins	114
Order Cingulata (Armadillos)	53	<b>11. Laurasiatheria: Pholidota. Pangolins,</b>	
Order Pilosa (Anteaters and Sloths)	55	<b>or "Scaly Anteaters"</b>	<b>117</b>
<b>6. Afrotheria: Elephants, Hyraxes, Sea Cows,</b>		Order Pholidota (Pangolins)	118
<b>Aardvarks, and Their Relatives</b>	<b>58</b>	Palaeonodonta	120
Tethytheres and Afrotheres	58	<b>12. Laurasiatheria: Carnivora and Creodonta.</b>	
Order Proboscidea (Elephants, Mammoths,		<b>Predatory Mammals</b>	<b>122</b>
Mastodonts, and Their Relatives)	60	Carnivores, Carnivorans, and Creodonts	122
Order Sirenia (Manatees and Dugongs, or		Order Creodonta	124
Sea Cows)	67	Order Carnivora	127

ALL Weander 2

<b>13. Laurasiatheria: Ungulata. Hoofed Mammals and Their Relatives</b>	<b>146</b>	Order Pyrotheria (“Fire Beasts”)	206
“Condylarths”	147	Order Astrapotheria (“Lightning Beasts”)	207
<b>14. Laurasiatheria: Artiodactyla. “Even-Toed” Hoofed Mammals: Pigs, Hippos, Whales, Camels, Ruminants, and Their Extinct Relatives</b>	<b>151</b>	Order Litopterna (Litopterns, or “Smooth Heels”)	207
Artiodactyl Origins	153	<b>17. Uintatheres, Pantodonts, Taeniodonts, and Tillodonts</b>	<b>209</b>
Suoid Artiodactyls	154	Order Dinocerata (Uintatheres)	209
Whippomorpha	160	Order Pantodonta (Pantodonts)	212
Tylopods	169	Order Taeniodonta (Taeniodonts)	214
Ruminantia	175	Order Tillodontia (Tillodonts)	216
<b>15. Laurasiatheria: Perissodactyla. “Odd-Toed” Hoofed Mammals: Horses, Rhinos, Tapirs, and Their Extinct Relatives</b>	<b>186</b>	<b>18. Mammalian Evolution and Extinction</b>	<b>218</b>
Equoids	187	Why Were Prehistoric Mammals So Big?	218
Tapiroids	191	Where Have All the Megamammals Gone?	219
Rhinocerotoids	196	How Did Mammals Diversify after the Dinosaurs Vanished?	222
Brontotheres, or Titanotheres	199	What about Mass Extinctions?	228
<b>16. Laurasiatheria: Meridiungulata. South American Hoofed Mammals</b>	<b>203</b>	The Future of Mammals	229
Order Notoungulata (Southern Ungulates)	205	Illustration Credits	231
		Further Reading	232
		Index (with Pronunciation Guide for Taxonomic Names)	234
