ABOUT THE AUTHOR	4
1 INTRODUCTION	5
2 PHASE CHANGE MODELLING AND UTILISATION OF SYSTEMS FOR LATENT HEAT THERMAL ENERGY STORAGE	7
2.1 Thermal energy storage	7
2.2 Latent heat thermal energy storage	7
2.3 Phase change materials	9
2.4 Applications of latent heat thermal energy storage	10
2.4.1 Solar air heating and cooling systems with LHTES	10
2.4.2 Air-PCM heat storage units	11
2.4.3 Building structures integrating PCMs	13
2.5 Modelling of LHTES systems with PCMs	14
2.6 Author's contribution to the development of computer modelling and utilisation of systems for latent heat thermal energy storage	16
3 PHASE CHANGE MODELLING AND PROCESS CONTROL IN STEEL PRODUCTION	25
3.1 Continuous steel casting	25
3.2 Computer modelling of continuous steel casting	26
3.3 Heat transfer and solidification models and phase change modelling	26
3.4 Computer models in optimal control and optimisation of casting process	29
3.5 Author's contribution to the development of modelling and control of continuous steel casting	30
4 CONCLUSIONS AND FURTHER WORK	37
REFERENCES	39
ABSTRACT	41
