CONTENTS

INTRODUCTION

Welcome to the algorithmic age *1*
Flying the unfriendly skies *1*
A tale of two leaders *8*
The leader in the rhizome *10*
The end of all jobs? *13*
How to read this book *18*

I CHANGE YOUR MIND

1 **Work backward from the future** *23*
Start with algorithms *24*
Understand why machines are becoming so smart *27*
Build for your future customers *31*
Learn from your kids *33*
Focus on experiences, not devices *37*

2 **Aim for 10×, not 10%** *49*
Focus on multiples, not margins *50*
Don't let a great idea hold you back from a better one *52*
Learn to follow the data *55*
Unlock the value of your own knowledge *57*
Imagine a future without your company in it *60*

3 Think computationally *65*
Start with first principles *66*
Think like a computer *70*
Augment your intelligence *72*
Learn to trust the algorithm *76*
Speak the languages of power *79*

4 Embrace uncertainty *83*
See the world like a gambler *84*
Rethink the role of meetings *88*
Conduct a decision audit *92*
Build an algorithmic brain trust *94*
Experiment to find questions, not answers *97*

II CHANGE YOUR WORK

5 Make culture your operating system *103*
Put principles before processes *104*
Be a gardener, not a prison guard *107*
Design teams to succeed *110*
Set the stage for smart ideas *113*
Use data to hack your culture *115*

6 Don't work, design work *121*
Challenge your raison d'être *122*
Find the scaled-up solution *126*
Preserve your talent patterns *130*
Let your team own the work *132*
Build a digital twin *134*

7 **Automate and elevate** *139*
Find the new job inside the old one *140*
Retrain, reequip, and reenergize *144*
Create a team to rethink teams *146*
Reimagine, don't just replace work *150*
Focus on the exceptions *152*

III CHANGE THE WORLD

8 **If the answer is X, ask Y** *157*
Pick the right moral compass *158*
Avoid automating bias *165*
Understand the explainability trade-off *168*
Pick the right target *171*
Focus on the forest, not just the trees *173*

9 **When in doubt, ask a human** *177*
Humanize, don't standardize *178*
Look outside the window *181*
Solve for everyone, not for the few *186*
See the world as a designer *189*
Augment relationships, don't replace them *192*

10 **Solve for purpose, not just profit** *197*
Connect people to their work *198*
Beware the algorithmic inequality trap *202*
Use algorithmic management thoughtfully *204*
Build platforms that you would use yourself *206*
Transform work by transforming yourself *208*

Epilogue *213*
Acknowledgments *215*
References and further reading *217*
