Main Findings 9

Digital competence in school curricula 9
Competence areas and related learning outcomes 10
Eight essential competences 10
Development of teacher-specific digital competences before entry to the profession 11
Support measures for the continued development of teacher-specific digital competences 12
Assessment of digital competences in national tests 13
Guidance on the assessment of digital competences in the classroom 14
Recognition of digital competences on certificates awarded at the end of secondary education 15
Use of digital technologies in national testing 15
Digital education strategies, monitoring and implementation 17
Support to schools 17

Introduction 19

Chapter 1: Curriculum 25

1.1. European and national definitions of digital competence 25
1.2. Curriculum approaches to digital competence and current developments 28
1.2.1. Main approaches in primary and secondary education curricula 28
1.2.2. Instruction time for digital competences taught as a compulsory separate subject 31
1.2.3. Ongoing curriculum reforms related to digital competences 33
1.3. Competence areas and learning outcomes related to digital competence 35
1.3.1. Coverage of the digital competence areas in national curricula 35
1.3.2. Focus on eight essential competences 37

Chapter 2: Digital Competences for Teachers: Professionalisation and Support 45

2.1. Building digital professionalism before entry to the teaching profession 46
2.1.1. Teacher competence frameworks 46
Specific digital competence frameworks for teachers 48
General teacher competence frameworks 49
Use of teacher competence frameworks 50
2.1.2. Regulations or recommendations on teacher-specific digital competences in initial teacher education 51
2.1.3. Assessment of teacher-specific digital competences 52
2.2. Support measures for the continued development of teacher-specific digital competences 53
2.2.1. Continuing Professional Development (CPD) 54
2.2.2. Self-assessment tools 57
2.2.3. Teacher networks 58

Chapter 3: Assessing Digital Competence and Using Digital Technologies in Assessment 61

3.1. Assessing digital competence 63

3.1.1. Assessing digital competence through national tests 64

3.1.2. Guidance on the assessment of digital competences in the classroom 68

3.1.3. Recognition of digital competences on certificates awarded at the end of secondary education 72

3.2. Use of digital technologies in assessment and testing 73

3.2.1. Technology-supported national tests 74

3.2.2. Test format and environment 78

Chapter 4: Strategies and Policies 81

4.1. Strategies, monitoring and implementation 81

4.1.1. Current strategies for digital education in schools 82

4.1.2. Monitoring and evaluation of policies 83

4.1.3. Agencies and bodies responsible for digital education at school level 86

4.2. Specific measures to support schools in developing digital education 89

4.2.1. Investment in IT infrastructure 89

4.2.2. Requirements for a school digital plan 92

4.2.3. Digital leadership in schools 93

4.2.4. Involving and supporting parents in digital education 96

4.2.5. Development and quality assurance of digital learning resources 98

4.2.6. External school evaluation 100

TABLE OF FIGURES

Main Findings 9

Figure 1: Inclusion of teacher-specific digital competences in top-level regulations/recommendations on ITE or teacher competence frameworks, primary and general secondary education (ISCED 1-3), 2018/19 12

Figure 2: National tests to assess students' digital competences by education level, primary and general secondary education (ISCED 1-3), 2018/19 13

Figure 3: Use of digital technologies in national tests, primary and general secondary education (ISCED 1-3), 2018/19 16

Chapter 1: Curriculum 25

Figure 1.1: Use of national and/or European definitions of digital competence for school education as stated in curricula or related strategies, 2018/19 27

Figure 1.2: Curriculum approaches to teaching digital competences according to national curricula for primary and general secondary education, (ISCED 1-3), 2018/19 29

Figure 1.3: Recommended minimum instruction time for ICT as a compulsory separate subject for all students by education level in primary and compulsory general secondary education (ISCED 1-3), 2018/19 32

Figure 1.4: Ongoing curriculum reforms related to digital competences in primary and general secondary education (ISCED 1-3), 2018/19 33

Figure 1.5: Digital competence areas addressed in terms of learning outcomes in national curricula for primary and general secondary education (ISCED 1-3), 2018/19 36

Figure 1.6: The Digital Competence Framework for Citizens (DigComp) 38

Figure 1.7: Learning outcomes related to 8 digital competences from the 5 areas defined in DigComp in national curricula for primary and general secondary education (ISCED 1-3), 2018/19 42

Chapter 2: Digital Competences for Teachers: Professionalisation and Support 45

Figure 2.1: Inclusion of digital competences in top-level teacher competence frameworks, primary and general secondary education (ISCED 1-3), 2018/19 47

Figure 2.2: Top-level regulations or recommendations on the inclusion of teacher-specific digital competences in initial education for teachers in primary and general secondary education (ISCED1-3), 2018/19 51

Figure 2.3: Top level regulations or recommendations on assessing teacher-specific digital competences prior to their entry into the profession, primary and general secondary education (ISCED1-3), 2018/19 53

Figure 2.4: Methods of supporting the continued development of teacher-specific digital competences, primary and general secondary education (ISCED 1-3), 2018/19 54

Chapter 3: Assessing Digital Competence and Using Digital Technologies in Assessment 61

Figure 3.1: Use of national tests for the assessment of digital competences, primary and general secondary education (ISCED 1-3), 2018/19 66

Figure 3.2: Guidance on the assessment of digital competences in the classroom in primary and general secondary education (ISCED 1-3), 2018/19 69

Figure 3.3: Information related to digital competences included on certificates awarded at the end of general upper secondary education (ISCED 3), 2018/19 73

Figure 3.4: Use of digital technologies in national tests, primary and general secondary education (ISCED 1-3), 2018/19 77

Figure 3.5: Main test formats used in technology-supported national tests to assess individual students' digital competences in general upper secondary education (ISCED 3), 2018/19 79

Chapter 4: Strategies and Policies 81

Figure 4.1: Types of top-level strategy encompassing digital education at school in primary and general secondary education (ISCED 1-3), 2018/19 83

Figure 4.2: Monitoring and/or evaluation of digital education strategies and policies carried out in the last five years by top-level authorities, 2018/19 84

Figure 4.3: Extent of the mandate of external bodies/agencies operating in the field of digital education at school and supported by the top-level authority, 2018/19 87

Figure 4.4: Top-level plans to invest in school digital infrastructure in primary and general secondary education (ISCED 1-3), 2018/19 91

Figure 4.5: Digital leadership in schools: training for school heads and appointment of digital coordinators, primary and general secondary education (ISCED 1-3), 2018/19 95

Figure 4.6: Policies to improve the development, availability and quality of digital learning resources, primary and general secondary education (ISCED 1-3), 2018/19 98

Figure 4.7: Criteria relating to digital education in external school evaluation frameworks, primary and general secondary education (ISCED 1-3), 2018/19 102
