Chapter 1 Introduction

01

- 1.1 Metals in Medicine – A Historical Perspective 01
- 1.2 Metals and Human Biochemistry 03
- 1.3 Metallopharmaceuticals 06
 - 1.3.1 General Requirements 06
 - 1.3.2 Structure-Activity Relationships 09
 - 1.3.3 Clinical Trials 11
- 1.4 The Special Properties of Metals 11
 - 1.4.1 Comparison with Organic and Biological Compounds 11
 - 1.4.2 Coordination Chemistry 14

Chapter 2 The Chemistry of Metals in a Nutshell

15

- 2.1 The Structure of Materials 15
 - 2.1.1 States of Matter 15
 - 2.1.2 Chemical Elements 16
 - 2.1.3 Chemical Compounds 20
- 2.2 The Structures and Properties of Atoms 24
 - 2.2.1 Electron Configurations 24
 - 2.2.2 The Spatial Distribution of Electrons in Atoms 26
 - 2.2.3 The Electronic Properties of Atoms and Ions 35
 - 2.2.4 The Radii of Atoms and Ions 37
- 2.3 The Formation of Compounds 38
 - 2.3.1 Chemical Bonds 38
 - 2.3.2 The Ionic Bond 39
 - 2.3.3 The Covalent Bond 40
 - 2.3.4 The Coordinate Bond 42
 - 2.3.5 Polarity in Bonding 44

2.4	The Chemistry of Metals – An Overview	49
2.4.1	The Oxidation Numbers and Electron Configurations of Metal Ions	49
2.4.2	The Structures of Metal Compounds	54
2.5	Bonding in Metal Complexes	60
2.5.1	The Crystal Field Theory and Octahedral Complexes	60
2.5.2	The MO Theory and Octahedral Complexes	70
2.5.3	The Eighteen-Electron Rule	74
2.5.4	The Crystal Field Theory and Complexes of CN 4	75
2.6	The Magnetism and Spectroscopy of Metal Complexes	78
2.6.1	The Electronic Spectra of Metal Complexes	78
2.6.2	Lanthanide Luminescence	80
2.6.3	The Magnetic Properties of Transitional Element Complexes	81
2.7	The Energetics of Metal Complex Formation	83
2.7.1	Equilibrium or Stability Constants	83
2.7.2	Hard and Soft Donors or Acceptors	88
2.7.3	The Chelate and Macrocyclic Effects	89
2.8	Reactions at Metal Centres	90
2.8.1	Thermodynamic and Kinetic Stability	90
2.8.2	Substitution Reactions at Metal Centres	92
2.8.3	Mechanisms of Substitution at Metal Centres	93
2.9	Redox Potentials	96
2.10	Conclusions	99
Chapter 3	Diagnostic Medicine	101
3.1	Introduction	101
3.2	Anatomical Imaging	103
3.2.1	Magnetic Resonance Imaging Contrast Agents	103
3.2.2	X-ray Contrast Agents	130
3.3	Functional Imaging	133
3.3.1	Radiopharmaceuticals for Functional Imaging	133
3.3.2	Nuclear Medicine	134
3.3.3	Radiopharmaceuticals	139
3.3.4	Aspects of Technetium Chemistry	141
3.3.5	Blood-pool Imaging and Labelled Blood Cells	152
3.3.6	^{99m} Tc SPECT Imaging Agents for Bone	153
3.3.7	Kidney Imaging	156

3.3.8	Liver and Hepatobiliary System	159
3.3.9	Heart SPECT and PET Imaging	161
3.3.10	Brain Imaging	169
3.3.11	Tumors Abscesses and Hypoxia	176
3.3.12	Synthetic Approaches to Bifunctional ^{99m} Tc Radiopharmaceuticals	185
3.4	<i>In vitro</i> Applications	199
Chapter 4 Therapeutic Medicine		201
4.1	The Use of Metal Compounds in Therapy	201
4.2	Chelation Therapy	202
4.2.1	Metal Sequestration	202
4.2.2	Macrocyclic Antibiotics	203
4.2.3	Metal Intoxication	205
4.2.4	Thalassaemia–Iron	212
4.2.5	Wilson Disease–Copper	216
4.3	Cancer Therapy	218
4.3.1	Metal Complexes in Cancer Therapy	218
4.3.2	Platinum and Palladium Anticancer Agents	219
4.3.3	Non-Platinum Anticancer Agents	257
4.4	Rheumatoid Arthritis	283
4.4.1	Introduction	283
4.4.2	Gold Chemistry	284
4.4.3	Gold Compounds for the Treatment of Rheumatoid Arthritis	285
4.5	Diabetes	292
4.5.1	Vanadium and Diabetes	292
4.5.2	Vanadium Chemistry	292
4.5.3	Vanadium Salts as Insulin Mimics	293
4.5.4	Vanadium Coordination Compounds as Insulin Mimics	294
4.5.5	Mechanism of Action of Vanadium Compounds	297
4.6	Cardiovascular System	298
4.6.1	<i>In vivo</i> Management of Gaseous Compounds	298
4.6.2	Superoxide Dismutase Mimics	299
4.6.3	Nitric Oxide Management	306
4.7	Therapeutic Radiopharmaceuticals	309
4.7.1	Radiation Therapy	309
4.7.2	α -Emitters	309
4.7.3	β -Emitters	311
4.7.4	Radiosensitisers	321

Chapter 5 Metallopharmaceuticals Design	324
5.1 Introduction	324
5.2 Structure Activity Relationships	324
5.2.1 Organic Molecules	325
5.2.2 Metallopharmaceuticals	327
5.3 Future Directions	335
Further Reading	340
Subject Index	344
2.6 The Use of Metallopharmaceuticals	77
2.6.1 The Electronic Spectroscopy of Transition Metal Complexes	78
2.6.2 Lanthanide and Actinide Complexes	80
2.6.3 The Kinetics of Metallopharmaceuticals	81
2.6.4 Metallopharmaceuticals in the Treatment of Cancer	81
2.7 The Energetics of Metallopharmaceuticals	83
2.7.1 The Hard-Soft Acid-Base Theory	83
2.7.2 Hard and Soft Donor Ligands	88
2.7.3 Metallopharmaceuticals in the Treatment of Cancer	89
2.8 Platinum and Palladium Complexes	90
2.8.1 Thermodynamic Stability	90
2.8.2 Kinetics of Platinum and Palladium Complexes	92
2.8.3 Mechanism of Action of Platinum and Palladium Complexes	92
2.8.4 Platinum and Palladium Complexes in the Treatment of Cancer	93
2.9 Gold Chemistry	96
2.9.1 Introduction	96
2.9.2 Gold Chemistry in the Treatment of Cancer	96
2.9.3 Gold Compounds for the Treatment of Cancer	99
2.9.4 Gold Compounds in the Treatment of Cancer	99
2.9.5 Gold Compounds in the Treatment of Cancer	99
2.9.6 Gold Compounds in the Treatment of Cancer	99
2.9.7 Gold Compounds in the Treatment of Cancer	99
2.9.8 Gold Compounds in the Treatment of Cancer	99
2.9.9 Gold Compounds in the Treatment of Cancer	99
2.9.10 Gold Compounds in the Treatment of Cancer	99
2.9.11 Gold Compounds in the Treatment of Cancer	99
2.9.12 Gold Compounds in the Treatment of Cancer	99
2.9.13 Gold Compounds in the Treatment of Cancer	99
2.9.14 Gold Compounds in the Treatment of Cancer	99
2.9.15 Gold Compounds in the Treatment of Cancer	99
2.9.16 Gold Compounds in the Treatment of Cancer	99
2.9.17 Gold Compounds in the Treatment of Cancer	99
2.9.18 Gold Compounds in the Treatment of Cancer	99
2.9.19 Gold Compounds in the Treatment of Cancer	99
2.9.20 Gold Compounds in the Treatment of Cancer	99
2.9.21 Gold Compounds in the Treatment of Cancer	99
2.9.22 Gold Compounds in the Treatment of Cancer	99
2.9.23 Gold Compounds in the Treatment of Cancer	99
2.9.24 Gold Compounds in the Treatment of Cancer	99
2.9.25 Gold Compounds in the Treatment of Cancer	99
2.9.26 Gold Compounds in the Treatment of Cancer	99
2.9.27 Gold Compounds in the Treatment of Cancer	99
2.9.28 Gold Compounds in the Treatment of Cancer	99
2.9.29 Gold Compounds in the Treatment of Cancer	99
2.9.30 Gold Compounds in the Treatment of Cancer	99
2.9.31 Gold Compounds in the Treatment of Cancer	99
2.9.32 Gold Compounds in the Treatment of Cancer	99
2.9.33 Gold Compounds in the Treatment of Cancer	99
2.9.34 Gold Compounds in the Treatment of Cancer	99
2.9.35 Gold Compounds in the Treatment of Cancer	99
2.9.36 Gold Compounds in the Treatment of Cancer	99
2.9.37 Gold Compounds in the Treatment of Cancer	99
2.9.38 Gold Compounds in the Treatment of Cancer	99
2.9.39 Gold Compounds in the Treatment of Cancer	99
2.9.40 Gold Compounds in the Treatment of Cancer	99
2.9.41 Gold Compounds in the Treatment of Cancer	99
2.9.42 Gold Compounds in the Treatment of Cancer	99
2.9.43 Gold Compounds in the Treatment of Cancer	99
2.9.44 Gold Compounds in the Treatment of Cancer	99
2.9.45 Gold Compounds in the Treatment of Cancer	99
2.9.46 Gold Compounds in the Treatment of Cancer	99
2.9.47 Gold Compounds in the Treatment of Cancer	99
2.9.48 Gold Compounds in the Treatment of Cancer	99
2.9.49 Gold Compounds in the Treatment of Cancer	99
2.9.50 Gold Compounds in the Treatment of Cancer	99
2.9.51 Gold Compounds in the Treatment of Cancer	99
2.9.52 Gold Compounds in the Treatment of Cancer	99
2.9.53 Gold Compounds in the Treatment of Cancer	99
2.9.54 Gold Compounds in the Treatment of Cancer	99
2.9.55 Gold Compounds in the Treatment of Cancer	99
2.9.56 Gold Compounds in the Treatment of Cancer	99
2.9.57 Gold Compounds in the Treatment of Cancer	99
2.9.58 Gold Compounds in the Treatment of Cancer	99
2.9.59 Gold Compounds in the Treatment of Cancer	99
2.9.60 Gold Compounds in the Treatment of Cancer	99
2.9.61 Gold Compounds in the Treatment of Cancer	99
2.9.62 Gold Compounds in the Treatment of Cancer	99
2.9.63 Gold Compounds in the Treatment of Cancer	99
2.9.64 Gold Compounds in the Treatment of Cancer	99
2.9.65 Gold Compounds in the Treatment of Cancer	99
2.9.66 Gold Compounds in the Treatment of Cancer	99
2.9.67 Gold Compounds in the Treatment of Cancer	99
2.9.68 Gold Compounds in the Treatment of Cancer	99
2.9.69 Gold Compounds in the Treatment of Cancer	99
2.9.70 Gold Compounds in the Treatment of Cancer	99
2.9.71 Gold Compounds in the Treatment of Cancer	99
2.9.72 Gold Compounds in the Treatment of Cancer	99
2.9.73 Gold Compounds in the Treatment of Cancer	99
2.9.74 Gold Compounds in the Treatment of Cancer	99
2.9.75 Gold Compounds in the Treatment of Cancer	99
2.9.76 Gold Compounds in the Treatment of Cancer	99
2.9.77 Gold Compounds in the Treatment of Cancer	99
2.9.78 Gold Compounds in the Treatment of Cancer	99
2.9.79 Gold Compounds in the Treatment of Cancer	99
2.9.80 Gold Compounds in the Treatment of Cancer	99
2.9.81 Gold Compounds in the Treatment of Cancer	99
2.9.82 Gold Compounds in the Treatment of Cancer	99
2.9.83 Gold Compounds in the Treatment of Cancer	99
2.9.84 Gold Compounds in the Treatment of Cancer	99
2.9.85 Gold Compounds in the Treatment of Cancer	99
2.9.86 Gold Compounds in the Treatment of Cancer	99
2.9.87 Gold Compounds in the Treatment of Cancer	99
2.9.88 Gold Compounds in the Treatment of Cancer	99
2.9.89 Gold Compounds in the Treatment of Cancer	99
2.9.90 Gold Compounds in the Treatment of Cancer	99
2.9.91 Gold Compounds in the Treatment of Cancer	99
2.9.92 Gold Compounds in the Treatment of Cancer	99
2.9.93 Gold Compounds in the Treatment of Cancer	99
2.9.94 Gold Compounds in the Treatment of Cancer	99
2.9.95 Gold Compounds in the Treatment of Cancer	99
2.9.96 Gold Compounds in the Treatment of Cancer	99
2.9.97 Gold Compounds in the Treatment of Cancer	99
2.9.98 Gold Compounds in the Treatment of Cancer	99
2.9.99 Gold Compounds in the Treatment of Cancer	99
2.9.100 Gold Compounds in the Treatment of Cancer	99
