Preface ..... 7

## Part I

### Theoretical background and Methods

1	The influence of growth, maturation and genetics on injury risk in youth soccer ..... 10
1.1	Injury incidence in youth soccer ..... 10
1.2	Growth, maturation and injury risk ..... 15
1.2.1	Growth ..... 15
1.2.2	Maturation ..... 16
1.2.3	Implications of growth and maturation for injury and performance ..... 18
1.3	Risk factors for injury in youth soccer ..... 22
1.4	Muscle, tendon and leg stiffness ..... 23
1.5	Knee stability: The role of the hamstring and quadriceps muscles... 29
1.6	Neuromuscular control and knee stability ..... 30
1.7	Effect of fatigue on injury risk in youth soccer ..... 33
1.7.1	Neuromuscular function ..... 34
1.7.1.1	Methodological issues of measuring neuromuscular function in children ..... 34
1.7.1.2	Neuromuscular feed-forward and feedback mechanisms in children ..... 36
1.7.1.2.1	Electromechanical delay during growth and maturation ..... 36
1.7.2	Neuromuscular recovery from fatigue tasks and soccer match-play ..... 38
1.7.3	Landing mechanics and muscle fatigue ..... 40
1.7.4	Endocrine responses to soccer match-play and recovery ..... 41
1.8	Physical performance after soccer-specific exercise ..... 44
1.9	Genetics and neuromuscular function and performance in children ..... 45
1.10	References ..... 46
2	Methods ..... 60
2.1	Participants ..... 60
2.2	Studies design ..... 61
2.2.1	The genetic relationship to soccer player phenotypes ..... 61
2.2.2	Readiness to re-perform: Changes in neuromuscular performance and muscle damage during a competitive microcycle in youth male soccer players ..... 61

2.2.3	Acute effects of competitive match-play on neuromuscular performance and muscle damage in youth male soccer players . . . . .	62
2.2.4	Seasonal and age related changes in risk factors of lower limb injuries . . . . .	62
2.3	Data collection and instrumentation. . . . .	62
2.3.1	Anthropometry . . . . .	63
2.3.2	DNA sampling . . . . .	64
2.3.3	Neuromuscular control . . . . .	64
2.3.3.1	Leg stiffness . . . . .	65
2.3.3.2	Reactive strength index. . . . .	66
2.3.4	Muscle activity. . . . .	67
2.3.4.1	EMG. . . . .	68
2.3.4.1.1	Frequency analysis . . . . .	68
2.3.4.1.2	Electro-mechanical delay assessment. . . . .	69
2.3.5	Landing mechanics . . . . .	69
2.3.5.1	Landing error score system . . . . .	70
2.3.6	Muscle damage. . . . .	70
2.3.6.1	Creatine kinase activity . . . . .	71
2.3.7	Match and training intensity . . . . .	71
2.3.7.1	Rate of perceived exertion . . . . .	72
2.3.8	Perceived muscle soreness . . . . .	72
2.3.8.1	Self-evaluation of muscle soreness . . . . .	72
2.3.9	Training content and competition schedule monitoring . . . . .	73
2.4	References. . . . .	73

Part II  
**Research studies**

3	The genetic relationship to soccer player phenotypes . . . . .	80
3.1	Introduction . . . . .	80
3.1.1	Genetic predisposition to lower limb injury . . . . .	81
3.1.2	Genes related to elite sport performance in soccer. . . . .	82
3.1.3	Genetic background of trainability . . . . .	83
3.2	Methods . . . . .	84
3.2.1	Participants. . . . .	84
3.2.2	Measurement procedures . . . . .	85
3.2.3	Statistical analyses. . . . .	86
3.3	Results . . . . .	86
3.4	Discussion. . . . .	93
3.5	Conclusions . . . . .	95
3.6	Practical application . . . . .	95
3.7	References. . . . .	96

4	Readiness to re-perform: Changes in neuromuscular performance and muscle damage during a competitive microcycle in youth male soccer players . . . . .	101
4.1	Introduction . . . . .	101
4.2	Methods . . . . .	103
4.2.1	Participants. . . . .	103
4.2.2	Measurement procedures . . . . .	104
4.2.3	Statistical analysis . . . . .	108
4.3	Results. . . . .	109
4.3.1	Relative leg stiffness . . . . .	111
4.3.2	Reactive strength index . . . . .	111
4.3.3	Landing mechanics . . . . .	111
4.3.4	Electro-mechanical delay . . . . .	111
4.3.5	Creatine kinase . . . . .	112
4.3.6	Perceived muscle soreness . . . . .	112
4.4	Discussion. . . . .	115
4.4.1	Relative leg stiffness . . . . .	115
4.4.2	Reactive strength index . . . . .	116
4.4.3	Landing mechanics . . . . .	118
4.4.4	Electro-mechanical delay . . . . .	119
4.4.5	Creatine kinase . . . . .	120
4.4.6	Limitations . . . . .	122
4.5	Conclusions . . . . .	122
4.6	Practical application . . . . .	123
4.7	References. . . . .	123
5	Acute effects of competitive match-play on neuromuscular performance and muscle damage in youth male soccer players . . . . .	128
5.1	Introduction . . . . .	128
5.2	Methods . . . . .	133
5.2.1	Participants . . . . .	133
5.2.2	Measurement procedures . . . . .	133
5.2.3	Statistical analysis . . . . .	134
5.3	Results. . . . .	134
5.4	Discussion. . . . .	137
5.4.1	Limitations . . . . .	145
5.5	Conclusions . . . . .	146
5.6	Practical application . . . . .	146
5.7	References. . . . .	147

6	Seasonal and age related changes in risk factors of lower limb injuries . . . . .	153
6.1	Introduction . . . . .	153
6.2	Methods . . . . .	157
6.2.1	Participants. . . . .	157
6.2.2	Measurement procedures . . . . .	158
6.2.2.1	Seasonal changes . . . . .	158
6.2.2.2	Age-related differences . . . . .	159
6.2.3	Statistical analysis . . . . .	159
6.3	Results . . . . .	160
6.3.1	Neuromuscular control. . . . .	160
6.3.2	Landing mechanics . . . . .	162
6.3.3	Creatine kinase . . . . .	163
6.4	Discussion. . . . .	164
6.4.1	Neuromuscular control. . . . .	164
6.4.2	Landing mechanics . . . . .	166
6.4.3	Creatine kinase . . . . .	167
6.4.4	Limitations . . . . .	169
6.5	Conclusions . . . . .	169
6.6	Practical application . . . . .	170
6.7	References. . . . .	170
7	Summary. . . . .	177
7.1	Theoretical background . . . . .	177
7.2	Research studies. . . . .	178
	List of abbreviations . . . . .	181
