

# Contents

<b>Preface</b>	<b>4</b>
<b>Chapter 1. Fundamentals</b>	<b>5</b>
1.1 Logic.....	5
1.2 Some Concepts of Sets.....	7
1.3 Groups.....	10
1.4 Fields.....	13
1.5 Integers.....	15
1.6 Rational Numbers.....	17
1.7 Real Numbers.....	20
1.7.1 Absolute Value and Means.....	26
1.7.2 Extended Real Axis $E_1^*$ .....	27
1.7.3 Solution of Inequalities .....	28
1.8 Complex Numbers .....	32
1.8.1 Some Important Inequalities .....	39
1.9 Development of the Number System .....	40
Problems.....	41
<b>Chapter 2. Vector Calculus</b>	<b>50</b>
2.1 Products of Vectors .....	52
<b>Chapter 3. Sequences and Series</b>	<b>55</b>
3.1 Sequences of Constant Terms.....	55
Problems.....	71
3.2 Series (Infinite) of Constant Terms .....	73
Problems.....	96
3.3 Sequences of Functions .....	98
3.4 Series with Variable Terms .....	102
3.5 Power Series .....	106
Problems .....	115
<b>Chapter 4. Linear Algebra</b>	<b>118</b>
4.1 Elementary Vector Algebra.....	118
4.2 Matrices .....	123
4.3 Determinants .....	129
4.3.1 Matrix Inversion .....	134
4.4 Systems of Linear Equations .....	136
4.4.1 Gaussian Elimination.....	141
4.4.2 Cramer's Rule.....	146
4.5 Eigenvalues of Matrices .....	148
4.6 Quadratic Forms and Linear Mappings .....	151
<b>Chapter 5. Approximation and Interpolation</b>	<b>156</b>
5.1 Best Approximation.....	156
5.2 Polynomial Interpolation .....	159
5.3 Iterated Interpolation .....	165
5.4 Trigonometric Interpolation.....	167
5.5 Interpolation by Splines .....	168

---

5.6 Least Squares Approximation .....	171
5.6.1 Discrete Approximation Method .....	171
5.6.2 Continuous Approximation Method .....	177
<b>Chapter 6. Numerical Solution of Nonlinear Equations</b>	<b>181</b>
6.1 Estimates for the Roots .....	182
6.2 Newton's Method .....	185
6.3 The Regula Falsi Method .....	186
6.4 The General Iterative Method .....	187
<b>Chapter 7. Initial Value Problems</b>	<b>188</b>
7.1 General One-Step Method .....	189
7.1.1 Euler's Method .....	191
7.1.2 Taylor's Expansion Methods .....	192
7.1.3 Runge-Kutta Methods .....	193
7.2 Linear $k$ -Step Method .....	194
7.3 Predictor-Corrector Methods .....	197
<b>Chapter 8. Functional Analysis</b>	<b>199</b>
8.1 Sets of Points in $E_n$ .....	199
8.2 The Space $L_2$ .....	202
8.3 Metric and Normed Spaces .....	206
8.4 Operators and Contraction Mappings .....	215
<b>Chapter 9. Partial Differential Equations</b>	<b>219</b>
9.1 Linear Equations of the Second Order .....	223
9.2 The Laplace and Poisson Equations .....	225
9.3 Wave Equation .....	228
9.4 Heat-Conduction Equation .....	231
<b>Chapter 10. Boundary Value Problems</b>	<b>233</b>
Problems .....	240
<b>Chapter 11. The Finite-Difference Method</b>	<b>241</b>
11.1 F-D Method for Ordinary Differential Equations .....	241
11.1.1 Boundary-Value Problems .....	241
11.1.2 Eigenvalue Problems .....	244
11.2 F-D Method for Partial Differential Equations .....	246
11.2.1 F-D Method for Elliptic Equations .....	247
11.2.2 F-D Method for Parabolic Equations .....	251
11.2.3 F-D Method for Hyperbolic Equations .....	253
<b>Chapter 12. Variational Methods</b>	<b>255</b>
12.1 The Ritz Method .....	260
12.2 The Galerkin Method .....	263
Problems .....	264
<b>Chapter 13. Fourier Series</b>	<b>265</b>
13.1 Orthogonal Systems .....	265
13.2 Generalized Fourier Series .....	266
13.3 Trigonometric Fourier Series .....	270
Problems .....	274

---

<b>Chapter 14. Multiple Integrals</b>	<b>275</b>
14.1 Double Integrals.....	275
14.1.1 Method of Substitution .....	280
14.2 Triple Integrals.....	283
14.3 Applications of Multiple Integrals.....	286
Problems .....	291
<b>Chapter 15. Curvilinear Integrals</b>	<b>293</b>
15.1 Green's Theorem .....	299
