Contributors	xi
Preface	xiii

Part I Perspectives

1. Why C₄ Photosynthesis?

Rowan F. Sage

I. Introduction	3
II. The Problem with Rubisco	3
III. How C ₄ Photosynthesis Solves the Rubisco Problem	7
IV. Significant Variations on the C ₄ Theme	10
V. The Consequences of the Evolution of C ₄ Photosynthesis	11
VI. C ₄ Photosynthesis in the Future	12
VII. Summary	14
References	14

2. C₄ Photosynthesis: A Historical Overview

Marshall D. Hatch

I. Introduction	17
II. The Prediscovery Scene (Before 1965)	18
III. Discovery: Radiotracer Evidence (1954–1967)	19
IV. Mechanism, Functions, and Recognition (1965–1970)	22
V. Selected Aspects of the C ₄ Story (1970–)	25
VI. Summary	40
References	40

Part II Structure–Function of the C₄ Syndrome

3. The Biochemistry of C₄ Photosynthesis

Ryuzi Kanai and Gerald E. Edwards

I. Introduction	49
-----------------	----

- II. CO₂ Concentration and Rubisco Activity in Bundle Sheath Cells 60
- III. Energetics of C₄ Photosynthesis 62
- IV. Coordination of the Two Cell Types in C₄ Photosynthesis 68
- V. Intracellular Transport of Metabolites 74
- VI. Summary 78
- References 80

4. Regulation of the C₄ Pathway

Richard C. Leegood and Robert P. Walker

- I. Introduction 89
- II. An Overview of the Regulation of the C₄ Cycle 89
- III. Regulation of the C₄ Cycle 95
- IV. Interactions between the C₄ Cycle and Mitochondrial Metabolism 109
- V. Regulation of the Benson–Calvin Cycle in C₄ Plants 111
- VI. Regulation of Product Synthesis in Leaves of C₄ Plants 114
- VII. Summary 120
- References 121

5. Leaf Structure and Development in C₄ Plants

Nancy G. Dengler and Timothy Nelson

- I. Introduction 133
- II. Kranz Anatomy and Biochemical Compartmentation 134
- III. Development of the C₄ Syndrome 153
- IV. Summary 163
- References 164

6. Modeling C₄ Photosynthesis

Susanne von Caemmerer and Robert T. Furbank

- I. Introduction 173
- II. Basic Model Equations 174
- III. Analysis of the Model 184
- IV. Summary 205
- References 205

Part III

Ecology of C₄ Photosynthesis

7. Environmental Responses

Steve P. Long

- I. Introduction 215
- II. Light 216
- III. Nitrogen 221

- IV. Water 226
- V. Temperature 231
- VI. Summary 240
- References 242

8. Success of C₄ Photosynthesis in the Field: Lessons from Communities Dominated by C₄ Plants

Alan K. Knapp and Ernesto Medina

- I. Introduction 251
- II. The C₄-Dominated Tallgrass Prairies of North America 252
- III. The C₄-Dominated Neotropical Savannas 264
- IV. Summary 276
- References 277

9. C₄ Plants and Herbivory

Scott A. Heckathorn, Samuel J. McNaughton, and James S. Coleman

- I. Introduction 285
- II. Unique Features of C₄ Species That May Affect Herbivores and Plant Responses to Herbivory 286
- III. How Important Are C₄ Characteristics to Herbivory Tolerance and Resistance? 295
- IV. Summary 306
- References 307

10. The Biogeography of C₄ Photosynthesis: Patterns and Controlling Factors

Rowan F. Sage, David A. Wedin, and Meirong Li

- I. Introduction 313
- II. The Global Distribution of C₄ Photosynthesis 314
- III. Factors Controlling the Distribution of C₄ Species 331
- IV. C₄ Plants in the Future 343
- V. Summary 350
- References 356

Part IV

The Evolution of C₄ Photosynthesis

11. The Origins of C₄ Genes and Evolutionary Pattern in the C₄ Metabolic Phenotype

Russell K. Monson

- I. Introduction 377
- II. The Evolution of C₄ Genes 378
- III. The Evolution of C₄ Metabolism as Evidenced in C₃-C₄ Intermediates 389

- IV. The Evolution of C₄ Metabolism in Relation to Ecological Factors and Plant Growth Form 399
- V. Summary 403
- References 404

12. Phylogenetic Aspects of the Evolution of C₄ Photosynthesis

Elizabeth A. Kellogg

- I. Introduction 411
- II. Phylogenetic Pattern 412
- III. Number and Time of C₄ Origins 429
- IV. Evolution of C₄ Photosynthesis 433
- V. Summary 439
- References 439

13. Paleorecords of C₄ Plants and Ecosystems

Thure E. Cerling

- I. Introduction 445
- II. Paleorecords 448
- III. Summary 464
- References 465

Part V

C₄ Plants and Humanity

14. Agronomic Implications of C₄ Photosynthesis

R. Harold Brown

- I. Introduction 473
- II. Adaptation and Characterization of C₄ Crop Plants 475
- III. Productivity of C₄ Crop Plants 479
- IV. Crop Quality 487
- V. Weeds 491
- VI. C₃-C₄ Mixtures 494
- VII. Turf 499
- VIII. Summary 501
- References 503

15. C₄ Plants and the Development of Human Societies

Nikolaas J. van der Merwe and Hartmut Tschauner

- I. Introduction 509
- II. C₄ Plants, Carbon Isotopes, and Human Evolution 510
- III. The Emergence of Food Production 514
- IV. Millets in China 517
- V. C₄ Plants in Africa 520

VI. Maize in the Americas 525
 VII. The Past 500 Years 534
 VIII. Summary 537
 References 538

16. The Taxonomic Distribution of C₄ Photosynthesis

Rowan F. Sage, Meirong Li, and Russell K. Monson

I. Introduction 551
 II. Methodology 552
 III. Lists of C₄ Taxa 555
 IV. Summary 580
 References 581
