

# Contents

<b>1</b>	<b>Basic Concepts of the Theory of Languages and Grammars</b>	<b>1</b>
1.1	Formal languages . . . . .	1
1.2	Definition of Grammar . . . . .	2
1.3	Classification of Grammars . . . . .	4
1.4	Grammars and Operations over Languages . . . . .	5
1.5	Derivation Tree . . . . .	6
<b>2</b>	<b>Regular Languages</b>	<b>10</b>
2.1	Definition of Regular Languages . . . . .	10
2.2	Grammars Generating Regular Languages and Relations between Them . . . . .	10
2.3	Finite Automata . . . . .	18
2.3.1	Deterministic Finite Automata . . . . .	19
2.3.2	Nondeterministic Finite Automata . . . . .	20
2.3.3	The Relation between Deterministic and Nondeterministic Finite Automata . . . . .	23
2.3.4	Finite Automata and Operations over Languages . . . . .	25
2.4	Regular Expressions . . . . .	30
2.4.1	Definition of Regular Expression . . . . .	30
2.4.2	Regular Equations and their Solution . . . . .	31
2.4.3	Derivation of Regular Expressions . . . . .	32
2.4.4	Integrals of Regular Expressions . . . . .	34
2.4.5	Modification of Regular Expressions . . . . .	35
2.5	Relations between Formal Systems Describing Regular Languages	37
2.5.1	Relation between Regular Grammars and Finite Automata	37
2.5.2	Relation between Finite Automata and Regular Grammars	41
2.5.3	Relation between Regular Expressions and Finite Automata	42
2.5.4	Relation between Regular Grammars and Regular Expres- sions . . . . .	46
2.5.5	Relation between Finite Automata and Regular Expression	47
2.5.6	Relation between Regular Expressions and Regular Gram- mars . . . . .	52
<b>3</b>	<b>Context-Free Languages</b>	<b>56</b>
3.1	Context-Free Grammars . . . . .	56
3.2	Unambiguous and Ambiguous Grammars . . . . .	56
3.3	Basic Transformation of Context-Free Grammars . . . . .	57
3.4	Normal Forms of Context-Free Grammars . . . . .	62
3.4.1	Chomsky Normal Form . . . . .	62
3.4.2	Greibach Normal Form . . . . .	64
3.5	Two Groups of Methods of Parsing . . . . .	70

3.6	Pushdown Automata . . . . .	74
3.6.1	Definition of Pushdown Automaton . . . . .	74
3.6.2	Basic Properties of Pushdown Automata . . . . .	76
3.6.3	Relation between Context-Free Grammars and Pushdown Automata . . . . .	77
3.6.4	Deterministic Parsing . . . . .	80
3.6.5	Deterministic Pushdown Automaton . . . . .	81
3.6.6	Deterministic Parsing by Top-Down Method . . . . .	81
3.6.7	Deterministic Parsing by Bottom-Up Method . . . . .	82
<b>4</b>	<b>LL Grammars and Languages</b>	<b>85</b>
4.1	Strong LL Grammars . . . . .	86
4.1.1	Simple LL(1) Grammars . . . . .	86
4.1.2	q-grammars . . . . .	89
4.1.3	LL(1) Grammars . . . . .	92
4.1.4	Strong LL(k) Grammars . . . . .	98
4.2	Weak LL Grammars . . . . .	101
4.3	Properties of LL Grammars and Languages . . . . .	108
4.4	Transformations of LL Grammars . . . . .	112
4.5	Transformation of Context-free Grammars into <i>LL</i> Grammars . .	117
<b>5</b>	<b>Formal Translations</b>	<b>127</b>
5.1	Translation Grammars . . . . .	129
5.2	Regular Translations . . . . .	132
5.2.1	Finite Translation Automata . . . . .	132
5.2.2	Sequential Mapping . . . . .	135
5.3	Context-Free Translations . . . . .	136
5.3.1	Pushdown Translation Automata . . . . .	136
5.4	Implementation of Formal Translation in Top-Down Parsing . . .	139
