	List of Illustrations		xi
	Preface		xv
1	Science and Its Origins		1
	What Is Science?     1		
	Prehistoric Attitudes toward Nature     4		
	Babylonian and Egyptian Science     13		
2	The Greeks and the Cosmos		21
	The World of Homer and Hesiod     21		
	The First Greek Philosophers     25		
	The Milesians and the Question of Ultimate Reality     27		
	The Problem of Change     32		
	The Problem of Knowledge     34		
	Plato's World of Forms     35		
	Plato's Cosmology     39		
	The Achievement of Early Greek Philosophy     44		
3	Aristotle's Philosophy of Nature		46
	Life and Works     46		
	Metaphysics and Epistemology     48		
	Nature and Change     51		
	Cosmology     54		
	Motion, Terrestrial and Celestial     58		
	Aristotle as a Biologist     62		
	Aristotle's Achievement     67		
4	Hellenistic Natural Philosophy		69
	Schools and Education     69		
	The Lyceum after Aristotle     74		
	Epicureans and Stoics     77		
5	The Mathematical Sciences in Antiquity		85
	The Application of Mathematics to Nature     85		
	Greek Mathematics     86		
	Early Greek Astronomy     89		

	Cosmological Developments	97	
	Hellenistic Planetary Astronomy	98	
	The Science of Optics	105	
	The Science of Weights	108	
6	Greek and Roman Medicine		111
	Early Greek Medicine	111	
	Hippocratic Medicine	113	
	Hellenistic Anatomy and Physiology	119	
	Hellenistic Medical Sects	122	
	Galen and the Culmination of Hellenistic Medicine		125
7	Roman and Early Medieval Science		135
	Greeks and Romans	135	
	Popularizers and Encyclopedists	137	
	Translations	147	
	The Role of Christianity	149	
	Roman and Early Medieval Education	151	
	Two Early Medieval Natural Philosophers	158	
8	Science in Islam		161
	Learning and Science in Byzantium	161	
	The Eastward Diffusion of Greek Science	163	
	The Birth, Expansion, and Hellenization of Islam		166
	Translation of Greek Science into Arabic	168	
	The Islamic Response to Greek Science	170	
	The Islamic Scientific Achievement	175	
	The Decline of Islamic Science	180	
9	The Revival of Learning in the West		183
	The Middle Ages	183	
	Carolingian Reforms	184	
	The Schools of the Eleventh and Twelfth Centuries		190
	Natural Philosophy in the Twelfth-Century Schools		197
	The Translation Movement	203	
	The Rise of Universities	206	
10	The Recovery and Assimilation of Greek and Islamic Science		215
	The New Learning	215	
	Aristotle in the University Curriculum	216	
	Points of Conflict	218	
	Resolution: Science as Handmaiden	223	
	Radical Aristotelianism and the Condemnations of 1270 and 1277	234	
	The Relations of Philosophy and Theology after 1277		240
11	The Medieval Cosmos		245
	The Structure of the Cosmos	245	

	The Heavens	248	
	The Terrestrial Region	252	
	The Greek and Islamic Background to Western Astronomy	261	
	Astronomy in the West	267	
	Astrology	274	
12	The Physics of the Sublunar Region		281
	Matter, Form, and Substance	282	
	Combination and Mixture	285	
	Alchemy	287	
	Change and Motion	290	
	The Nature of Motion	292	
	The Mathematical Description of Motion	294	
	The Dynamics of Local Motion	301	
	The Quantification of Dynamics	304	
	The Science of Optics	307	
13	Medieval Medicine and Natural History		317
	The Medical Tradition of the Early Middle Ages	317	
	The Transformation of Western Medicine	325	
	Medical Practitioners	327	
	Medicine in the Universities	329	
	Disease, Diagnosis, Prognosis, and Therapy	332	
	Anatomy and Surgery	339	
	Development of the Hospital	345	
	Natural History	348	
14	The Legacy of Ancient and Medieval Science		355
	The Continuity Debate	355	
	The Medieval Scientific Achievement	360	
	Notes		369
	Bibliography		407
	Index		441
