INTRODUCTION	5
A. BASIC PRINCIPLES OF TOPOGRAPHICAL DISSECTION OF EXTREMITIES	7
B. DISSECTION OF THE UPPER EXTREMITY	8
1. Infraclavicular region	10
2. Deltoid region	12
3. Scapular region	14
4. Axilla	15
5. Anterior brachial region	21
6. Posterior brachial region	24
7. Anterior cubital region	26
8. Posterior cubital region	26
9. Anterior antebrachial region	30
10. Posterior antebrachial region	30
11. Anterior carpal region and the palm of the hand	33
12. Posterior carpal region and the dorsum of the hand	38
13. Topography of the digits of the hand	44
14. Dissection of the muscles and joints of the upper extremity	48
C. DISSECTION OF THE LOWER EXTREMITY	50
1. Gluteal region	52
2. Anterior femoral region	56
3. Posterior femoral region	61
4. Anterior region of the knee	64
5. Posterior region of the knee (fossa poplitea)	66
6. Anterior crural region	70
7. Posterior crural region (sural region)	72
8. Medial and lateral retromalleolar region	77
9. Dorsum of the foot	79
10. Sole of the foot (planta pedis)	83
11. Topography of the digits of the foot	87
12. Dissection of pelvis and perineum on isolated lower extremity	88
13. Dissection of the muscles and joints of the lower extremity	89
