## Outline

Preface ..... 6

1. Natural rubber ..... 7

1.1 Sources of natural rubber ..... 7

1.2 Latex ..... 9

1.2.1 Latex composition ..... 9

1.2.2 Latex concentrate ..... 9

1.2.3 Ribbed smoked sheets ..... 10

1.2.4 Pale crepe and sole crepe ..... 10

1.2.5 Field coagulum crepe ..... 10

1.3 Technically specified rubbers (TSR) ..... 10

1.4 Properties of natural rubber ..... 11

1.4.1 Properties of raw rubber ..... 11

1.4.2 Properties of vulcanizate ..... 11

1.5 Products from natural rubber ..... 12

2. Synthetic rubbers ..... 13

2.1 Diene rubbers ..... 13

2.1.1 Polybutadiene ..... 13

2.1.2 Styrene-butadiene rubber ..... 16

2.1.3 Polyisoprene ..... 17

2.2 Saturated elastomers ..... 18

2.2.1 Ethylene-propylene copolymers (EPM) and ethylene-propylene-diene terpolymers (EPDM) ..... 18

2.2.2 Butyl (IIR) and halobutyl (HIIR) rubbers ..... 19

3. Vulcanization of Rubbers and Network Formation Network ..... 22

3.1 Fundamental background ..... 22

3.2 Vulcanization curves ..... 26

3.2.1 Characterization of vulcanization process ..... 26

3.2.2 Crosslink Density ..... 27
3.2.3 Vulcanizate Properties ..... 28
4. Sulphur Vulcanization of Rubbers ..... 30
4.1 Vulcanizing System ..... 30
4.2 Sulfur Vulcanization ..... 30
4.3 Accelerated Sulphur Vulcanization ..... 32
4.4 Activated-Accelerated Sulphur Vulcanization ..... 36
4.5 Mechanism of Sulphur Vulcanization ..... 38
5. Peroxide Vulcanization of Rubbers ..... 43
5.1 Peroxide Vulcanization in General ..... 43
5.2 Mechanism of Peroxide Crosslinking of Some Common Rubbers ..... 45
5.3 Criteria for the Selection of Peroxide ..... 49
5.4 Active Oxygen Content ..... 49
5.5 Half-life Period ..... 49
5.6 Coagent Assisted Peroxide Crosslinking ..... 50
6. Composits and nano-composites ..... 53
6.1 Introduction ..... 53
6.2 Nanocomposites ..... 54
6.2.1 Nanofillers types ..... 55
6.2.2 Layered silicates ..... 56
6.2.3 Nanotubes ..... 58
6.2.4 Spherical particles ..... 59
6.2.5 Techniques of rubber nanocomposite preparation ..... 59
6.2.6 Melt compounding ..... 60
6.2.7 Solution blending ..... 62
6.2.8 Latex blending ..... 62
6.3 Conclusion ..... 63
