

# CONTENTS

1. Red blood cell count .....	5
2. Estimation of haemoglobin concentration and of mean corpuscular haemoglobin .....	8
3. Estimation of blood group by slide method .....	10
4. Erythrocyte sedimentation rate .....	12
5. Estimation of osmotic resistance of red blood cells .....	14
6. Apex beat, heart sounds .....	16
7. Examination of pulse by palpation .....	18
8. ECG record by means of personal computer .....	20
9. Sphygmography. Measurement of pulse wave velocity. ....	21
10. Systolic time intervals .....	23
11. Ergometry .....	25
12. Blood pressure in man .....	27
13. Non-invasive methods of blood pressure measurement .....	30
14. Blood flow in forearm .....	33
15. Blood flow in veins .....	35
16. Digital model of aortic function (a simulation program) .....	37
17. Pneumography .....	39
18. Spirometric examination .....	42
19. Recording of forced vital capacity .....	44
20. Spirometry .....	45
21. Pneumotachography and estimation of airway resistance .....	46
22. Control of pulmonary ventilation in man .....	48
23. Evaluation of sensitivity of respiratory centre .....	50
24. Measurement of basal metabolic rate (BMR). Energy output in change of body position. Repay of oxygen debt. ....	51
25. Evaluation of nutritional state .....	56
26. Compiling daily diet .....	62
27. Examination of reflexes in man .....	66
28. Recording of Achilles' tendon reflex .....	69
29. Estimation of reaction time using computer .....	73
30. Examination of muscle tone .....	75
31. Stabilometry .....	77
32. Vertigo and nystagmus .....	79
33. Cutaneous sense organs .....	81
34. Estimation of visual acuity .....	85
35. Accomodation, Scheiner's experiment .....	86
36. Visual field and blind spot .....	88
37. Vision in dark .....	90
38. Observation of ocular fundus .....	92
39. Purkyně's images .....	94

40. Astigmatism ..... 95

41. Examination of colour blindness ..... 97

42. EEG – Electroencephalography ..... 99

43. EOG – Electrooculography ..... 101
