

## CONTENTS

	PREFACE.....	3
	CONTENTS.....	4
1.	VALID TECHNICAL RULES.....	7
1.1.	The Act No. 22/1997 (Technical Requirements for Products).....	7
1.2.	Notice No. 50/1978 (qualification of persons).....	10
1.3.	Notice No. 20/1978 (important electrical equipment).....	11
2.	BASIC ELECTROTECHNICAL STANDARDS.....	13
2.1.	General.....	13
2.2.	International and European standardization.....	14
2.3.	IEC Basic Standards.....	16
3.	BASIC TERMS AND DEFINITIONS FOR ELECTRICAL SAFETY AND ELECTRICAL INSTALLATIONS.....	18
4.	EFFECTS OF CURRENT PASSING THROUGH THE HUMAN BODY.....	22
4.1.	Principles.....	22
4.1.1	Requirements for characteristics of protective devices.....	27
4.2.	Safety limits of current passing through the human body.....	27
4.3.	Resistance (impedance) of the human body.....	27
4.4.	Conventional touch voltage limit.....	28
5.	FUNDAMENTAL RULES FOR PROTECTION AGAINST ELECTRIC SHOCK.....	30
5.1.	Protection against direct contact.....	31
5.1.1	Protection by insulation of live parts.....	32
5.1.2	Protection by barriers or enclosures.....	32
5.1.3	Protection by obstacles.....	33
5.1.4	Protection by placing live parts out of reach.....	33
5.1.5	Use of protective measures.....	34
5.1.6	Additional protection.....	34
5.2.	Protection against indirect contact.....	35
5.2.1	Classification of electrical and electronic equipment with regard to protection against electric shock in the event of insulation fault.....	36
5.2.2	Protection by automatic disconnection of supply.....	38
5.2.3	Protection by use of Class II equipment or by equivalent insulation.....	48
5.2.4	Protection by electrical separation.....	49
5.3.	Protection against both direct and indirect contact.....	49
6.	CONSTRUCTION OF ELECTRICAL INSTALLATION AND EQUIPMENT.....	52
6.1.	Degrees of protection provided by enclosures (IP Code).....	52
6.1.1	Elements of the IP Code and their meaning.....	54
6.1.2	Examples of designations with the IP Code.....	58
6.2.	Rules for installation of electrical equipment (apparatus and appliances).....	59
6.3.	Proper installation of protective conductor.....	60
6.3.1	PEN conductor.....	61
6.3.2	reservation of electrical continuity of protective conductors.....	61
6.3.3	Terminals for protective conductors.....	62
6.4.	Proper installation of electrical equipment.....	63
6.4.1	Protection against thermal effects.....	63
6.4.2	Type of wiring and methods of installation.....	63

6.4.3	Nature of demand .....	63
6.4.4	Selection of electrical equipment .....	64
6.4.5	Characteristics .....	64
6.4.6	Cross-section of conductors .....	65
6.4.7	Protection against overcurrent .....	65
6.4.8	Protection against fault currents .....	65
6.4.9	Protection against overvoltage .....	66
6.4.10	Disconnecting devices .....	66
6.4.11	Emergency control .....	66
6.4.12	Conditions of installation .....	66
6.4.13	Prevention of mutual influence .....	66
6.4.14	Accessibility of electrical equipment .....	67
6.5.	Erection and initial verification of electrical installations .....	67
6.5.1	Erection .....	67
6.5.2	Initial verification .....	67
7.	<b>SAFETY SYMBOLS AND SAFETY IDENTIFICATION FOR USE ON ELECTRICAL EQUIPMENT</b> .....	69
7.1.	Identification of conductors and terminals .....	69
7.2.	Graphical symbols for use on electrical equipment .....	70
7.3.	Safety information on electrical equipment and devices .....	71
7.3.1	Safety colours .....	71
7.3.2	Example of use of safety colours and contrast colours .....	71
7.3.3	Geometric form and meaning of safety signs .....	72
7.3.4	Safety signs .....	72
7.3.5	Examples of safety signs .....	73
7.4.	Coding of indicating devices and actuators by colours (IEC 73) .....	74
7.4.1	Indicating devices .....	74
7.4.2	Marking of actuators .....	76
7.4.3	Colours of actuators .....	76
8.	<b>EXTERNAL INFLUENCES EFFECTING ELECTRICAL EQUIPMENT AND INSTALLATION</b> .....	78
8.1.	Climate .....	80
8.2.	Selection and erection of electrical equipment according to external influences .....	83
9.	<b>VERIFICATION OF ELECTRICAL EQUIPMENT AND INSTALLATION</b> .....	84
9.1.	General .....	84
9.2.	Visual inspection .....	84
9.3.	Testing .....	85
9.3.1	Continuity of the protective conductors, including the main and supplementary equipotential bonding .....	85
9.3.2	Insulation resistance of the electrical installation .....	85
9.3.3	Protection by separation of circuits (electrical separation) .....	86
9.3.4	Polarity test .....	86
9.3.5	Automatic disconnection of supply .....	86
9.3.6	Measurement of the resistance of protective conductors .....	88
10.	<b>OPERATION OF ELECTRICAL INSTALLATIONS</b> .....	89
10.1.	Standard operational procedures .....	90

10.2.	Working procedures .....	91
10.3.	Maintenance procedures .....	92
10.4.	Personnel.....	93
11.	ERECTION AND OPERATION OF ELECTRICAL TEST EQUIPMENT .....	94
11.1.	Electrical test equipment .....	94
11.2.	Operational status .....	95
11.3.	Protection against electric shock .....	96
11.3.1	Emergency switching off.....	96
11.3.2	Preventing unauthorised and unintentional switching -on .....	97
11.3.3	Preventing automatic energizing .....	97
11.3.4	Protection against residual voltages and transfer of voltages .....	97
11.4.	Test stations with automatic protection against direct contact .....	97
11.5.	Test stations without automatic protection against direct contact .....	98
11.6.	Test laboratories and experimental stations.....	98
11.7.	Operation of test equipment .....	98
11.7.1	General.....	98
11.7.2	Personnel.....	99
11.8.	Preparation of tests, switching operations in test stations .....	99
11.9.	Test procedure.....	100
11.10.	Electrical work activities in school laboratories.....	101
12.	FIRST AID TREATMENT OF THE ELECTRIC SHOCK .....	103
13.	Vocabulary .....	105
14.	Bibliography .....	109
