<b>Introduction</b>	<b>5</b>
<b>Chapter 1: Manufacturing and Flexible Automation in Metalworking Industries</b>	<b>6</b>
1.1 What is Manufacturing	6
1.2 Manufacturing Plants	6
1.3 Developments of Products	10
1.4 Manufacturing of Products, Hard and Flexible Production Equipment	13
1.5 CIM and Data Integration within Future Manufacturing Plants	16
1.6 Some Terms Used in the Area of Numerical Control and Flexible Automation	19
<b>Chapter 2: Numerically Controlled Machine Tools</b>	<b>23</b>
2.1 What is Numerical Control	23
2.2 Motion Axes of NC Machines	24
2.3 CNC Systems for Control of Movements and Machine Functions	26
2.4 Drives of NC Machines	33
2.5 NC Machines for Basic Operations	35
<b>Chapter 3: Milestones in the Development of NC Machines</b>	<b>38</b>
3.1 Similar Processes Preceding Numerical Control	38
3.2 First NC Machines, Controls and Manufacturing Systems	39
3.3 Impact of High-Speed Cutting Technology on Development of NC machine tools.	41
<b>Chapter 4. Classification of Workpieces, NC Operations and NC Machines</b>	<b>43</b>
4.1 Turning and „Prismatic“ Operations	43
4.2 Group Technology and Classification of Workpieces, NC Operations and NC Machines	45
4.3 Rotary Workpieces - R	49
4.4 Rotary Workpieces with Additional Prismatic Operations - /P	65
4.5 Non-Rotary Workpieces - N	71
4.6 Workpieces with Additional Grinding and Gear Cutting Operations	82
<b>Chapter 5: Design and Configuration of NC Machine Tools.</b>	<b>83</b>
5.1 Metal Cutting Process and Its Influence on the Structure of NC Machine Tools.	83
5.2 Internal Structure of NC Machines	88
5.3 Configuration of Machining Centers	90

<b>Chapter 6: Tool and Part Handling Accessories</b>	<b>93</b>
6.1 Accessories for Handling of Tools	93
6.2 Accessories for Handling of Parts	99
<b>Chapter 7: Accuracy and Quality of NC Machines</b>	<b>109</b>
7.1 Analysis of Main Sources of Errors and Deviations	109
7.2 Position Feedback Measuring Devices	111
7.3 Checking of Accuracy of NC Machines	113
7.4 Quality, Noise, Dynamic Stability and Length of Life	117
7.5 Adaptive Control of Cutting Conditions and Active Control of Workpiece and Tool Dimensions	119
<b>Chapter 8: Operation and Programming of NC Machine Tools</b>	<b>124</b>
8.1 Control Panels and Operation of NC Machines	124
8.2 Manual Programming of NC Machines	127
8.3 CAD - CAM Programming Methods	129
<b>Chapter 9: Impact of High - Speed Cutting Technologies to Further Development of NC Machines</b>	<b>137</b>
9.1 High - Speed Cutting, Hard Cutting and Dry Cutting Technologies	137
9.2 Cutting Processes and the Tool Wear Problem	138
9.3 Cutting Materials for High - Speed, Dry and Hard Machining	138
9.4 Factors Influencing the Design of HSC Machine Tools and Controls	140
<b>Chapter 10: New Components and Subsystems of HSC Machine Tools</b>	<b>143</b>
10.1 High - Speed Spindles with Integrated Motors	143
10.2 Linear Motors and „Intelligent“ Servosystems	145
10.3 Light Frames with Parallel Kinematics - Hexapods	146
10.4 Open Architecture CNC Systems, Process Monitoring, Correction and Diagnosis	147
<b>Chapter 11: NC Machines for Highest Productivity</b>	<b>150</b>
11.1 Machines with „Hanging“ Workpieces	150
11.2 Machines with Alternatively Operating High - Speed Spindles	150
11.3 Five Axis Machines with Rotary and Tilting Tables or Spindles	154
11.4 High - Speed Cutting Machine Tools	154
<b>Conclusion</b>	<b>159</b>
<b>Bibliography</b>	<b>160</b>
<b>List of Figures</b>	<b>161</b>
