

Solutions to the Exercises . . . . .	69
7.1 Chapter 1: Preliminaries . . . . .	169
7.1.1 Continuous and Hölder continuous functions . . . . .	169
7.1.2 $L^p$ spaces . . . . .	170
7.1.3 Sobolev spaces . . . . .	175
7.2 Convex analysis . . . . .	179
7.2.1 Euler-Lagrange equation . . . . .	181
7.2.2 Second form of the Euler-Lagrange equation . . . . .	190
7.2.3 Hamiltonian formulation . . . . .	191
7.2.4 Hamilton-Jacobi equation . . . . .	193
7.3 Direct methods . . . . .	195
7.3.1 Exercises . . . . .	184
7.3.2 The model case: Dirichlet integral . . . . .	184
7.3.3 A general existence theorem . . . . .	190
7.3.4 Duhamel principle . . . . .	191
7.3.5 Exercises . . . . .	195
7.4 Inverse function . . . . .	175
7.4.1 Exercises . . . . .	195
Preface to the English Edition . . . . .	ix
Preface to the French Edition . . . . .	xii
<b>0 Introduction</b> . . . . .	1
0.1 Brief historical comments . . . . .	1
0.2 Model problem and some examples . . . . .	3
0.3 Presentation of the content of the monograph . . . . .	7
<b>1 Preliminaries</b> . . . . .	11
1.1 Introduction . . . . .	11
1.2 Continuous and Hölder continuous functions . . . . .	12
1.2.1 Exercises . . . . .	16
1.3 $L^p$ spaces . . . . .	16
1.3.1 Exercises . . . . .	23
1.4 Sobolev spaces . . . . .	25
1.4.1 Exercises . . . . .	38
1.5 Convex analysis . . . . .	40
1.5.1 Exercises . . . . .	43
<b>2 Classical methods</b> . . . . .	45
2.1 Introduction . . . . .	45
2.2 Euler-Lagrange equation . . . . .	47
2.2.1 Exercises . . . . .	57
2.3 Second form of the Euler-Lagrange equation . . . . .	59
2.3.1 Exercises . . . . .	61
2.4 Hamiltonian formulation . . . . .	61
2.4.1 Exercises . . . . .	68
2.5 Hamilton-Jacobi equation . . . . .	69
2.5.1 Exercises . . . . .	72

2.6 Fields theories . . . . .	72
2.6.1 Exercises . . . . .	77
<b>3 Direct methods</b>	<b>79</b>
3.1 Introduction . . . . .	79
3.2 The model case: Dirichlet integral . . . . .	81
3.2.1 Exercises . . . . .	84
3.3 A general existence theorem . . . . .	84
3.3.1 Exercises . . . . .	91
3.4 Euler-Lagrange equations . . . . .	92
3.4.1 Exercises . . . . .	97
3.5 The vectorial case . . . . .	98
3.5.1 Exercises . . . . .	105
3.6 Relaxation theory . . . . .	107
3.6.1 Exercises . . . . .	110
<b>4 Regularity</b>	<b>111</b>
4.1 Introduction . . . . .	111
4.2 The one dimensional case . . . . .	112
4.2.1 Exercises . . . . .	116
4.3 The model case: Dirichlet integral . . . . .	117
4.3.1 Exercises . . . . .	123
4.4 Some general results . . . . .	124
<b>5 Minimal surfaces</b>	<b>127</b>
5.1 Introduction . . . . .	127
5.2 Generalities about surfaces . . . . .	130
5.2.1 Exercises . . . . .	138
5.3 The Douglas-Courant-Tonelli method . . . . .	139
5.3.1 Exercises . . . . .	145
5.4 Regularity, uniqueness and non uniqueness . . . . .	145
5.5 Nonparametric minimal surfaces . . . . .	146
5.5.1 Exercises . . . . .	151
<b>6 Isoperimetric inequality</b>	<b>153</b>
6.1 Introduction . . . . .	153
6.2 The case of dimension 2 . . . . .	154
6.2.1 Exercises . . . . .	160
6.3 The case of dimension $n$ . . . . .	160
6.3.1 Exercises . . . . .	168

<b>7 Solutions to the Exercises</b>	<b>169</b>
7.1 Chapter 1: Preliminaries . . . . .	169
7.1.1 Continuous and Hölder continuous functions . . . . .	169
7.1.2 $L^p$ spaces . . . . .	170
7.1.3 Sobolev spaces . . . . .	175
7.1.4 Convex analysis . . . . .	179
7.2 Chapter 2: Classical methods . . . . .	184
7.2.1 Euler-Lagrange equation . . . . .	184
7.2.2 Second form of the Euler-Lagrange equation . . . . .	190
7.2.3 Hamiltonian formulation . . . . .	191
7.2.4 Hamilton-Jacobi equation . . . . .	193
7.2.5 Fields theories . . . . .	195
7.3 Chapter 3: Direct methods . . . . .	196
7.3.1 The model case: Dirichlet integral . . . . .	196
7.3.2 A general existence theorem . . . . .	196
7.3.3 Euler-Lagrange equations . . . . .	198
7.3.4 The vectorial case . . . . .	199
7.3.5 Relaxation theory . . . . .	204
7.4 Chapter 4: Regularity . . . . .	205
7.4.1 The one dimensional case . . . . .	205
7.4.2 The model case: Dirichlet integral . . . . .	207
7.5 Chapter 5: Minimal surfaces . . . . .	210
7.5.1 Generalities about surfaces . . . . .	210
7.5.2 The Douglas-Courant-Tonelli method . . . . .	213
7.5.3 Nonparametric minimal surfaces . . . . .	213
7.6 Chapter 6: Isoperimetric inequality . . . . .	214
7.6.1 The case of dimension 2 . . . . .	214
7.6.2 The case of dimension $n$ . . . . .	217
