List of Tables xxi

1 Statistical Terminology 1

1.1 Sufficient Statistics 1

1.2 Properties of Estimators 2

1.3 Principle of Invariance 3

2 Order Statistics 7

2.1 Domain of Nonparametric Statistics 7

2.2 Order Statistics 8

2.3 Distribution Theory of Order Statistics 9

2.3.1 Distribution of Sample Range and Mid Range . . . 15

2.3.2 The Distribution of the Median 16

2.3.3 Sampling Distribution of the Coverages 18

2.4 Moments of Order Statistics 20

2.5 Order Statistics: Discrete Populations 30

2.6 Representation of Exponential Order Statistics as a Sum of Independent Random Variables 34

2.7 Representation of General Order Statistics 38

2.8 Angel and Demons' Problems 39

2.9 Large Sample Properties of Order Statistics 43

2.10 Large Sample Properties of Sample Quantiles 45

2.11 Quasi-ranges 54

2.12 Problems 55

3 Ordered Least Squares Estimators **58**
3.1 Introduction 58
3.2 Explicit Formulae for Estimators 59
3.3 Estimation for Symmetric Populations 62
3.4 Estimation in a Single Parameter Family 63
3.5 Optimum Properties of Ordered Least Squares Estimates . 64
3.6 Examples 68
3.7 Approximations to the Best Linear Estimates 70
3.8 Unbiased Nearly Best Linear Estimates 76
3.9 Nearly Unbiased and Nearly Best Estimates 81
3.10 Inversion of a Useful Matrix 82
3.11 Problems 83

4 Interval Estimation and Tolerance Limits **86**
4.1 Confidence Intervals for Quantiles 86
4.2 Large Sample Confidence Intervals 88
4.2.1 Wilks' (1962) Method 88
4.3 Tolerance Limits 91
4.4 Distribution-free Tolerance Limits 98
4.5 Other Tolerance Limit Problems 101
4.6 Tolerance Regions 102
4.7 Problems 109

5 Nonparametric Estimation **110**
5.1 Problems in Non-parametric Estimation 110
5.2 One-sided Confidence Interval for p 117
5.3 Two-sided Confidence Interval for p 122
5.4 Estimation of Distribution Function 124
5.5 Characterization of Distribution-free Statistics 138
5.6 Completeness of the Order Statistic 143
5.7 Problems 149

6 Estimation of Density Functions **151**
6.1 Introduction 151
6.2 Difference Quotient Estimate 152
6.3 Class of Estimates of Density Function 154
6.4 Estimate with Prior on Ordinates 162
6.5 Problems 167

7 Review of Parametric Testing **168**
7.1 Preliminaries of Hypothesis Testing 168
7.2 Use of Sufficient Statistic 172
7.3 Principle of Invariance 174
7.4 Problems 177

8 Goodness of Fit Tests **179**
8.1 Introduction 179
8.2 Chi Square Test 179
8.3 Kolmogorov-Smirnov (K-S) Test 182
8.4 Cramér-von-Mises Test 187
8.5 Shapiro-Wilk (S-W) Test 189
8.6 General Version of S-W Test 194
8.7 Asymptotic Test Based on Spacings 195
8.8 Sherman's Test 196
8.9 Riedwyl Test 197
8.10 Characterization of Distribution-free Tests 198
8.11 Problems 201

9 Randomness Tests Based on Runs **205**
9.1 Introduction 205
9.2 Total Number of Runs 205
9.3 Length of the Longest Run 212
9.4 Runs Up and Down 221
9.5 Runs of Consecutive Elements 227
9.6 Problems 228

10 Permutation Tests **230**
10.1 Introduction 230
10.2 Bivariate Independence 230
10.3 Two-sample Problems 231
10.4 Critical Regions Having Structures 232
10.5 Most Powerful Permutation Tests 234
10.6 One-sample Problems 237
10.7 Tests in Randomized Blocks 238
10.8 Large-sample Power 242
10.9 Modified Permutation Tests 248
10.10 Problems 253

11 Rank Order Tests **256**
11.1 Introduction 256
11.2 Correlation between Observations and Ranks 256
11.3 Properties of Rank Orders 260
11.4 Lehmann Alternatives 263
11.5 Two-sample Rank Orders 272
11.6 One-sample Rank Orders 278
11.7 c-sample Rank Orders 283
11.8 Locally Most Powerful (LMP) Rank Tests 288
11.9 Problems 289

12 LMP Tests: Two-sample Case **291**
12.1 Introduction 291
12.2 Location Parameter Case 291
12.3 LMP Rank Tests for Scale Changes 294
12.4 Other Tests for Scale Alternatives 297
12.5 Chernoff-Savage (CS) Class of Statistics 304
12.6 Problems 308

13 One-sample Rank Order Tests **310**
13.1 Introduction 310
13.2 LMP Rank Order Test for Location 310
13.3 Cases of Zero Observations 313
13.4 Tests for Randomness 313
13.5 LMP Rank Tests against Trend 314
13.6 One-sample C-S Class of Statistics 317
13.7 Application to Halperin's Statistic 320
13.8 Problems 323

14 Asymptotic Relative Efficiency **325**
14.1 Introduction 325
14.2 Pitman Efficiency 325
14.3 Pitman Efficiency for C-S Class of Statistics 332
14.4 Bahadur Efficiency 334
14.4.1 Bahadur Efficiency: Limiting Case 334
14.4.2 Bahadur Efficiency: General Setup 339
14.5 Problems 345

15 LMP Tests for Independence **346**
15.1 Introduction 346
15.2 LMP Rank Tests 347
15.3 Derivation of the LMP Rank Test 348
15.4 The Variance of the Test Statistic under H_0 352
15.5 Other Rank Tests 353
15.6 Variance of Kendall's Test 355
15.7 Asymptotic Normality of a Class of Tests 360
15.8 Tests for Multi-variate Populations 365
15.9 Problems 366

16 *c*-sample Rank Order Tests **368**
16.1 Introduction 368
16.2 *c*-sample Rank Order Tests 368
16.3 Chernoff-Savage Class of Statistics 374
16.4 The Median Test 378
16.5 *U*-Statistics Approach 381
16.6 Combining Two-sample Test Statistics 382
16.7 Kolmogorov-Smirnov Type of Statistics 384
16.8 Problems 386

17 *c*-sample Tests for Scale **388**
17.1 Introduction 388
17.2 Parametric Procedure 388
17.3 Rank Order Tests 395
17.4 A Class of Nonparametric Tests 397
17.5 Problems 399

18 *c*-sample Tests for Ordered Alternatives **401**
18.1 Introduction 401
18.2 Parametric Test Procedures 401
18.3 Nonparametric Test Procedures 410
18.4 Problems 422

19 Tests in Two-way Layouts **424**
19.1 Introduction 424
19.2 Randomized Block Design 424
19.3 Nonparametric Test Procedures 425
19.4 Nonparametric Tests for Ordered Alternatives 430
19.5 Problems 444

20 Rank Tests for Random Effects **446**
20.1 Introduction 446
20.2 LMP Tests for One-factor Models 448
20.3 Asymptotic Distribution of Logistic Scores Test 452
20.4 Asymptotic Distribution of F-test 461
20.5 Null Distribution and Power Considerations 463
20.6 LMP Tests in Two-way Layouts 464
20.7 LMP Tests in Block Designs 466
20.8 Problems 478

21 Estimation of Contrasts **481**
21.1 Introduction and the Model 481
21.2 Estimation Procedure 482
21.3 Certain Remarks 482
21.4 Contrasts in Two-way Layouts 484
21.5 Hodges-Lehmann Type of Estimator 486
21.6 Problems 487

22 Regression Procedures **490**
22.1 Introduction 490
22.2 Brown-Mood Method 490
22.3 Case of a Single Regression Line 491
22.4 Large Sample Approximation 492
22.5 Theil's Estimator for Slope 495
22.6 Tests for Regression Parameters 495
22.7 Estimates of Regression Coefficients 498
22.8 Estimates Based on Residuals 503
22.9 Problems 506

23 Useful Asymptotic Results **509**
23.1 Introduction 509
23.2 Probability Inequalities 509
23.3 Laws of Large Numbers 512
23.3.1 Weak Law of Large Numbers 512
23.3.2 Strong Law of Large Numbers 512
23.3.3 Convergence of a Function of Variables 512
23.4 Central Limit Theorems 513
23.5 Dependent Random Variables 514
23.6 Chi-Square for Correlated Variables 516
23.7 Projection Approximations 517
23.8 U-Statistics 521

23.9 Problems 523

24 Asymptotic Theory of CS-class of Statistics 527
24.1 Introduction 527
24.2 Formulation of Problem 528
24.3 Regularity Assumptions 529
24.4 Partition of the Statistic 530
24.5 Alternative Form of the First Order Terms 533
24.6 Scores: Expectations of Order Statistics 536
24.7 Extension to c-sample Case 538
24.8 Dependent Samples Case 541
24.9 Results of Hájek, Pyke and Shorack 542
24.10 Asymptotic Equivalence of Procedures 546
24.11 Problems 550

25 CS Class for One Sample Case 553
25.1 Introduction 553
25.2 Regularity Assumptions 554
25.3 Main Theorems 556
25.4 Bounds for Tails and Higher Order Terms 560
25.5 Absolute Normal Scores Test Statistic 562
25.6 Relative Efficiency of Tests for Symmetry 564
25.7 Absolute Normed Scores Test 565
25.8 Application of Halperin's Statistic 568
25.9 c-Sample Case with Random Allocation 571
25.10 Problems 572

26 A Class of Statistics 574
26.1 Introduction 574
26.2 Regularity Assumptions 575
26.3 Statement of Main Results 576
26.4 An Application 579
26.5 Case of Random Sample Size 580
26.6 c-Sample Case 580
26.7 Case of Dependent Samples 582
26.8 Applications 590
26.9 Multivariate Case 594
26.10 Problems 597

27 Systematic Statistics **599**
27.1 Introduction 599
27.2 Regularity Assumptions 600
27.3 Main Results 601
27.4 Random Sample Size 606
27.5 c-Sample Case 606
27.6 Applications 608
27.7 Problems 609

Appendices **611**
Appendix I: Best Estimate of Normal Standard Deviation 611
Appendix II: Confidence Intervals for Median 612
Appendix III: Sample Size for Tolerance Limits 613
Appendix IV: Order Statistics for Tolerance Limits 614
Appendix V: Upper Confidence Bound for $P(Y < X)$ 615
Appendix VI: Confidence Limits for Distribution 616
