

Contents

- 1 **The Role of Statistics in Decision Making 1**
 - 1.1 Introduction 2
 - 1.2 The Role of Statistics in Decision Making 2
 - 1.3 Basic Principles and Concepts of Special Studies 3
 - 1.4 Steps Involved in Planning and Conducting Special Studies 4

- 2 **Organizing and Summarizing Data 8**
 - 2.1 Introduction 9
 - 2.2 Some Basic Vocabulary 11
 - 2.3 Summarizing Data: The Ordered Array 13
 - 2.4 Summarizing Data: The Frequency Distribution 14
 - 2.5 Summarizing Data: The Histogram and Frequency Polygon 19
 - 2.6 Summarizing Data: Stem-and-Leaf Displays 25
 - 2.7 Graphical Representation of Qualitative Data 29
 - 2.8 Summarizing Data: Descriptive Measures 37
 - 2.9 Descriptive Measures Computed from Grouped Data 51
 - 2.10 Index Numbers 61
 - 2.11 Aggregative Price Indexes 66

- 3 **Some Elementary Probability Concepts 85**
 - 3.1 Introduction 86
 - 3.2 Set Concepts and Notation (Basic Notions) 87
 - 3.3 Counting Techniques—Permutations and Combinations 92
 - 3.4 Different Views of Probability 100
 - 3.5 Elementary Properties of Probability 103
 - 3.6 Calculating the Probability of an Event 104
 - 3.7 Bayes' Theorem 114

- 4 **Some Important Probability Distributions 126**
- 4.1 Introduction 127
 - 4.2 Probability Distributions of Discrete Random Variables 127
 - 4.3 The Binomial Distribution 134
 - 4.4 The Poisson Distribution 145
 - 4.5 The Hypergeometric Distribution 150
 - 4.6 Probability Distributions of Continuous Random Variables 157
 - 4.7 The Normal Distribution 161
 - 4.8 The Uniform Distribution 177
- 5 **Some Important Sampling Distributions 190**
- 5.1 Introduction 191
 - 5.2 Simple Random Sampling 191
 - 5.3 Sampling Distributions 194
 - 5.4 Distribution of the Sample Mean 195
 - 5.5 Distribution of the Difference Between Two Sample Means 209
 - 5.6 Distribution of the Sample Proportion 214
 - 5.7 Distribution of the Difference Between Two Sample Proportions 220
- 6 **Statistical Inference I: Estimation 231**
- 6.1 Introduction 232
 - 6.2 Properties of Good Estimators 233
 - 6.3 Estimating the Population Mean—Known Population Variance 238
 - 6.4 Estimating the Population Mean—Unknown Population Variance 247
 - 6.5 Estimating the Difference Between Two Population Means—Known Population Variances 255
 - 6.6 Estimating the Difference Between Two Population Means—Unknown Population Variances 257
 - 6.7 Estimating a Population Proportion 262
 - 6.8 Estimating the Difference Between Two Population Proportions 264
 - 6.9 Determining Sample Size for Estimating Means 266
 - 6.10 Determining Sample Size for Estimating Proportions 270
 - 6.11 Estimating the Variance of a Normally Distributed Population 272
 - 6.12 Estimating the Ratio of the Variances of Two Normally Distributed Populations 276
- 7 **Statistical Inference II: Hypothesis Testing 301**
- 7.1 Introduction 302
 - 7.2 Hypothesis Testing—Some General Considerations 302

	7.3	A Test for the Mean of a Normally Distributed Population—Known Population Variance	313
	7.4	A Test for the Mean of a Normally Distributed Population—Unknown Population Variance	322
	7.5	A Test for the Mean of a Population That Is Not Normally Distributed	330
	7.6	A Test for the Difference Between the Means of Two Normally Distributed Populations	332
	7.7	A Test for the Difference Between the Means of Two Populations Not Normally Distributed	338
	7.8	A Test for a Population Proportion	341
	7.9	A Test for the Difference Between Two Population Proportions	343
	7.10	A Test for the Variance of a Normally Distributed Population	346
	7.11	A Test for the Ratio of the Variances of Two Normally Distributed Populations	348
	7.12	The Type II Error and the Power of a Test	351
	7.13	Determining Sample Size to Control Both Type I and Type II Errors	356
8		Analysis of Variance	384
	8.1	Introduction	385
	8.2	The Completely Randomized Design	386
	8.3	Testing for Significant Differences Between Individual Pairs of Means	399
	8.4	The Randomized Complete Block Design	404
	8.5	The Latin Square Design	411
	8.6	The Factorial Experiment	417
	8.7	Appendix—ANOVA Calculations	428
9		Simple Linear Regression and Correlation	459
	9.1	Introduction	460
	9.2	The Simple Linear Regression Model	461
	9.3	The Assumptions Underlying Simple Linear Regression	462
	9.4	Obtaining the Sample Regression Equation	464
	9.5	Evaluating the Sample Regression Equation	470
	9.6	Using the Sample Regression Equation	486
	9.7	The Linear Correlation Model	491
	9.8	The Correlation Coefficient	494
	9.9	Considerations in Deciding Between Regression and Correlation	499
	9.10	Some Precautions	500
	9.11	Simple Linear Regression Calculations	502

- 10 **Multiple Regression and Correlation 528**
- 10.1 Introduction 529
 - 10.2 The Multiple-Regression Model and Its Underlying Assumptions 529
 - 10.3 Obtaining the Sample Multiple-Regression Equation 530
 - 10.4 Evaluating the Regression Equation 533
 - 10.5 Using the Sample Multiple-Regression Equation 538
 - 10.6 Qualitative Independent Variables 543
 - 10.7 The Multiple-Correlation Model 560
 - 10.8 Choosing Independent Variables for the Regression Equation 564
 - 10.9 Additional Topics 565
 - 10.10 Multiple-Regression Calculations 567
- 11 **The Chi-Square Distribution and the Analysis of Frequencies 602**
- 11.1 Introduction 603
 - 11.2 Mathematical Properties of the Chi-Square Distribution 604
 - 11.3 Tests for Goodness of Fit 605
 - 11.4 Tests of Independence 615
 - 11.5 Tests of Homogeneity 623
- 12 **Nonparametric Statistics 666**
- 12.1 Introduction 667
 - 12.2 When to Use Nonparametric Statistics 667
 - 12.3 Measurement and Measurement Scales 668
 - 12.4 Advantages and Disadvantages of Nonparametric Statistics 669
 - 12.5 The One-Sample Runs Test 670
 - 12.6 The Wilcoxon Signed-Rank Test for Location 674
 - 12.7 The Mann-Whitney Test 677
 - 12.8 The Sign Test 683
 - 12.9 The Kruskal-Wallis One-Way Analysis of Variance by Ranks 689
 - 12.10 The Friedman Two-Way Analysis of Variance by Ranks 693
 - 12.11 The Spearman Rank Correlation Coefficient 697
 - 12.12 Nonparametric Linear Regression 701
- 13 **Time-Series Analysis and Forecasting 712**
- 13.1 Introduction 713
 - 13.2 Components of Time-Series Data 713
 - 13.3 Graphs and Freehand Fitting 715
 - 13.4 Moving Averages 719

- 13.5 Exponential Smoothing 722
- 13.6 Measuring Trend 727
- 13.7 Measuring Seasonal Variation 742
- 13.8 Measuring Cyclical Variation 751
- 13.9 Business Forecasting 759
- 13.10 Measuring Forecast Error and Evaluating Models 777

14 Elementary Survey Sampling 790

- 14.1 Introduction 791
- 14.2 Applications 792
- 14.3 Basic Theory 792
- 14.4 Additional Concepts 793
- 14.5 Steps Involved in a Sample Survey 794
- 14.6 Stratified Random Sampling 796
- 14.7 Cluster Sampling 800
- 14.8 Systematic Sampling 807
- 14.9 Costs, Efficiency, and Sample Size 811
- 14.10 Nonprobability Sampling Procedures 816

15 Statistical Decision Theory 831

- 15.1 Introduction 832
- 15.2 Some Basic Ideas 832
- 15.3 Application of the Bayes Criterion 844
- 15.4 Utility Theory 856
- 15.5 Bayesian Decision Theory and Classical Statistical Inference 860

16 Some Statistical Applications in Quality Control 865

- 16.1 Introduction 866
- 16.2 Control Charts—Variables 867
- 16.3 Control Charts—Attributes 877
- 16.4 Acceptance Sampling for Attributes 884
- 16.5 Acceptance Sampling by Variables 892
