1 In later versions, the order of the chapters "Mexican Archaeology" and "Mexico at a glance" was reversed in the list of contents. It was probably done by accident, as in the main body of text the order of the chapters remained unchanged. In the third version (31.4) two clippings with reproductions of two maps of the world are inserted, one by Ruysch from 1507 and the second by Schöner from 1515 and 1520. The dates are circled by the author and there is a handwritten caption: "400 años de esfuerzo" ["400 years of effort"].
