Preface ix

Acknowledgments xiii

Part I Introduction and Basic Concepts 1

Chapter 1 Foundations of Exercise Psychology 3

- Dualism Versus Monism 4
- Biological Foundations 6
- Cognitive Foundations 7
- Behavioral and Social Foundations 8
- Subdiscipline or a Field of Study? 9
- Contemporary Exercise Psychology 10
- An Overview of Physical Activity and Mental Health 11
- An Overview of Physical Activity Behavior 14
- Summary 15
- Suggested Readings 15
- Web Sites 15

Chapter 2 Basic Concepts in Exercise Psychology 17

- General Concepts 17
- Psychological Constructs 18
- Multidimensional Scales 22
- Covariance Modeling 25
- Defining Physical Activity and Fitness 28
- Measuring Physical Activity 30
- Research Issues 34
- Summary 38
- Suggested Readings 39
- Web Sites 39

Chapter 3 Behavioral Neuroscience

41

- Section 1: The Neural Network 42
- Section 2: Neurotransmitters 53
- Section 3: Brain Cellular and Molecular Biology 58
- Section 4: Animal Behavior Models 63
- Section 5: Measuring Brain Activity 64
- Summary 72
- Suggested Readings 72
- Web Sites 72

Part II Exercise and Mental Health

73

Chapter 4 Stress

75

- Background and Definitions 75
- Does Exercise Reduce Stress? 79
- Physiological Mechanisms of the Stress Response 80
- Contemporary Views: Exercise Research 86
- Summary 89
- Suggested Readings 89
- Web Sites 89

Chapter 5 Affect, Mood, and Emotion

91

- Definitions of Terms 92
- A Short History of Emotion 96
- Contemporary Views of Affect and Emotion 98
- Neuroanatomy of Affect and Emotion 99
- Factors Influencing the Effects of Exercise on Affect 102
- Research on Exercise and Affect 104
- Psychophysiological and Behavioral Assessment of Affect, Mood, and Emotion 107
- Mechanisms 112
- Hazards of Exercise? 113
- Summary 114
- Suggested Readings 114
- Web Sites 114

Chapter 6 Anxiety

115

- Prevalence and Social Impact 115
- Definitions 116
- Types of Common Anxiety Disorders 116
- Effects of Exercise 118
- Mechanisms 124

Summary	129	
Suggested Readings	130	
Web Sites	130	
Chapter 7 Depression		131
Prevalence and Social Impact	131	
Clinical Description	132	
Effects of Exercise	133	
Mechanisms	144	
Summary	152	
Suggested Readings	152	
Web Sites	153	
Chapter 8 Self-Esteem		155
The Self-System	155	
Theories and Models	157	
Factors Influencing Self-Esteem	158	
Measurement	162	
Exercise and Self-Esteem	166	
Mechanisms	171	
Distorted Body Image and Exercise	172	
Summary	174	
Suggested Readings	175	
Web Sites	175	
Chapter 9 Sleep		177
Prevalence and Impact of Sleep Disturbances	177	
Brief History of Sleep Research	178	
Definitions: What Is Sleep?	178	
Measuring Sleep	181	
Research on Exercise and Sleep	181	
Mechanisms	186	
Summary	188	
Suggested Readings	188	
Web Sites	188	
Part III The Psychology of Physical Activity Behavior		189
Chapter 10 Determinants of Exercise and Physical Activity		191
Classification of Determinants	192	
Issues in Research	208	

Summary	209	
Suggested Readings	209	
Web Sites	209	
Chapter 11 Theories of Behavior Change		211
Behaviorism	213	
Cognitive Behaviorism	215	
Social Cognitive Theory	216	
Bandura's Self-Efficacy Theory	218	
Stage Theories	219	
Other Theories Applied to Exercise and Physical Activity	223	
Issues in Application of Theories of Exercise Behavior	225	
Summary	226	
Suggested Readings	227	
Web Sites	227	
Chapter 12 Interventions to Change Physical Activity Behavior		229
Overview	229	
Intervention Context	230	
Specific Strategies	239	
Why Can't We Keep People Active? Mediators and Intervention Effectiveness		251
Summary	253	
Suggested Readings	253	
Web Sites	253	
Chapter 13 Perceived Exertion		255
History	256	
Psychophysics and Perceived Exertion	257	
Comparing People	262	
Signals to Perceived Exertion	265	
The Sensory Nervous System	265	
Physiological Mediators	268	
Psychological and Social-Cultural Influences	273	
Perceived Exertion: The Final Common Pathway	276	
Practical Use of Ratings of Perceived Exertion	277	
Summary	283	
Suggested Readings	283	
Web Sites	284	
Glossary	285	
Bibliography	298	
Index	320	
About the Authors	330
