Preface	vi
<b>Part I Aging: Demographics and Biological Aspects</b>	<b>1</b>
<b><i>Chapter 1 Demographics of Aging</i></b>	<b>3</b>
Definition of the Elderly	3
Interindividual Differences	6
Life Span and Overall Age Distribution	9
Influences of Gender and Inheritance	14
Socioeconomic Influences	16
Physical Activity Patterns	18
Health, Economic, and Social Consequences of an Aging Society	22
Potential Importance of Maintaining an Active Lifestyle	28
Conclusions	29
<b><i>Chapter 2 Current Theories of Aging</i></b>	<b>31</b>
Metaphors of Aging	31
Molecular Changes	42
Microstructural and Cellular Changes	50
Conclusions	56
<b><i>Chapter 3 Impact of Aging on Major Physiological Systems at Rest and During Submaximal and Maximal Exercise</i></b>	<b>57</b>
General Considerations	57
Aging, Body Build, and Body Composition	61
Aging of the Cardiovascular System	85
Aging of the Respiratory System	103
Overall Metabolic Response to Exercise	115
Visceral Functions	117
Aging of the Nervous System	118

Regulation of Homeostasis and Aging of the Endocrine System	129
Aging of the Immune System	135
Conclusions	137
<b>Chapter 4</b> <i>Impact of Regular Physical Activity on Age-Associated Changes in Physiological Systems</i>	<b>139</b>
Body Composition	140
Cardiorespiratory System	152
Muscular Strength and Flexibility	166
Central Nervous System	169
Endocrine System and Metabolism	172
Immune System	176
Risks of Increased Physical Activity in Older People	177
Lessons From Older Athletes	186
Age Limits to Functional Restoration	196
Conclusions	197
<b>Part II Physical Activity and Health in Older People</b>	<b>199</b>
<b>Chapter 5</b> <i>Physical Activity and Diseases of the Cardiorespiratory System</i>	<b>201</b>
Ischemic Heart Disease	201
Stroke	214
Hypertension	218
Peripheral Vascular Disease	222
Congestive Heart Failure	227
End-Stage Renal Disease	232
Chronic Obstructive Lung Disease	234
Conclusions	240
<b>Chapter 6</b> <i>Physical Activity and Musculoskeletal Disease</i>	<b>243</b>
Sarcopenia	243
Specific Muscular Dystrophies	246
Rheumatoid Arthritis	247
Osteoarthritis	250
Osteoporosis	253
Conclusions	261

---

<b>Chapter 7</b>	<b><i>Physical Activity and Metabolic Health</i></b>	<b>263</b>
	Malnutrition	263
	Obesity	268
	Diabetes Mellitus	278
	Hypercholesterolemia and an Adverse Lipid Profile	281
	Cancers	286
	Conclusions	302
<b>Chapter 8</b>	<b><i>Physical Activity, Function, and Well-Being</i></b>	<b>303</b>
	Physical Disability	303
	Quality of Life	310
	Conclusions	324
<b>Part III</b>	<b>Economic and Social Consequences of an Aging Society</b>	<b>325</b>
<b>Chapter 9</b>	<b><i>The Aging Labor Force</i></b>	<b>327</b>
	Labor Force Demographics	327
	Aging and Employment	331
	Personal Productivity and Aging	334
	Enhancing the Productivity of the Older Worker	344
	Conclusions	348
<b>Chapter 10</b>	<b><i>Implications of Aging for Society</i></b>	<b>349</b>
	Job Equity in Hiring, Promotion, and Retirement	349
	Assessment of Job Demands and Worker Performance	360
	Demand for Medical Services and Institutional Support	367
	Costs and Benefits of Greater Physical Activity	370
	Conclusions	375
