

# Table of Contents

<b>Contributors.....</b>	<b>ix</b>
<b>Introduction .....</b>	<b>xvii</b>
<i>The Editors</i>	
<b>Part I: Geoinformation Processing and Modelling .....</b>	<b>1</b>
<b>Earth Observations and Dynamic Mapping: Key Assets for Risk Management .....</b>	<b>3</b>
<i>Alessandro Annoni, Massimo Craglia, Ad de Roo and Jesus San-Miguel</i>	
<b>Spatial Information for Disaster Management Using Examples from Istanbul.....</b>	<b>23</b>
<i>Orhan Altan and Gerhard Kemper</i>	
<b>Rapid Population Maps for Crisis Response.....</b>	<b>39</b>
<i>Gunter Zeug, Olaf Kranz and Sandra Eckert</i>	
<b>Modeling of Spatiotemporal Distribution of Urban Population at High Resolution – Value for Risk Assessment and Emergency Management.....</b>	<b>53</b>
<i>Sérgio Freire</i>	
<b>A Framework for Defining a 3D Model in Support of Risk Management .....</b>	<b>69</b>
<i>Serkan Kemeç, Sisi Zlatanova and H. Sebnem Duzgun</i>	
<b>DB4GeO, a 3D/4D Geodatabase and Its Application for the Analysis of Landslides.....</b>	<b>83</b>
<i>Martin Breunig, Björn Schilberg, Andreas Thomsen, Paul Vincent Kuper, Markus Jahn and Edgar Butwilowski</i>	
<b>GIS Procedure to Forecast and Manage Woodland Fires .....</b>	<b>103</b>
<i>Antonio Condorelli and Giuseppe Mussumeci</i>	
<b>Cartographic Support of Fire Engine Navigation to Operation Site .....</b>	<b>113</b>
<i>Vít Voženilek and Lenka Zajičková</i>	

<b>Strategies for the Automatic Extraction of Water Bodies from TerraSAR-X/TanDEM-X data .....</b>	<b>129</b>
<i>Thomas Hahmann, André Twele, Sandro Martinis and Manfred Buchroithner</i>	
<b>GIS Techniques in the Evaluation of Pipeline Networks Seismic Hazard ...</b>	<b>143</b>
<i>Michele Maugeri, Ernesto Motta, Giuseppe Mussumeci and Erminia Raciti</i>	
<b>Towards a Quick Damage Detection System Based on Grid Computing.....</b>	<b>155</b>
<i>Tuong-Thuy Vu and Masashi Matsuoka</i>	
<b>GMES Services for Conflict Prevention and Mitigation: Supporting the DG RELEX in Mission Planning .....</b>	<b>171</b>
<i>Olaf Kranz, Stefan Lang, Dirk Tiede, Gunter Zeug, Thomas Kemper, Mathilde Caspard and Stephen Clandillon</i>	
<b>Part II: Geo-information Services .....</b>	<b>189</b>
<b>Mobilizing Multi-source Geospatial Information for EW and EM: Maximize Sharing, Enhance Flexibility, and Minimize Costs .....</b>	<b>191</b>
<i>Mark Reichardt and Carl Reed</i>	
<b>Metainformation in Crisis Management Architecture – Theoretical Approaches, INSPIRE Solution.....</b>	<b>209</b>
<i>Tomáš Řezník</i>	
<b>Collaborative Post-disaster Damage Mapping via Geo Web Services.....</b>	<b>221</b>
<i>Laban Maiyo, Norman Kerle and Barend Köbben</i>	
<b>Decision Support for Tsunami Early Warning in Indonesia: The Role of OGC Standards .....</b>	<b>233</b>
<i>Ulrich Raape, Sven Teßmann, Andreas Wytzisk, Tilmann Steinmetz, Monika Wnuk, Manuel Hunold, Christian Strobl, Christoph Stasch, Alexander C. Walkowski, Oliver Meyer and Simon Jirka</i>	
<b>A Service-Based Architecture for the Interoperability of Heterogeneous Sensor data: A Case Study on Early Warning .....</b>	<b>249</b>
<i>Valentina Casola, Luca D’Onofrio, Giusy Di Lorenzo and Nicola Mazzocca</i>	

<b>Development of a Coupled Geoinformation and Simulation System for Early Warning .....</b>	<b>265</b>
<i>Eva Ortlieb, Wolfgang Reinhardt and Franz-Xaver Trauner</i>	
<b>Multi-criteria Evaluation for Emergency Management in Spatial Data Infrastructures .....</b>	<b>273</b>
<i>Matthias Müller, Lars Bernard and Rico Vogel</i>	
<b>Field Tracking Tool: A Collaborative Framework from the Field to the Decision Makers .....</b>	<b>287</b>
<i>Alessandro Annunziato, Simone Gadenz, Daniele A. Galliano, Roberto Guana and Francisco Iguualada</i>	
<b>Practical Experience with a Contextual Map Service .....</b>	<b>305</b>
<i>Jiří Kozel and Radim Štampach</i>	
<b>Part III: Advanced Cartographic Visualisation .....</b>	<b>317</b>
<b>Cartography and Geoinformation for Early Warning and Emergency Management.....</b>	<b>319</b>
<i>David Fraser</i>	
<b>Process Support and Adaptive Geovisualisation in Emergency Management.....</b>	<b>335</b>
<i>Petr Kubíček, Tomáš Ludík, Eva Muličková, Jaroslav Ráček, and Gustav Šafr</i>	
<b>Perceptions of Various Cartographic Representations Under Specific Conditions.....</b>	<b>349</b>
<i>Zdeněk Stachoň, Čeněk Šašinka and Václav Talhofer</i>	
<b>Research of Students' Cartographical Knowledge in Early Warning and Crisis Management.....</b>	<b>361</b>
<i>Temenoujka Bandrova, Milan Konecny and Monika Rusnakova</i>	
<b>Geovisual Analytics Tools for Communicating Emergency and Early Warning .....</b>	<b>379</b>
<i>Mikael Jern, Monica Brezzi and Patrik Lundblad</i>	
<b>Kernel Density Estimations for Visual Analysis of Emergency Response Data .....</b>	<b>395</b>
<i>Jukka M. Krisp and Olga Špatenková</i>	

**Monitoring and Comparing: A Cartographic Web Application  
for Real-time Visualization of Hydrological Data..... 409**  
*Christophe Lienert, Melanie Kunz, Rolf Weingartner and Lorenz Hurni*

**Designing Map Keys for Crisis Management on the Regional  
Operational and Informational Centre Level: Monitoring Transport  
of Dangerous Goods via Contextual Visualisation..... 425**  
*Lucie Friedmannová*

**Index..... 439**
