

Contents

Contents	3
Foreword	4
Determining the Solidus and Liquidus Temperatures in a PbSn System	5
Study of Polypropylene Crystallisation	9
Study of the Electrical Properties of Polymeric Composites.....	11
Temperature Dependence of Ceramic Capacitors	14
Temperature Dependence of Ferrite Permeability	17
Evaluation of Soft Magnetic Materials from Measurement their Static Hysteresis Loops	21
Distribution of Impurities in the Bulk Semiconductor	25
Diffusion in Semiconductor Materials.....	31
Hall Effect Measurement	36
Creep of Metals.....	40
Influence of Strain Hardening on the Mechanical Properties of Metals.....	43
First aid treatment for electrical shock	46
Safety rules for arc welding	46
Literature.....	47
List of used symbols	49
