1	Intr	oduction	1	
1	11	The evidence for intermolecular forces		
	12	Classification of intermolecular forces	4	
	13	Potential energy surfaces	6	
	1.4	Coordinate systems	8	
2	Molecules in Electric Fields			
	2.1	Molecular properties: multipole moments	13	
	2.2	The energy of a molecule in a non-uniform electric field	21	
	2.3	Polarizabilities	24	
	2.4	Hyperpolarizabilities	30	
	2.5	The response to oscillating electric fields	31	
	2.6	Symmetry properties of multipole moments and polarizabilities	34	
	2.7	Change of origin	39	
3	Electrostatic Interactions between Molecules			
	3.1	The electric field of a molecule	43	
	3.2	Multipole expansion in cartesian form	45	
	3.3	Spherical tensor formulation	47	
	3.4	Examples	52	
4	Perturbation Theory of Intermolecular Forces at Long Range			
	4.1	Introduction	57	
	4.2	The induction energy	59	
	4.3	The dispersion energy	64	
5	Ab I	Ab Initio Methods		
	5.1	Introduction	74	
	5.2	Electron correlation	75	
	5.3	Density functional theory	78	
	5.4	Basis sets	79	
	5.5	Calculation of molecular properties	83	
	5.6	The supermolecule method	87	
	5.7	Density functional theory for interaction energies	92	
	5.8	Semi-empirical methods	95	
	5.9	Potential energy surfaces	95	
	5.10	Energy decomposition analysis	96	
6	Perturbation Theory of Intermolecular Forces at Short Range			
	6.1	Introduction	100	
	6.2	Symmetric perturbation methods	106	

x	Contents				
	6.3 Symmetr 6.4 The SAP	ry-adapted perturbation theories T method	110		
7	Distributed M	ultinole Expansions	122		
'	7.1 Converse	ance of the multipole expansion	122		
	7.1 Converge	ad multipole expansions	122		
	7.2 Distribut	ed multipole analysis	123		
	7.4 Other dis	atributed-multipole methods	124		
	7.5 Simplifie	ad distributed multipole descriptions	120		
	7.6 Example	e	130		
	7.7 Symmetr	cy and distributed multipoles	135
