<b>Preface</b>	ix
<b>Contributors</b>	xi
1 Historical development of cytoreductive surgery for ovarian cancer <i>Krishnansu S. Tewari</i>	1
2 Epidemiology, staging, and clinical characteristics <i>Christina S. Chu and Stephen C. Rubin</i>	9
3 Preoperative risk stratification and intraoperative supportive care <i>Giovanni D. Aletti and William A. Cliby</i>	41
4 Surgical instrumentation <i>Simon Butler-Manuel, Mario M. Leitao, and Yukio Sonoda</i>	57
5 Management of early-stage ovarian cancer <i>Koji Matsuo, Anil K. Sood, and David M. Gershenson</i>	67
6 Cytoreductive surgery: Principles and rationale <i>Christine H. Holschneider, Jalid Sehouli, and Beth Y. Karlan</i>	105
7 Cytoreductive surgery: Pelvis and radical oophorectomy <i>Robert E. Bristow and Leo D. Lagasse</i>	153
8 Cytoreductive surgery: Abdominal retroperitoneum and adenopathy <i>Christina Fotopoulou</i>	189
9 Cytoreductive surgery: Intestinal tract and omentum <i>Emmanuel E. Zervos and Mitchel Hoffman</i>	213
10 Cytoreductive surgery: Right upper abdomen—Diaphragm <i>Myong Cheol Lim, Robert E. Bristow, and Sang-Yoon Park</i>	237
11 Cytoreductive surgery: Right upper abdomen—Liver, gallbladder, and porta hepatis <i>Skye C. Mayo and Michael I. D'Angelica</i>	253
12 Cytoreductive surgery: Left upper quadrant <i>Peter G. Rose, Robert E. Bristow, and Robert L. Debernardo</i>	279
13 Regional therapeutics and peritonectomy procedures for ovarian cancer <i>C. William Helm, Robert P. Edwards, and Paul H. Sugarbaker</i>	301
14 Secondary cytoreductive surgery <i>Suk-Joon Chang, Robert E. Bristow, Dennis S. Chi, and Hee-Sug Ryu</i>	329
15 Minimally invasive surgery <i>Ritu Salani, Javier F. Magrina, and Paul M. Magtibay</i>	345
16 Palliative surgery for ovarian cancer <i>Laura J. Havrilesky, Micael Lopez-Acevedo, and Daniel L. Clarke-Pearson</i>	365
17 Postoperative management <i>Renata Urban and Lee-May Chen</i>	387
18 Quality assurance in ovarian cancer surgery <i>Bjørn Hagen and Matthew A. Powell</i>	413
19 Building a multidisciplinary surgical team to optimize patient outcomes <i>Ahmed N. Al-Niaimi, Laurel W. Rice, and Beth Y. Karlan</i>	423
