

	Contents	x
	Chapter 3 Some Results and Applications of Convex Analysis	129
129	Further fundamental results in convex analysis	3.1
130	Convexity and monotonicity properties	3.2
130	Some classes of functions of several variables and differentiability	3.3
188	of convex functions	
189	Well-continuous functions	4.3
203	Uniformly convex and uniformly smooth convex functions	5.3
221	Uniformly convex and uniformly smooth convex functions on bounded sets	6.3
220	Applications to the geometry of Banach spaces	7.3
223	Applications to the best approximation problems	8.3
245	Characterization of convexity in terms of smoothness	9.3
Preface	using the method of perturbation functions in order to obtain bounds for convex minimization problems in different fields.	vii
Introduction		xi
Chapter 1 Preliminary Results on Functional Analysis		1
1.1	Preliminary notions and results	1
1.2	Closedness and interiority notions	9
1.3	Open mapping theorems	19
1.4	Variational principles	29
1.5	Exercises	34
1.6	Bibliographical notes	36
Chapter 2 Convex Analysis in Locally Convex Spaces		39
2.1	Convex functions	39
2.2	Semi-continuity of convex functions	60
2.3	Conjugate functions	75
2.4	The subdifferential of a convex function	79
2.5	The general problem of convex programming	99
2.6	Perturbed problems	106
2.7	The fundamental duality formula	113
2.8	Formulas for conjugates and ϵ -subdifferentials, duality relations and optimality conditions	121
2.9	Convex optimization with constraints	136
2.10	A minimax theorem	143
2.11	Exercises	146
2.12	Bibliographical notes	155

Chapter 3 Some Results and Applications of Convex Analysis in Normed Spaces	159
3.1 Further fundamental results in convex analysis	159
3.2 Convexity and monotonicity of subdifferentials	169
3.3 Some classes of functions of a real variable and differentiability of convex functions	188
3.4 Well conditioned functions	195
3.5 Uniformly convex and uniformly smooth convex functions	203
3.6 Uniformly convex and uniformly smooth convex functions on bounded sets	221
3.7 Applications to the geometry of normed spaces	226
3.8 Applications to the best approximation problem	237
3.9 Characterizations of convexity in terms of smoothness	243
3.10 Weak sharp minima, well-behaved functions and global error bounds for convex inequalities	248
3.11 Monotone multifunctions	269
3.12 Exercises	288
3.13 Bibliographical notes	292
Exercises – Solutions	297
Bibliography	349
Index	359
Symbols and Notations	363
