|--|-----|
| CHAPTER ONE  |     |
| AN OVERVIEW OF TERMINOLOGY                                   |     |
| 1. Social and political aspects                              | 1   |
| 1.1 Origins  | 1   |
| 1.2 Development of the field                                 | 2   |
| 1.3 The evolution of modern terminology                      | 2 5 |
| 2. Scientific and functional aspects                         | 6   |
| 2.1 The theory of terminology                                | 7   |
| 2.2 Terminology, a new practice                              | 9   |
| 2.3 The functions of terminology                             | 10  |
| 2.4 Schools and working methods in terminology               | 12  |
| 3. Organizational aspects                                    | 14  |
| 3.1 Different orientations according to spheres of influence | 15  |
| 3.2 Organization of terminology                              | 20  |
| 3.3 International cooperation                                | 22  |
|  |     |
| CHAPTER TWO  |     |
| TERMINOLOGY, AN INTERDISCIPLINARY FIELD                      |     |
| 1. Terminology and linguistics                               | 25  |
| 1.1 Theoretical linguistics and applied linguistics          | 27  |
| 1.2 Variety of the language system                           | 28  |
| 1.3 Lexicology   | 29  |
| 1.4 Lexicography   | 30  |
| 1.5 Terminology  | 32  |
| 1.6 The specificity of terminology                           | 33  |
| 1.6.1 Terminology and lexicology                             | 34  |
| 1.6.2 Lexicography and terminology                           | 37  |
|  |     |

viii CONTENTS

| 2. Terminology and cognitive science                                | 39  |
|---|-----|
| 2.1 The analysis of terms   | 39  |
| 2.2 Concept formation   | 42  |
| 2.3 The relationships between concepts                              | 44  |
| 2.4 Subject classification  | 44  |
| 3. Terminology and communication                                    | 45  |
| 3.1 Specialized communication                                       | 45  |
| 3.2 Terminology and specialized communication                       | 47  |
| 3.3 Terminology and translation                                     | 47  |
| 3.4 Terminology and language planning                               | 48  |
| 4. Terminology and documentation                                    | 50  |
| 4.1 The relationship between terminology and documentation          | 51  |
| 5. Terminology, computer science and knowledge engineering          | 52  |
| 5.1 Computer science at the service of terminology                  | 53  |
| 5.2 The usefulness of terminology for computer science              | 55  |
| CHAPTER THREE   |     |
| THE FOUNDATIONS OF TERMINOLOGY                                      |     |
| 1. Special languages  | 56  |
| 1.1 Types of discourse  | 57  |
| 1.2 General language and special languages                          | 58  |
| 1.2.1 The concept and scope of special languages                    | 59  |
| 1.2.2 General language and special languages                        | 71  |
| 1.2.3 Variation in special languages                                | 76  |
| 1.3 Special language documents                                      | 78  |
| 1.4 The role of terminology in special language texts and documents | 80  |
| 2. The terminological unit  | 80  |
| 2.1 Terms as systematic units                                       | 81  |
| 2.1.1 The designation   | 82  |
| 2.1.2 Concepts  | 95  |
| 2.1.3 The term-concept relationship                                 | 107 |
| 2.1.4 Function  | 111 |
| 2.2 Terms as pragmatic units  | 112 |
| CHAPTER FOUR  |     |
| TERMINOLOGY IN PRACTICE: TERMINOGRAPHY                              |     |
| 1. The foundations of terminological practice                       | 115 |
| 1.1 Theoretical principles  | 115 |
| 1.2 International standards   | 116 |

| CONTENTS | ix |

|          |    |

| 2. | Materials used in terminography                             | 116 |
|----|---|-----|
|    | 2.1 Reference materials                                     | 117 |
|    | 2.1.1 Documentation on documentation                        | 117 |
|    | 2.1.2 Documentation on the special subject field            | 117 |
|    | 2.1.3 Documentation on terms                                | 118 |
|    | 2.1.4 Documentation on the research method and presentation |     |
|    | of work   | 119 |
|    | 2.2 Specific materials for terminographic work              | 121 |
|    | 2.3 Support materials                                       | 121 |
|    | 2.3.1 Extraction records                                    | 121 |
|    | 2.3.2 Terminological records                                | 123 |
|    | 2.3.3 Correspondence records                                | 127 |
|    | 2.3.4 Query records   | 127 |
| 3. | Working methods   | 129 |
|    | 3.1 Systematic searches                                     | 129 |
|    | 3.1.1 Systematic monolingual searches                       | 130 |
|    | 3.1.2 Systematic multilingual searches                      | 151 |
|    | 3.2 Ad-hoc searches   | 152 |
|    | 3.2.1 The query   | 153 |
|    | 3.2.2 The search  | 155 |
|    | 3.2.3 General process of ad-hoc searches                    | 157 |
| C  | HAPTER FIVE   |     |
| C  | OMPUTERIZED TERMINOLOGY                                     |     |
|    | The concept and scope of computerized terminology           | 161 |
| 2. | Contribution of computer science to terminology             | 162 |
|    | 2.1 Computer science and terminological methodology         | 162 |
|    | 2.2 Computer science and terminological practice            | 164 |
|    | 2.3 Artificial intelligence and terminology                 | 166 |
| 3. | Terminology and data banks                                  | 168 |
|    | 3.1 The creation of a data bank                             | 169 |
|    | 3.2 The organization of the data                            | 171 |
|    | 3.3 Data banks of interest to terminology                   | 172 |
|    | 3.4 The evolution and limitations of data banks             | 173 |
| 4. | Terminological data banks                                   | 175 |
|    | 4.1 Definition  | 176 |
|    | 4.2 Classification  | 178 |

X CONTENTS

| 4.3 The design of a terminological data bank                             | 181 |
|--|-----|
| 4.3.1 Compilation  | 181 |
| 4.3.2 Storage  | 184 |
| 4.3.3 Retrieval  | 186 |
| 4.4 Limitations and problems   | 190 |
| 4.5 The future of terminological data banks                              | 191 |
| CHAPTER SIX  |     |
| TERMINOLOGY AND STANDARDIZATION  |     |
| General standardization  | 194 |
| 1.1 Basic features   | 195 |
| 1.2 Standardization bodies   | 197 |
| 2. Terminological standardization  | 199 |
| 2.1 Standardization of terms   | 199 |
| 2.2 Standardization of principles and methods of terminology             | 201 |
| 2.3 ISO Technical Committee 37   | 201 |
| Terminology and neology  | 203 |
| 3.1 An overview of neology   | 204 |
| 3.2 Neologisms   | 205 |
| 3.3 Linguistic characteristics of neologisms                             | 207 |
| 3.4 Pragmatic and sociolinguistic aspects of neologisms                  | 207 |
| 3.5 Standardization of neologisms  | 209 |
| 3.6 International criteria for creating terms                            | 210 |
| CHAPTER SEVEN  |     |
| PROFESSIONAL TERMINOLOGY: THE ROLE OF TERMINOLOGISTS II LANGUAGE SERVICE | N A |
| Linguistic needs and language planning                                   | 215 |
| 2. Planning and language services  | 216 |
| <ol><li>The technical tasks of language services</li></ol>               | 217 |
| Language services and terminology  | 219 |
| 5. The training of terminologists  | 220 |
| 5.1 Background assumptions   | 221 |
| 5.2 Training in terminology versus training terminologists               | 222 |
