

Contents

Introduction, Basic Notation	5
1 Motivation, Examples	9
2 Crandall–Rabinowitz Bifurcation Theorem	16
3 Local Bifurcation Theorems	31
4 Global Bifurcation Theorems	40
5 Potential Bifurcation Theorems	50
6 Comparison of Previous Results	62
A Implicit Function Theorem	64
B Proof of Morse Lemma	65
C Leray–Schauder Degree Theory	67
D Regularity of Weak Solution	70
E Analogue of L.–S. Index Formula	72
F Contractible Sets	74
G Courant–Weinstein Variational Principle	78
H Asymptotics for C^2 -Functionals	80
Bibliography	81
