

Key Lectures

K-01	Regulation of B Cell Receptor signalling in B cell leukemias: novel mechanisms and therapeutic implications (<i>Marek Mráz</i>)	24
K-02	Drug resistance and drug repurposing in multiple myeloma (<i>Lenka Besse</i>)	26
K-03	Micro and Nanorobots: Autonomous Self-Powered Machines with Size between Viruses and Bacteria (<i>Martin Pumera</i>)	28
K-04	The Biological Upcycling of Metals (<i>Louise Horsfall</i>)	30
K-05	Synthetic Biology and Bauhaus: common concepts? (<i>Jakob Schweizer</i>)	32

Session I

Biomedicine

T-01	Black box of human reproduction – understanding peculiarities of human preimplantation development (<i>Volodymyr Porokh</i>)	36
T-02	Analysis of human oocyte ultrastructure by advanced electron microscopy technologies (<i>Zuzana Trebichalská</i>)	38
T-03	A 3D <i>in vitro</i> model of mammary gland lactation and involution (<i>Jakub Sumbal</i>)	40
T-04	The role of microRNA cluster miR-183 in human retinal organoids (<i>Lucie Pešková</i>)	42
T-05	Inhibition of Caspases in Mouse Osteoblastic Cell Line (<i>Adéla Kratochvílová</i>)	44
T-06	Precise modulation of Wnt pathway during differentiation of human pluripotent stem cells blocks epithelial-mesenchymal transition which significantly improves efficiency of mesoderm formation and endothelial differentiation (<i>Šimon Farkaš</i>)	46

Session II

Biomedicine 2

- T-07** Effects of tyrosine kinase inhibitors combined with novel thiosemicarbazone iron chelators on cell lines derived from pediatric solid tumors (*Mária Krchňáková*) 50
- T-08** Molecular analysis confirmed C926T-*KCNQ1* variant to be pathogenic and the first founder mutation associated with long QT syndrome in Central Europe (*Iva Synková*) 52
- T-09** Effect of intronic mutations on pseudoexon inclusion – a pilot study (*Eliška Svobodová*) 54
- T-10** Composition and Prevalence of Methanogenic archaea during Inflammatory Bowel Diseases (*Martin Černý*) 56
- T-11** Looking at the health of past populations through the lens of human dental calculus (*Eva Chocholová*) 58
- T-12** NACHRDB: solving the puzzle of structure-function relationships in nicotinic acetylcholine receptors (nAChRs) (*Aliaksei Chareshneu*) 60

Session III

Biotechnology

- T-13** Comparative study of plasmids carrying *mcr-1* gene in Gram-negative bacteria from raw meat products (*Alžběta Baráková*) 64
- T-14** Computational Enzyme Design of Haloalkane Dehalogenases for Yperite Degradation (*Jan Mičan*) 66
- T-15** Chemical targeting of voltage sensitive dyes to specific cell types in the brain (*Tomáš Fiala*) 68
- T-16** Use of AFM (atomic force microscopy) methods for bioapplication (*Andrea Tomečková*) 70

T-17	Cryo-EM Structure of Phage P68: From Head to Tail <i>(Dominik Hrebík)</i>	72
-------------	---	-----------

Session IV

Synthetic Biology

T-18	Towards a circular carbon economy – interfacing electrochemistry and (synthetic) microbial metabolism <i>(Nico Claasens)</i>	76
T-19	A sesquiterpene synthase from the endophytic fungus <i>Serendipita indica</i> catalyses formation of viridiflorol <i>(Fani Ntana)</i>	78
T-20	Bacterial transcriptional switch ON/OFF in vitro system using modified nucleobases <i>(Milada Kambová)</i>	80
T-21	CaverDock: A Molecular Docking-Based Tool to Analyse Ligand Transport through Proteins <i>(Ondřej Vávra)</i>	82
T-22	Fully Automated Pipeline for Ancestral Sequence Reconstruction <i>(Rayyan Tariq Khan)</i>	84

Posters

P-01	Targeting Mitochondrial Protein Synthesis by Doxycycline Inhibits the Activity of Mitochondrial Fission-Related Protein DRP1 and Induces Apoptosis in Neuroblastoma <i>(Karolína Bořánková)</i>	88
P-02	Potential modulation of cancer stem cell phenotype in neuroblastoma using retinoids <i>(Lucie Curylová)</i>	90
P-03	Use of polymer prodrugs containing cucurbitacin D for the treatment of experimental tumours <i>(Klára Hrabánková)</i>	92
P-04	The use of CRISPR/Cas9 technology in the study of chronic lymphocytic leukemia <i>(Helena Peschelová)</i>	94

P-05	Microphysiological Cardiac Spheroids in Health and Disease <i>(Ece Ergir)</i>	96
P-06	<i>In vitro</i> model of alveolar-capillary barrier <i>(Michaela Kloučková)</i>	98
P-07	Investigation of a role for chemokines in regulation of mammary epithelial branching morphogenesis <i>(Denisa Belisová)</i>	100
P-08	Fully synthetic surfactant with surfactant protein analogues B and C (CHF5633) for treatment of experimental acute respiratory distress syndrome <i>(Pavol Mikolka)</i>	102
P-09	Properties of P(3HB-co-4HB) produced by <i>Cupriavidus malaysiensis</i> by batch and fed-batch strategy <i>(Hana Dugová)</i>	104
P-10	Potential of technological yeast strains for commercial beta-glucan production using low-cost medium <i>(Lukáš Fidrich)</i>	106
P-11	Targeted genome editing of staphylococcal phage 812 using CRISPR/Cas 10 for phage fluorescent visualization <i>(Jiří Holoubek)</i>	108
P-12	Purification of mammalian RNA polymerase II <i>(Veronika Klápšťová)</i>	110
P-13	Thermophilic Bacteria of the Genus <i>Caldimonas</i> as Polyhydroxyalkanoate Producers <i>(Xenie Kouřilová)</i>	112
P-14	Isolation extremophilic bacteria producing polyhydroxyalkanoate from natural sample <i>(Iva Pernicová)</i>	114
P-15	Causes and consequences of unique amorphous state of native granules of polyhydroxyalkanoates (PHAs) and its transitions into crystalline state <i>(Eva Slaninová)</i>	116
P-16	Comprehensive Modelling Platform <i>(Matej Troják)</i>	118
P-17	Application of evolutionary engineering for enhancement of robustness and producing capacity of selected microbial PHA producers <i>(Ivana Nováčková)</i>	120

P-18	Characteristics of deep aquifer methanogens as key elements in reservoir methanation (<i>Anna Molíková; Nikola Hanišáková</i>)	122
P-19	Transcriptional response to gamma-irradiation in <i>A. thaliana</i> seedlings (<i>Jana Mitchelsová</i>)	124
P-20	Correlative evidence for co-regulation of phosphorus and carbon exchanges with symbiotic fungus in the arbuscular mycorrhizal <i>Medicago truncatula</i> (<i>Jan Konečný</i>)	126
