

# TABLE OF CONTENTS

Program of the meeting . . . . .	7
Introduction (F. E. Viteri) . . . . .	11

## I. SUBMITTED PAPERS:

Public health aspects in assessing energy expenditure in the field (W. Keller) . . . . .	15
Energy allowances for the Philippine population (P. E. de Guzman) . . . . .	23
Energy expenditure as an index of work load in the motorcar industry in Poland (K. Nazar, H. Kirschner, A. Kamiński, R. Starnowski, S. Kozłowski) . . . . .	39
Long-term development of energy consumption in population groups (S. Hejda, K. Ošancová) . . . . .	43
Adaptation of energy metabolism to level of energy intake (N. G. Norgan) . . . . .	56
Physical fitness of Indian and Egyptian workers according to body size and level of nutrition (K. Podlešák) . . . . .	65
Energy expenditure under industrial conditions (H. Frauendorf, W. Gelbrich, G. Köhn-Seyer, W. Wagner) . . . . .	70
Changes in working capacity in obese persons submitted to a moderately restricted diet and intense physical activity regime (L. Balabanski) . . . . .	78
Problems of assessing the energy expenditure of the population in Hungary (E. Morava) . . . . .	82
Energy intake, anthropometric and functional data in various age groups (J. Pařízková) . . . . .	84
Physical activity and inactivity and muscle enzymes of energy supply in man (A. Bass, K. Vondra, J. Teisinger, V. Vítek, E. Macková, Š. Šprynarová) . . . . .	92
The use of indirect energy expenditure measurements for the evaluation of functional and energy demands in Spartakiad compositions (S. Bartůňková, Z. Bartůňek, M. Pauer, J. Heller, P. Vodička) . . . . .	97
Energy expenditure during immersion in a very cold water (J. Novák, V. Zeman) . . . . .	105
Protein catabolism: symptom of both dietary deficiency and excessive intake (V. Brodan, M. Anděl) . . . . .	108
Miniature respirometer for telemetric transmission of the respiratory volume — demonstration (V. Hanusová) . . . . .	112
Prediction of energy expenditure from pulmonary ventilation under field conditions (V. Hanusová, M. Josífk) . . . . .	114

## II. DOCUMENT

Drafting groups . . . . .	120
1) Why and when to measure energy expenditure (J. V. A.G. Durnin) . . . . .	121
2) Methods to be used for the measurement of energy intake (K. Ošancová) . . . . .	124
3) Methods to be used for the measurement of energy expenditure (F. E. Viteri) . . . . .	126
4) Variability of energy expenditure (A. Ferro-Luzzi) . . . . .	128

<b>5) Adaptation to various energy expenditure — with special regard to reduced food intake</b>	
<b>a) individual level (N. G. Norgan)</b> . . . . .	<b>130</b>
<b>b) social level (W. Keller)</b> . . . . .	<b>131</b>
<b>Closing comments (J. Pařízková)</b> . . . . .	<b>133</b>
