1	Review of Probability Theory and an Introduction to Stochastic Processes	1
1.1	Introduction	1
1.2	Brief Review of Probability Theory	2
1.2.1	Basic Probability Concepts	2
1.2.2	Probability Distributions	8
1.2.3	Expectation	11
1.2.4	Multivariate Distributions	15
1.3	Generating Functions	18
1.4	Central Limit Theorem	23
1.5	Introduction to Stochastic Processes	26
1.6	An Introductory Example: A Simple Birth Process	29
1.7	Exercises for Chapter 1	34
1.8	References for Chapter 1	39
1.9	Appendix for Chapter 1	40
1.9.1	Probability Distributions	40
1.9.2	MATLAB® and FORTRAN Programs	41
1.9.3	Interevent Time	42
2	Discrete-Time Markov Chains	45
2.1	Introduction	45
2.2	Definitions and Notation	45
2.3	Classification of States	50
2.4	First Passage Time	56
2.5	Basic Theorems for Markov Chains	60
2.6	Stationary Probability Distribution	67
2.7	Finite Markov Chains	69
2.7.1	Mean First Passage Time	73
2.8	An Example: Genetics Inbreeding Problem	76
2.9	Monte Carlo Simulation	78
2.10	Unrestricted Random Walk in Higher Dimensions	80
2.10.1	Two Dimensions	80
2.10.2	Three Dimensions	81
2.11	Exercises for Chapter 2	83
2.12	References for Chapter 2	92
2.13	Appendix for Chapter 2	94
2.13.1	Proofs of Theorems 2.5 and 2.6	94

2.13.2 Perron and Frobenius Theorems . . . . .	97
2.13.3 The $n$ -Step Transition Matrix . . . . .	98
2.13.4 Genetics Inbreeding Problem . . . . .	102
<b>3 Biological Applications of Discrete-Time Markov Chains</b> . . . . .	<b>105</b>
3.1 Introduction . . . . .	105
3.2 Proliferating Epithelial Cells . . . . .	106
3.3 Restricted Random Walk Models . . . . .	108
3.4 Random Walk with Absorbing Boundaries . . . . .	109
3.4.1 Probability of Absorption . . . . .	111
3.4.2 Expected Time until Absorption . . . . .	114
3.4.3 Probability Distribution for Absorption . . . . .	116
3.5 Random Walk on a Semi-Infinite Domain . . . . .	120
3.6 General Birth and Death Process . . . . .	121
3.6.1 Expected Time to Extinction . . . . .	122
3.7 Logistic Growth Process . . . . .	123
3.8 Quasistationary Probability Distribution . . . . .	127
3.9 SIS Epidemic Model . . . . .	132
3.9.1 Deterministic Model . . . . .	133
3.9.2 Stochastic Model . . . . .	134
3.10 Chain Binomial Epidemic Models . . . . .	137
3.10.1 Greenwood Model . . . . .	138
3.10.2 Reed-Frost Model . . . . .	140
3.10.3 Duration and Size . . . . .	141
3.11 Exercises for Chapter 3 . . . . .	144
3.12 References for Chapter 3 . . . . .	153
3.13 Appendix for Chapter 3 . . . . .	155
3.13.1 MATLAB <sup>®</sup> Programs . . . . .	155
3.13.2 Maple <sup>TM</sup> Program . . . . .	157
<b>4 Discrete-Time Branching Processes</b> . . . . .	<b>159</b>
4.1 Introduction . . . . .	159
4.2 Definitions and Notation . . . . .	160
4.3 Probability Generating Function of $X_n$ . . . . .	161
4.4 Probability of Population Extinction . . . . .	164
4.5 Mean and Variance of $X_n$ . . . . .	173
4.6 Environmental Variation . . . . .	175
4.7 Multitype Branching Processes . . . . .	178
4.7.1 An Example: Age-Structured Model . . . . .	182
4.7.2 Environmental Variation . . . . .	184
4.8 Exercises for Chapter 4 . . . . .	187
4.9 References for Chapter 4 . . . . .	194

<b>5 Continuous-Time Markov Chains</b>	<b>197</b>
5.1 Introduction . . . . .	197
5.2 Definitions and Notation . . . . .	197
5.3 The Poisson Process . . . . .	200
5.4 Generator Matrix $Q$ . . . . .	204
5.5 Embedded Markov Chain and Classification of States . . . . .	207
5.6 Kolmogorov Differential Equations . . . . .	212
5.7 Stationary Probability Distribution . . . . .	214
5.8 Finite Markov Chains . . . . .	216
5.9 Generating Function Technique . . . . .	219
5.10 Interevent Time and Stochastic Realizations . . . . .	221
5.11 Review of Method of Characteristics . . . . .	228
5.12 Exercises for Chapter 5 . . . . .	230
5.13 References for Chapter 5 . . . . .	235
5.14 Appendix for Chapter 5 . . . . .	236
5.14.1 Calculation of the Matrix Exponential . . . . .	236
5.14.2 MATLAB <sup>®</sup> Programs . . . . .	238
<b>6 Continuous-Time Birth and Death Chains</b>	<b>241</b>
6.1 Introduction . . . . .	241
6.2 General Birth and Death Process . . . . .	242
6.3 Stationary Probability Distribution . . . . .	245
6.4 Simple Birth and Death Processes . . . . .	247
6.4.1 Simple Birth . . . . .	247
6.4.2 Simple Death . . . . .	250
6.4.3 Simple Birth and Death . . . . .	251
6.4.4 Simple Birth and Death with Immigration . . . . .	254
6.5 Queueing Process . . . . .	259
6.6 Population Extinction . . . . .	262
6.7 First Passage Time . . . . .	263
6.7.1 Definition and Computation . . . . .	263
6.7.2 Summary of First Passage Time . . . . .	267
6.8 Logistic Growth Process . . . . .	268
6.9 Quasistationary Probability Distribution . . . . .	274
6.10 An Explosive Birth Process . . . . .	276
6.11 Nonhomogeneous Birth and Death Process . . . . .	278
6.12 Exercises for Chapter 6 . . . . .	281
6.13 References for Chapter 6 . . . . .	289
6.14 Appendix for Chapter 6 . . . . .	291
6.14.1 Generating Functions for the Simple Birth and Death Process . . . . .	291
6.14.2 Proofs of Theorems 6.2 and 6.3 . . . . .	292
6.14.3 Comparison Theorem . . . . .	296

<b>7 Biological Applications of Continuous-Time Markov Chains</b>	<b>297</b>
7.1 Introduction . . . . .	297
7.2 Continuous-Time Branching Processes . . . . .	297
7.3 SI and SIS Epidemic Processes . . . . .	303
7.3.1 Stochastic SI Model . . . . .	305
7.3.2 Stochastic SIS Model . . . . .	307
7.4 Multivariate Processes . . . . .	309
7.5 Enzyme Kinetics . . . . .	312
7.5.1 Deterministic Model . . . . .	312
7.5.2 Stochastic Model . . . . .	315
7.6 SIR Epidemic Process . . . . .	319
7.6.1 Deterministic Model . . . . .	319
7.6.2 Stochastic Model . . . . .	320
7.6.3 Final Size . . . . .	322
7.6.4 Duration . . . . .	325
7.7 Competition Process . . . . .	328
7.7.1 Deterministic Model . . . . .	328
7.7.2 Stochastic Model . . . . .	329
7.8 Predator-Prey Process . . . . .	333
7.8.1 Deterministic Model . . . . .	333
7.8.2 Stochastic Model . . . . .	333
7.9 Exercises for Chapter 7 . . . . .	335
7.10 References for Chapter 7 . . . . .	350
7.11 Appendix for Chapter 7 . . . . .	354
7.11.1 MATLAB <sup>®</sup> Programs . . . . .	354
<b>8 Diffusion Processes and Stochastic Differential Equations</b>	<b>359</b>
8.1 Introduction . . . . .	359
8.2 Definitions and Notation . . . . .	360
8.3 Random Walk and Brownian Motion . . . . .	362
8.4 Diffusion Process . . . . .	365
8.5 Kolmogorov Differential Equations . . . . .	366
8.6 Wiener Process . . . . .	372
8.7 Itô Stochastic Integral . . . . .	373
8.8 Itô Stochastic Differential Equation . . . . .	380
8.9 First Passage Time . . . . .	387
8.10 Numerical Methods for SDEs . . . . .	391
8.11 An Example: Drug Kinetics . . . . .	395
8.12 Exercises for Chapter 8 . . . . .	396
8.13 References for Chapter 8 . . . . .	403
8.14 Appendix for Chapter 8 . . . . .	405
8.14.1 Derivation of Kolmogorov Equations . . . . .	405
8.14.2 MATLAB <sup>®</sup> Program . . . . .	406

<b>9 Biological Applications of Stochastic Differential Equations</b>	<b>409</b>
9.1 Introduction . . . . .	409
9.2 Multivariate Processes . . . . .	409
9.3 Derivation of Itô SDEs . . . . .	413
9.4 Scalar Itô SDEs for Populations . . . . .	419
9.4.1 Simple Birth and Death with Immigration . . . . .	419
9.4.2 Logistic Growth . . . . .	421
9.4.3 Quasistationary Density Function . . . . .	423
9.5 Enzyme Kinetics . . . . .	425
9.6 SIR Epidemic Process . . . . .	427
9.7 Competition Process . . . . .	429
9.8 Predator-Prey Process . . . . .	432
9.9 Population Genetics Process . . . . .	434
9.10 Exercises for Chapter 9 . . . . .	437
9.11 References for Chapter 9 . . . . .	443
9.12 Appendix for Chapter 9 . . . . .	446
9.12.1 MATLAB® Programs . . . . .	446
<b>Appendix A: Hints and Solutions to Selected Exercises</b>	<b>449</b>
A.1 Chapter 1 . . . . .	449
A.2 Chapter 2 . . . . .	450
A.3 Chapter 3 . . . . .	451
A.4 Chapter 4 . . . . .	452
A.5 Chapter 5 . . . . .	452
A.6 Chapter 6 . . . . .	453
A.7 Chapter 7 . . . . .	456
A.8 Chapter 8 . . . . .	458
A.9 Chapter 9 . . . . .	459
<b>Index</b>	<b>461</b>
6.1 Mean, variance, and p.g.f. for the simple birth, simple death process, where $X(0) = N$ and $\mu = e^{(\lambda-\mu)t}$ , $\lambda \neq \mu$ . . . . .	256
6.2 Mean, variance, and p.g.f. for the simple birth and death with immigration process, where $X(0) = N$ and $\mu = e^{(\lambda-\mu)t}$ , $\lambda \neq \mu$ . . . . .	256
7.1 Approximate duration ( $T$ ) until infection in the deterministic SIR epidemic model for population size $N$ and contact rate $\beta$ when $I(0) = 1$ . . . . .	304
7.2 Approximate and exact mean durations $E(T_{N,\beta})$ and exact variance $\text{Var}(T_{N,\beta})$ for the time until absorption in the SIR stochastic epidemic model when $I(0) = 1$ and $\beta = 1$ . . . . .	307
7.3 Final size of an SIR epidemic, $R(\infty)$ , when $\gamma = 1$ , $S(0) = N - 1$ , and $I(0) = 1$ . . . . .	320
7.4 Expected final size of a stochastic SIR epidemic when $\gamma = 1$ , $S(0) = N - 1$ , and $I(0) = 1$ . . . . .	325
7.5 Probabilities associated with changes in the chemostat model . . . . .	341
