Pumped storage

14
Pumped storage gets oven ready
Details on the proposed Oven Mountain pumped storage scheme in Australia

16
Largest pumped storage
Spotlight on the world's largest pumped storage projects, including projects currently in development as well as operation

18
Could seasonal storage solve the storage challenge?
Seasonal pumped storage hydropower could fill a much-needed gap in the transition to renewable energy, according to a new study

22
The next generation of pumped storage
An insight into Daybreak Power's plans for new pumped storage plants near the Hoover and Glen Canyon Dams

Repair

24
Testing times at Toddbrook
What lessons should be learnt from the incident at Toddbrook Reservoir last summer?

Small hydro

30
Leaving no one behind
Spotlight on the third edition of the World Small Hydropower Development Report

Civil works

34
On form for flood protection
A passage channel structure is currently being created at a flood-control reservoir in Germany's Black Forest

Operation

35
A complex task
Managing operations on Australia's largest and most complex river system

38
Managing reservoir sedimentation
The International Hydropower Association has developed a new guide to help manage potential impacts and avoid business risks.

40
Dam incident planning
Helping community planners create a plan to respond to dam incidents that take place in, or affect, their communities

42
O&M strategies for hydropower
A new handbook on operations and maintenance has been designed to help enhance the efficiency and reliability of the worldwide hydropower fleet

44
Giving wave energy a boost
The three-year Horizon 2020 funded WaveBoost project has drawn to a close with a step change improvement achieved to the reliability and performance of wave energy technology
