Part I. Neuroscientific Foundations for Rehabilitation

1. ORGANIZATIONAL PLASTICITY IN SENSORIMOTOR AND COGNITIVE NETWORKS 3

SENSORIMOTOR NETWORKS 4

Overview of Motor Control • Cortical Motor Networks • Somatosensory Cortical Networks • Pyramidal Tract Projections • Subcortical Systems • Brain Stem Pathways • Spinal Sensorimotor Activity

STUDIES OF REPRESENTATIONAL PLASTICITY 39

Motor Maps • Sensory Maps

BASIC MECHANISMS OF SYNAPTIC PLASTICITY 44

Hebbian Plasticity • Cortical Ensemble Activity • Long-Term Potentiation and Depression • Molecular Mechanisms • Growth of Dendritic Spines • Neurotrophins • Neuromodulators

COGNITIVE NETWORKS 52

Overview of the Organization of Cognition • Explicit and Implicit Memory Network • Working Memory and Executive Function Network • Emotional Regulatory Network • Spatial Awareness Network • Language Network

SUMMARY 64

2. BIOLOGIC ADAPTATIONS AND NEURAL REPAIR 76

TERMS FOR IMPROVEMENT AFTER INJURY 79

Compensation • Restitution and Substitution • Impairment and Disability

INTRINSIC BIOLOGIC ADAPTATIONS 81

Spontaneous Gains • Activity in Spared Pathways • Sensorimotor Representational Plasticity • Spasticity and the Upper Motor Neuron Syndrome • Synaptogenesis • Denervation Hypersensitivity • Axon Regeneration and Sprouting • Axon Conduction • Growth Factors • Neurogenesis

POTENTIAL MANIPULATIONS FOR NEURAL REPAIR 99

Activity-Dependent Changes at Synapses • Stimulate Axonal Regeneration • Deploy Neurotrophins • Cell Replacement • Pharmacologic Potentiation

MUSCLE PLASTICITY 113

Exercise • Atrophy • Regeneration • Combined Approaches

EXPERIMENTAL INTERVENTIONS FOR REPAIR OF SPINAL CORD INJURY 118

Prevent Cell Death • Increase Axonal Regeneration • Remyelination • Other Transplantation Strategies • Retraining the Spinal Motor Pools

RELEVANCE OF ANIMAL MODELS OF REPAIR TO
CLINICAL TRIALS 129

Eight Potential Pitfalls of Animal Models

SUMMARY 134

3. FUNCTIONAL NEUROIMAGING OF RECOVERY 147

NEUROIMAGING TECHNIQUES 148

Positron Emission Tomography • Single Photon Emission Computerized Tomography •
Functional Magnetic Resonance Imaging • Transcranial Magnetic Stimulation •
Magnetoencephalography • High Resolution Electroencephalography • Intrinsic
Optical Imaging Signals • Near-Infrared Spectroscopy • Magnetic Resonance
Spectroscopy • Transcranial Doppler • Combined Methods

LIMITATIONS OF FUNCTIONAL NEUROIMAGING STUDIES 160

General Limitations • Subtraction Studies • Timing of Studies

METABOLIC IMAGING AT REST AFTER INJURY 163

Stroke • Aphasia • Traumatic Brain Injury • Persistent Vegetative State

ACTIVATION STUDIES: FUNCTIONAL REORGANIZATION
AFTER INJURY 167

Sensorimotor Reorganization After Central Nervous System Lesion • Peripheral
Nerve Transection

TRAINING-INDUCED REORGANIZATION 176

Sensorimotor Training • Aphasia • Cognition • Cross-Modal Plasticity

NEUROPHARMACOLOGIC MODULATION 184

Monaminergic Agents • Other Agents

SUMMARY 185

4. NEUROSTIMULATORS AND NEUROPROSTHESES 193

PERIPHERAL NERVOUS SYSTEM DEVICES 194

Functional Neuromuscular Stimulation • Nerve Cuffs

CENTRAL NERVOUS SYSTEM DEVICES 198

Neuroaugmentation • Spinal Cord Stimulators • Brain-Machine Interfaces •
Sensory Prostheses

ROBOTIC AIDS 203

Upper Extremity • Lower Extremity

TELETHERAPY 206

SUMMARY 206

Part II. Common Practices Across Disorders

5. THE REHABILITATION TEAM 213

THE TEAM APPROACH 213

The Rehabilitation Milieu

PHYSICIANS	215
Responsibilities • Interventions	
NURSES	218
Responsibilities • Interventions	
PHYSICAL THERAPISTS	219
Responsibilities • Interventions for Skilled Action	
OCCUPATIONAL THERAPISTS	231
Responsibilities • Interventions for Personal Independence	
SPEECH AND LANGUAGE THERAPISTS	235
Responsibilities • Interventions for Dysarthria and Aphasia	
NEUROPSYCHOLOGISTS	242
SOCIAL WORKERS	243
RECREATIONAL THERAPISTS	243
OTHER TEAM MEMBERS	244
SUMMARY	244

6. APPROACHES FOR WALKING 250

NORMAL GAIT	250
NEUROLOGIC GAIT DEVIATIONS	252
Hemiparetic Gait • Paraparetic Gait • Gait with Peripheral Neuropathy • Gait with Poliomyelitis	
QUANTITATIVE GAIT ANALYSIS	258
Temporal Measures • Kinematics • Electromyography • Kinetics • Energy Expenditure	
APPROACHES TO RETRAINING AMBULATION	262
Conventional Training • Task-Oriented Training • Assistive Devices	
SUMMARY	268

7. ASSESSMENT AND OUTCOME MEASURES FOR CLINICAL TRIALS 271

PRINCIPLES OF MEASUREMENT	272
Types of Measurements • Reliability and Validity • Choosing Measurement Tools	
MEASURES OF IMPAIRMENT	275
Consciousness • Cognition • Speech and Language • Sensorimotor Impairment Scales	
BEHAVIORAL MEASURES	288
Behavioral Modification • Neurobehavioral Scales	
MEASURES OF DISABILITY	289
Activities of Daily Living • Instrumental Activities of Daily Living • Mixed Functional Scales	

MEASURES OF HEALTH-RELATED QUALITY OF LIFE	298
Instruments • Adjustment Scales • Style Of Questions	
MEASURES OF HANDICAP	302
MEASURES OF COST-EFFECTIVENESS	303
STUDY DESIGNS FOR REHABILITATION RESEARCH	303
Ethical Considerations • Types of Clinical Trials • Confounding Issues in Research Designs • Statistical Analyses	
SUMMARY	314

8. ACUTE AND CHRONIC MEDICAL MANAGEMENT 323

DEEP VEIN THROMBOSIS	323
Prevention	
ORTHOSTATIC HYPOTENSION	324
THE NEUROGENIC BLADDER	325
Pathophysiology • Management	
BOWEL DYSFUNCTION	329
Pathophysiology • Management	
NUTRITION AND DYSPHAGIA	330
Pathophysiology • Assessment • Treatment	
PRESSURE SORES	334
Pathophysiology • Management	
PAIN	336
Acute Pain • Chronic Central Pain • Weakness-Associated Shoulder Pain • Neck, Back, and Myofascial Pain	
DISORDERS OF BONE METABOLISM	348
Heterotopic Ossification • Osteoporosis	
SPASTICITY	348
Management	
CONTRACTURES	357
MOOD DISORDERS	358
Posttraumatic Stress Disorder • Depression	
SLEEP DISORDERS	363
SUMMARY	364

Part III. Rehabilitation of Specific Neurologic Disorders

9. STROKE 375

EPIDEMIOLOGY	375
Fiscal Impact • Stroke Syndromes	

MEDICAL INTERVENTIONS 377

Frequency of Complications • Secondary Prevention of Stroke

INPATIENT REHABILITATION 385

Eligibility for Rehabilitation • Trials of Locus of Treatment • Discharge

OUTPATIENT REHABILITATION 389

Locus of Treatment • Pulse Therapy • Sexual Function • Community Reintegration

OUTCOMES OF IMPAIRMENTS 392

Overview of Outcomes • The Unaffected Limbs • Impairment-Related Functional Outcomes

OUTCOMES OF DISABILITIES 399

Overview of Outcomes • Upper Extremity Use • Ambulation • Predictors of Functional Gains

CLINICAL TRIALS OF FUNCTIONAL INTERVENTIONS 404

Trials of Schools of Therapy • Task-Oriented Approaches • Concentrated Practice • Assistive Trainers • Adjuvant Pharmacotherapy • Functional Electrical Stimulation • Biofeedback • Acupuncture

TRIALS OF INTERVENTIONS FOR APHASIA 420

Rate of Gains • Prognosticators • Results of Interventions • Pharmacotherapy

TRIALS FOR COGNITIVE AND AFFECTIVE DISORDERS 425

Memory Disorders • Visuospatial and Attentional Disorders • Affective Disorders

SUMMARY 436**10. ACUTE AND CHRONIC MYELOPATHIES 451****EPIDEMIOLOGY 451**

Traumatic Spinal Cord Injury • Nontraumatic Disorders

MEDICAL REHABILITATIVE MANAGEMENT 458

Time of Onset to Start of Rehabilitation • Specialty Units • Surgical Interventions • Medical Interventions

SENSORIMOTOR CHANGES AFTER PARTIAL AND COMPLETE INJURY 466

Neurologic Impairment Levels • Evolution of Strength and Sensation • Changes in Patients with Paraplegia • Changes in Patients with Quadriplegia • Mechanisms of Sensorimotor Recovery

FUNCTIONAL OUTCOMES 473

Self-Care Skills • Ambulation

TRIALS OF SPECIFIC INTERVENTIONS 477

Mobility • Strengthening and Conditioning • Upper Extremity Function • Neural Prostheses • Spasticity

LONG-TERM CARE 485

Aging • Sexual Function • Employment • Marital Status • Adjustment and Quality of Life

SUMMARY 489

11. TRAUMATIC BRAIN INJURY 497**EPIDEMIOLOGY 498**

Economic Impact • Prevention

PATHOPHYSIOLOGY 499

Diffuse Axonal Injury • Hypoxic-Ischemic Injury • Focal Injury • Neuroimaging

NEUROMEDICAL COMPLICATIONS 503

Nutrition • Hypothalamic-Pituitary Dysfunction • Pain • Seizures • Delayed-Onset Hydrocephalus • Acquired Movement Disorders • Persistent Vegetative State

ASSESSMENTS AND OUTCOME MEASURES 510

Stages of Recovery • Disability

PREDICTORS OF FUNCTIONAL OUTCOME 513

Level of Consciousness • Duration of Coma and Amnesia • Neuropsychologic Tests • Population Outcomes

LEVELS OF REHABILITATIVE CARE 515

Locus of Rehabilitation • Efficacy of Programs

REHABILITATION INTERVENTIONS AND THEIR EFFICACY 519

Overview of Functional Outcomes • Physical Impairment and Disability • Psychosocial Disability • Cognitive Impairments • Neurobehavioral Disorders • Neuropsychiatric Disorders

SPECIAL POPULATIONS 535

Pediatric Patients • Geriatric Patients • Mild Head Injury

ETHICAL ISSUES 537**SUMMARY 538****12. OTHER CENTRAL AND PERIPHERAL DISORDERS 547****DISORDERS OF THE MOTOR UNIT 548**

Muscle Strengthening • Respiratory Function • Motor Neuron Diseases • Neuropathies • Myopathies

PARKINSON'S DISEASE 557

Interventions

MULTIPLE SCLEROSIS 559

Epidemiology of Disability • Pathophysiology • Rehabilitative Interventions • Clinical Trials

PEDIATRIC DISEASES 565

Cerebral Palsy • Myelomeningocele

BALANCE DISORDERS 567

Frailty and Falls in the Elderly • Vestibular Dysfunction

ALZHEIMER'S DISEASE 570**EPILEPSY 570****CONVERSION DISORDERS WITH NEUROLOGIC SYMPTOMS 570**

CHRONIC FATIGUE SYNDROME 571

ACQUIRED IMMUNODEFICIENCY SYNDROME 571
