Preface.....	xiii
Disclosure and Acknowledgment	xvii
Authors	xix
1. Introduction	1
1.1 Patient-Reported Outcomes in Perspective.....	1
1.2 Patient-Reported Outcomes in Clinical Research	2
1.2.1 Label Claims.....	4
1.2.2 Beyond Label Claims.....	5
1.2.3 Clinical Practice.....	6
1.2.4 Comparative Effectiveness Research	6
1.3 Terms and Definitions.....	7
1.4 Measurement Scales	7
1.4.1 Properties and Types of Scales.....	7
1.4.2 Single-Item and Multi-Item Scales.....	12
1.4.3 Latent Variables and Manifest Variables	12
1.5 Psychometrics versus Clinimetrics	13
1.6 Selection of a PRO Questionnaire.....	14
1.7 Summary	16
References	16
2. Development of a Patient-Reported Outcome	21
2.1 Population	21
2.2 Item Generation.....	22
2.2.1 Patient Interviews and Focus Groups.....	22
2.2.2 Analysis of Qualitative Data	23
2.2.3 Saturation	24
2.3 Item Wording.....	26
2.4 Cognitive Interviews	26
2.5 Summary	27
References	28
3. Validity	31
3.1 Content Validity	31
3.2 Construct Validity.....	36
3.2.1 Convergent Validity and Divergent Validity	37
3.2.2 Known-Groups Validity	39

3.2.3	Criterion Validity	41
3.2.3.1	Concurrent Validity	41
3.2.3.2	Predictive Validity	44
3.3	Simulated Example Using SAS: Convergent and Divergent Validity	45
3.4	Factors Affecting Response	47
3.5	Summary	48
	References	48
4.	Reliability	51
4.1	Intraclass Correlation Coefficient for Continuous Variables	52
4.2	ICC Example	55
4.3	ICC Simulated Example	56
4.4	ICC in Context	58
4.5	Bland and Altman Plot for Continuous Variables.....	60
4.6	Simple Kappa and Weighted Kappa Coefficients for Categorical Variables	62
4.6.1	Simple Kappa for Binary Data	62
4.6.2	Weighted Kappa for Ordinal Data	63
4.7	Internal Consistency Reliability: Cronbach's Alpha Coefficient	66
4.8	Simulated Example of Cronbach's Alpha	69
4.9	Summary	71
	References	71
5.	Exploratory and Confirmatory Factor Analyses	75
5.1	Exploratory Factor Analysis	76
5.1.1	Role of Exploratory Factor Analysis.....	76
5.1.2	EFA Model.....	77
5.1.3	Number of Factors	78
5.1.4	Factor Rotation	79
5.1.5	Sample Size	79
5.1.6	Assumptions.....	80
5.2	Confirmatory Factor Analysis.....	81
5.2.1	Exploratory Factor Analysis versus Confirmatory Factor Analysis	81
5.2.2	Structural and Measurements Models	82
5.2.3	Standard Model versus Nonstandard Model	82
5.2.4	Depicting the Model.....	82
5.2.5	Identifying Residual Terms for Endogenous Variables.....	83
5.2.6	Identifying All Parameters to Be Estimated	84
5.2.7	Assessing Fit between Model and Data	84
5.3	Causal Indicators versus Effect Indicators	85

5.4	Simulated Examples Using SAS: Exploratory Factor Analysis.....	87
5.4.1	Simulated Dataset	87
5.4.2	Implementation	89
5.4.3	Parallel Analysis	92
5.5	Simulated Examples Using SAS: Confirmatory Factor Analysis.....	92
5.5.1	Simulated Dataset	92
5.5.2	Implementation	95
5.5.3	Nonstandard Measurement Model.....	99
5.6	Real-Life Examples	103
5.6.1	Minnesota Nicotine Withdrawal Scale.....	103
5.6.2	Sexual Experience Questionnaire	105
5.6.3	Power of Food Scale.....	109
5.7	Summary.....	114
	References	115
6.	Item Response Theory.....	117
6.1	Classical Test Theory Revisited.....	118
6.1.1	Assumptions.....	118
6.1.2	Item Difficulty, Discrimination, and Weighting	119
6.1.3	CTT and IRT	122
6.2	Assumptions of IRT	122
6.2.1	Unidimensionality	122
6.2.2	Local Independence.....	123
6.2.3	Model Fit	124
6.3	Item Characteristic Curves	124
6.3.1	Dichotomous Response Models	125
6.3.2	Polytomous Response Models	129
6.4	Item Information	132
6.5	Item Fit and Person Fit.....	134
6.5.1	Person-Item Maps	134
6.5.2	Fit Indices	137
6.6	Differential Item Functioning	138
6.7	Sample Size	140
6.8	Example	141
6.9	Example: Rasch Model Implementation.....	143
6.10	Summary.....	146
	References	147
7.	Cross-Sectional Analysis.....	149
7.1	Types of PRO Data and Exploratory Methods.....	149
7.1.1	Types of PRO Data	149
7.1.2	Exploratory Methods and Descriptive Statistics	151
7.1.3	Simulated Examples Using SAS: Q-Q Plot, Probability Plot, and Normality Test	152

7.2	Comparing Two or More Samples	157
7.2.1	Nonparametric Methods	157
7.2.2	Parametric Methods	158
7.2.3	Simulated Examples Using SAS: <i>t</i> -Test	159
7.3	Regression Analysis.....	161
7.3.1	Binary Outcome Variable.....	161
7.3.2	Continuous Outcome Variable.....	167
7.3.3	Advanced Example: Logistic Regression versus Ordinary Linear Regression.....	170
7.4	Summary.....	177
	References	177
8.	Longitudinal Analysis.....	181
8.1	Analytic Considerations.....	182
8.2	Repeated Measures Model.....	182
8.2.1	Repeated Measures with Time as a Categorical Covariate....	183
8.2.2	Implementation of the Repeated Measures Model Using the SAS MIXED Procedure	184
8.2.2.1	Simulated Dataset	184
8.2.2.2	Implementation.....	186
8.2.3	Covariance Structures.....	189
8.2.4	Repeated Measures with Time as a Continuous Covariate	191
8.3	Random Coefficient Model.....	192
8.3.1	Random Intercept–Slope Model	193
8.3.2	Implementation of Random Intercepts and Slopes Model Using SAS MIXED Procedure.....	195
8.3.2.1	Simulated Dataset	195
8.3.2.2	Implementation.....	199
8.4	Real-Life Examples	202
8.4.1	Repeated Measures Model	202
8.4.2	Random Coefficient Model.....	209
8.5	Summary.....	218
	References	218
9.	Mediation Models	221
9.1	Single Mediator Model.....	222
9.1.1	Basics.....	222
9.1.2	Implementation of the Mediation Model Using the SAS MODEL Procedure	224
9.1.2.1	Simulated Dataset	224
9.1.2.2	Implementation.....	227
9.1.3	Example with Multiple Independent Variables.....	230
9.1.3.1	Simulated Dataset	231
9.1.3.2	Implementation.....	232

9.2	Model Invariance	235
9.2.1	Group Invariance	238
9.2.2	Longitudinal Mediation Models and Time Invariance.....	240
9.2.2.1	Simulated Dataset	244
9.2.2.2	Implementation.....	247
9.3	Advanced Example	248
9.3.1	Background.....	248
9.3.2	Mediation Model and Analysis	251
9.4	Bootstrapping Methodology Implementation	252
9.5	Summary	259
	References	259
10.	Missing Data.....	261
10.1	Study Design to Minimize Missing Data	262
10.2	Missing Data Patterns and Mechanisms	264
10.2.1	Missing Completely at Random	264
10.2.2	Missing at Random.....	265
10.2.3	Missing Not at Random	266
10.3	Approaches for Missing Items within Domains or Measures.....	268
10.4	Approaches for Missing Entire Domains or Entire Questionnaires	270
10.4.1	Complete Case Analysis	270
10.4.2	Imputation	271
10.4.3	Maximum Likelihood Methods	272
10.4.4	MNAR Models	272
10.5	Sensitivity Analyses	274
10.6	Simulated Example Using SAS: Pattern Mixture Models	275
10.7	Summary	283
	References	284
11.	Enriching Interpretation	287
11.1	Anchor-Based Approaches	288
11.1.1	Percentages Based on Thresholds.....	288
11.1.2	Simulated Example: Severity Categorization	291
11.1.3	Criterion-Group Interpretation.....	293
11.1.4	Content-Based Interpretation.....	297
11.1.5	Clinically Important Difference	299
11.1.6	Simulated Example: Clinically Important Difference	301
11.2	Distribution-Based Approaches.....	307
11.2.1	Effect Size	309
11.2.2	Probability of Relative Benefit.....	311
11.2.3	Responder Analysis and Cumulative Proportions	312
11.2.4	Simulated Example: CDF Plots	314
11.3	Multiple Testing.....	316

11.4 Summary..... 318
 Acknowledgment..... 318
 References 318
Index..... 323

10.9.4 Histograms and Frequency Distributions 271
 10.9.5 Summary 271
 10.9.6 Exercises 271
 10.8 Missing Data 261
 10.8.1 Missing Data: Why? 261
 10.8.2 Missing Data: How to Handle It? 261
 10.8.3 Missing Data: Deletion 261
 10.8.4 Missing Data: Imputation 261
 10.8.5 Missing Data: Multiple Imputation 261
 10.8.6 Missing Data: Summary 261
 10.8.7 Missing Data: Exercises 261
 10.7 Approaches for Missing Data 251
 10.7.1 Deletion 251
 10.7.2 Imputation 251
 10.7.3 Multiple Imputation 251
 10.7.4 Summary 251
 10.7.5 Exercises 251
 10.6 Central Tendency 241
 10.6.1 Mean 241
 10.6.2 Median 241
 10.6.3 Mode 241
 10.6.4 Summary 241
 10.6.5 Exercises 241
 10.5 Dispersion 231
 10.5.1 Range 231
 10.5.2 Variance 231
 10.5.3 Standard Deviation 231
 10.5.4 Coefficient of Variation 231
 10.5.5 Summary 231
 10.5.6 Exercises 231
 10.4 Skewness and Kurtosis 221
 10.4.1 Skewness 221
 10.4.2 Kurtosis 221
 10.4.3 Summary 221
 10.4.4 Exercises 221
 10.3 Normal Distribution 211
 10.3.1 Properties 211
 10.3.2 Standard Normal Distribution 211
 10.3.3 Normal Distribution: Applications 211
 10.3.4 Summary 211
 10.3.5 Exercises 211
 10.2 Probability 201
 10.2.1 Sample Space 201
 10.2.2 Events 201
 10.2.3 Probability: Axioms 201
 10.2.4 Conditional Probability 201
 10.2.5 Independence 201
 10.2.6 Summary 201
 10.2.7 Exercises 201
 10.1 Descriptive Statistics 191
 10.1.1 Summary 191
 10.1.2 Exercises 191
 9.9.4 Histograms and Frequency Distributions 171
 9.9.5 Summary 171
 9.9.6 Exercises 171
 9.8 Missing Data 161
 9.8.1 Missing Data: Why? 161
 9.8.2 Missing Data: How to Handle It? 161
 9.8.3 Missing Data: Deletion 161
 9.8.4 Missing Data: Imputation 161
 9.8.5 Missing Data: Multiple Imputation 161
 9.8.6 Missing Data: Summary 161
 9.8.7 Missing Data: Exercises 161
 9.7 Approaches for Missing Data 151
 9.7.1 Deletion 151
 9.7.2 Imputation 151
 9.7.3 Multiple Imputation 151
 9.7.4 Summary 151
 9.7.5 Exercises 151
 9.6 Central Tendency 141
 9.6.1 Mean 141
 9.6.2 Median 141
 9.6.3 Mode 141
 9.6.4 Summary 141
 9.6.5 Exercises 141
 9.5 Dispersion 131
 9.5.1 Range 131
 9.5.2 Variance 131
 9.5.3 Standard Deviation 131
 9.5.4 Coefficient of Variation 131
 9.5.5 Summary 131
 9.5.6 Exercises 131
 9.4 Skewness and Kurtosis 121
 9.4.1 Skewness 121
 9.4.2 Kurtosis 121
 9.4.3 Summary 121
 9.4.4 Exercises 121
 9.3 Normal Distribution 111
 9.3.1 Properties 111
 9.3.2 Standard Normal Distribution 111
 9.3.3 Normal Distribution: Applications 111
 9.3.4 Summary 111
 9.3.5 Exercises 111
 9.2 Probability 101
 9.2.1 Sample Space 101
 9.2.2 Events 101
 9.2.3 Probability: Axioms 101
 9.2.4 Conditional Probability 101
 9.2.5 Independence 101
 9.2.6 Summary 101
 9.2.7 Exercises 101
 9.1 Descriptive Statistics 91
 9.1.1 Summary 91
 9.1.2 Exercises 91
 8.9.4 Histograms and Frequency Distributions 71
 8.9.5 Summary 71
 8.9.6 Exercises 71
 8.8 Missing Data 61
 8.8.1 Missing Data: Why? 61
 8.8.2 Missing Data: How to Handle It? 61
 8.8.3 Missing Data: Deletion 61
 8.8.4 Missing Data: Imputation 61
 8.8.5 Missing Data: Multiple Imputation 61
 8.8.6 Missing Data: Summary 61
 8.8.7 Missing Data: Exercises 61
 8.7 Approaches for Missing Data 51
 8.7.1 Deletion 51
 8.7.2 Imputation 51
 8.7.3 Multiple Imputation 51
 8.7.4 Summary 51
 8.7.5 Exercises 51
 8.6 Central Tendency 41
 8.6.1 Mean 41
 8.6.2 Median 41
 8.6.3 Mode 41
 8.6.4 Summary 41
 8.6.5 Exercises 41
 8.5 Dispersion 31
 8.5.1 Range 31
 8.5.2 Variance 31
 8.5.3 Standard Deviation 31
 8.5.4 Coefficient of Variation 31
 8.5.5 Summary 31
 8.5.6 Exercises 31
 8.4 Skewness and Kurtosis 21
 8.4.1 Skewness 21
 8.4.2 Kurtosis 21
 8.4.3 Summary 21
 8.4.4 Exercises 21
 8.3 Normal Distribution 11
 8.3.1 Properties 11
 8.3.2 Standard Normal Distribution 11
 8.3.3 Normal Distribution: Applications 11
 8.3.4 Summary 11
 8.3.5 Exercises 11
 8.2 Probability 1
 8.2.1 Sample Space 1
 8.2.2 Events 1
 8.2.3 Probability: Axioms 1
 8.2.4 Conditional Probability 1
 8.2.5 Independence 1
 8.2.6 Summary 1
 8.2.7 Exercises 1
 8.1 Descriptive Statistics 1
 8.1.1 Summary 1
 8.1.2 Exercises 1
