

# CONTENTS

## **PART 1 Basic Principles**

- 1 Radioactivity and Radionuclides, 1**
- 2 Radiation Detection & Ancillary Instrumentation, 14**
- 3 Single-Photon Emission Computed Tomography, Positron Emission Tomography, and Hybrid Imaging, 28**
- 4 Radiopharmaceuticals, 42**
- 5 Molecular Imaging, 64**

## **PART 2 Clinical Studies**

- 6 The Skeletal System, 75**
- 7 The Pulmonary System, 125**
- 8 Endocrine System, 152**
- 9 Hepatic, Biliary, and Splenic Scintigraphy, 180**

- 10 Gastrointestinal System, 220**
- 11 Urinary Tract, 256**
- 12 Oncology: F-18 Fluorodeoxyglucose Positron Emission Tomography, 288**
- 13 Oncology—Beyond Fluorodeoxyglucose, 339**
- 14 Central Nervous System, 364**
- 15 Inflammation and Infection, 409**
- 16 Cardiovascular System, 441**
- 17 Pearls, Pitfalls, and Frequently Asked Questions, 480**

Appendix 1: Dosimetry, 493

Appendix 2: The Periodic Table of the Elements, 495

Index, 496
