► "It's great to be back – Trams return to Manchester" say the roof boards on Metrolink No 1007, proudly carrying the same fleet number as Manchester's "last" tram (next page). No 1007 is seen here making an early morning call at the High Street tram stop on Monday 27th April 1992, the day it became the first tram to carry fare-paying passengers through Manchester's streets after a 43 year gap. *Author*
