

# Contents

CHAPTER  
**1**

## An Introduction to Animal Behavior 2

### Natural Selection and the Evolution of Behavior 5

- The Cost-Benefit Approach to Behavioral Biology 7
- The Levels of Analysis 8
- The Integrative Study of Animal Behavior 10

### Approaches to Studying Behavior 11

- The Adaptive Basis of Behavior: Mobbing in Gulls 12
- Box 1.1** The benefit of high nest density for the arctic skua 15
- The Science of Animal Behavior 18

CHAPTER  
**2**

## The Integrative Study of Behavior 22

### The Development of Song Learning 24

- Intraspecific Variation and Dialects 25
- Social Experience and Song Development 29

### Mechanisms of Song Learning and the Comparative Approach 38

- Human versus Avian Vocal Learning 39

### Mechanisms of Song Learning 31

- Box 2.1** Song learning in birds adopted by another species 31
- The Genetics of Song Learning 32
- Box 2.2** Proximate mechanisms underlying song preferences in females 33
- Control of the Avian Song System 33

### The Adaptive Value of Song Learning 40

- Adapting to the Local Environment 41
- Recognition: Friends versus Foes 41
- Sexual Selection: Male-Male Competition 45
- Sexual Selection: Female Choice and Assortative Mating 46

### The Evolution of Song Learning 36

- An Evolutionary History of Bird Song 37

### The Integrative Study of Bird Song 51

CHAPTER  
3**The Developmental and  
Genetic Bases of Behavior 54****Behavior Requires Genes  
and the Environment 56**

The Interactive Theory  
of Development 57

Environmental Differences Can  
Cause Behavioral Differences 62

Genetic Differences Can Also Cause  
Behavioral Differences 64

**Box 3.1** Migratory  
restlessness 65

**Learning and Cognition 68**

Learning Requires Both Genes and  
Environment 69

Learning in Complex  
Environments 70

The Adaptive Value of Learning 72

**The Evolutionary Development  
of Behavior 78**

The Evo-Devo Approach to  
Understanding Behavior 78

**Box 3.2** The genetics of foraging  
behavior in honey bees 79

**Early Life Developmental  
Conditions 83**

The Role of the Social  
Environment 84

Developmental Homeostasis versus  
Developmental Constraint 85

Developmental Switch  
Mechanisms 89

Supergenes and Behavioral  
Polymorphisms 94

CHAPTER  
4**The Neural Basis of Behavior 98****Responding to Stimuli 100**

Complex Responses to Simple  
Stimuli 101

How Moths Avoid Bats 104

**Box 4.1** Ultrasound detection  
in the moth ear 108

Ultrasonic Hearing in  
Other Insects 111

**Neural Command and Control 112**

Decision Making in the Brain 112

From Ultrasound to Ultraviolet  
Radiation 114

Selective Relaying of Sensory  
Inputs 118

Responding to Relayed  
Messages 120

The Proximate Basis of Stimulus  
Filtering 123

**Box 4.2** Determining how female  
parasitoid wasps choose their  
singing male bush-cricket  
hosts 126

**Box 4.3** Cortical magnification  
in mammals 129

**The Evolution of Cognitive  
Skills 129**

## CHAPTER

## 5

**The Physiological Basis of Behavior 136****Endogenous Rhythms and Changing Behavioral Priorities 138**

Mechanisms of Changing Behavioral Priorities 138

The Neurobiology of Circadian Timing 141

The Genetics of Circadian Timing 143

The Physiology of Circadian Timing 144

Seasonal and Annual Cycles of Behavior 147

**Cues That Entrain Cycles of Behavior 148**

Predictable Environmental Cues 149

**Box 5.1** Hormonal responses to light in birds 152

Unpredictable Environmental Cues 154

Social Conditions and Changing Priorities 156

**Hormonal Mechanisms Underlying Behavioral Change 157**

Organizational versus Activational Effects of Hormones on Behavior and Development 158

**Box 5.2** Do steroid hormones modulate male parental behavior in California mice? 161

Hormones and Reproduction 162

Testosterone and Reproductive Behavior 164

The Costs of Hormonal Regulation 166

Glucocorticoids and Responding to Environmental Change 169

## CHAPTER

## 6

**Avoiding Predators and Finding Food 174****Avoiding Predators 176**

Social Defenses 176

Game Theory and Social Defenses 180

**Box 6.1** Game theory and the selfish herd 181

Blending In 182

Standing Out 186

Optimality Theory and Antipredator Behavior 191

Polyandry and Indirect Genetic Benefits 348

**Box 10.1** Extra-pair paternity and good genes in birds 351

**Finding Food 193**

Optimality Theory and Foraging Decisions 194

**Box 6.2** Territoriality and feeding behavior in golden-winged sunbirds 195

**Box 6.3** Optimal foraging by pike cichlid fish 197

Criticisms of Optimal Foraging Theory 200

Landscapes of Fear 202

Game Theory and Feeding Behavior 203

CHAPTER  
**7**

**Territoriality and Migration 208**

**Where to Live 210**

- Habitat Selection 210
- Territoriality and Resource-Holding Potential 212
- Why Give Up Quickly When Fighting for a Territory? 218
- The Dear Enemy Effect 223

**To Stay or Go 224**

- Dispersal 224

Migration 227

- The Costs and Benefits of Migration 229

**Box 7.1** Behaviors to reduce the costs of flying during migration 231

- Variation in Migratory Behavior 236

**Box 7.2** Migratory pathways of Swainson's thrush 239

CHAPTER  
**8**

**Principles of Communication 242**

**Communication and Animal Signals 244**

- Information Use and Animal Signals 245

**The Evolution of Animal Signals 248**

- Preexisting Traits and the Development of a Strange Display 250
- The Panda Principle and Preexisting Traits 251
- Preexisting Biases and the Evolution of Animal Signals 255

**Box 8.1** Spiders hunting prey at night 257

- Preexisting Traits versus Preexisting Biases 259

**The Function of Animal Signals 262**

- The Adaptive Function of a Strange Display 263
- Honest Communication and Threat Displays 266
- Honest Signaling 269
- When Multiple Honest Signals Are Better Than One 272
- Deceitful Signaling 274
- Eavesdropping on Others 279

## CHAPTER

## 9

## Reproductive Behavior 286

**Sexual Selection and the Evolution of Sex Differences 289**

Sex Differences in Reproductive Behavior 291

Sex Differences and Parental Investment 292

A Reversal in Sex Differences 293

**Intrasexual Selection and Competition for Mates 296**

Competition and Access to Mates 297

Coexistence of Conditional Mating Tactics 299

Coexistence of Alternative Mating Strategies 303

Sperm Competition 305

Mate Guarding and Paternity Assurance 308

**Intersexual Selection and Mate Choice 311**

Female Mate Choice for Direct Benefits 312

Female Mate Choice for Indirect Benefits 317

**Box 9.1** Sexual selection in the peacock 320

Runaway versus Chase-away Sexual Selection 324

Cryptic Female Choice 326

**Sexual Conflict 327**

The Manipulation of Female Choice 327

Sexual Arms Races 330

## CHAPTER

## 10

## Mating Systems 334

**Monogamy: A Lack of Multiple Mating 337**

Why Be Monogamous? 337

Monogamy in Species with Paternal Care 340

Monogamy When Paternal Care Is Rare 342

**Polyandry: Multiple Mating by Females 344**

Monogamous Males and Polyandrous Females 344

Polyandry and Indirect Genetic Benefits 348

**Box 10.1** Extra-pair paternity and good genes in birds 351

Polyandry and Direct Benefits 357

**Polygyny: Multiple Mating by Males 360**

Female Defense Polygyny 361

Resource Defense Polygyny 363

Lek Polygyny 366

Scramble Competition Polygyny 372

**Polygynandry and Promiscuity: Multiple Mating by Both Sexes 375**

Polygynandry 375

Promiscuity 376

CHAPTER  
**11**

**Parental Care 378**

**Offspring Value and Parental Investment 380**

- Parental Care Decisions 380
- Parental Favoritism in Offspring Care and Production 385
- Parental Favoritism in Humans 387
- Family Conflict 389

**To Care or Not to Care 392**

- The Costs and Benefits of Parental Care 392
- Sexual Conflict and Parental Care: Who Cares? 393

**Box 11.1** Why do females provide all of the care in treehoppers? 396

- Why Do Females Care? 397
- Why Do Males Care? 399

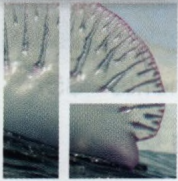

**Box 11.2** Reactions of nest-defending bluegill males to potential egg and fry predators under two conditions 400

**Discriminating Parental Care 405**

- Recognizing One's Own Offspring 405
- Interspecific Brood Parasitism 406
- Choosing the Correct Host 410
- Coevolutionary Arms Races 411
- The Evolution of Interspecific Brood Parasitism 415

CHAPTER  
**12**

**Principles of Social Evolution 420**

**Altruism and the Levels of Selection 423**

- Individual versus Group Selection 424
- Altruism and the Role of Kin Selection 425

**Kin Selection and Inclusive Fitness Theory 427**

- Challenges to Kin Selection and Inclusive Fitness Theory 429

**Box 12.1** Altruism in amoebae 429

- Haplodiploidy and the Evolution of Eusociality 432

- Testing the Haplodiploidy Hypothesis 434

- Inclusive Fitness and Monogamy in Eusocial Insects 435

**Box 12.2** Division of labor in clonal trematode flatworms 437

- Sterility and Caste Differentiation 441

**Social Conflict in Animal Societies 444**

- Reproductive Conflict 444

CHAPTER  
**13****Social Behavior and Sociality 450****The Evolution of Social Behavior 452**

Forms of Social Behavior 453

Mutual Benefit 453

Altruism and Reciprocity 458

Non-cooperative Social Behaviors:

Selfishness and Spite 461

**Individual Differences in Social Behavior 462**

Personalities in Social Species 462

**The Evolution of Cooperative Breeding 463**

Reproductive Cooperation and Kin Selection 465

Reproductive Benefits and Cooperative Breeding 465

**Box 13.1** Mobbing and kinship in groups of Siberian jays 466

Reproductive Costs and Cooperative Breeding 471

**Reproductive Conflict in Cooperative Breeders 474**

Reproductive Suppression 475

Reproductive Skew, Extra-pair Paternity, and Social Structure 477
