

Part 1**Physical Geography****Chapter 1****Water and carbon cycles**

2

1.1 Systems frameworks and their application

2

1.2 The water cycle

4

1.3 The carbon cycle

24

1.4 Water, carbon, climate and life on Earth

40

Chapter 2**Hot desert systems and landscapes**

52

2.1 Introduction to hot desert environments and their margins

52

2.2 Systems and processes in hot desert environments

59

2.3 Arid landscape development in contrasting parts of the world

69

2.4 Desertification

76

2.5 Quantitative and qualitative skills in hot desert environments

81

Chapter 3**Coastal systems and landscapes**

89

3.1 Introduction to coastal systems and landscapes

89

3.2 Systems and processes in coastal environments

91

3.3 Coastal landscape development

103

3.4 Coastal management

116

3.5 Quantitative and qualitative skills in coastal landscapes

125

Chapter 4**Glacial systems and landscapes**

137

4.1 Introduction to glacial systems and landscapes

137

4.2 The nature and distribution of cold environments

138

4.3 Systems and processes in glaciers and glacial landscapes

143

4.4 Human occupation and development

166

Chapter 5**Hazards**

184

5.1 The concept of a hazard in a geographical context

184

5.2 The theory of plate tectonics

189

5.3 Volcanic hazards

193

5.4 Seismic hazards

200

5.5 Tropical cyclone (typhoons, hurricanes) hazards

209

5.6 Fires in nature

217

Chapter 6**Ecosystems under stress**

228

6.1 Ecosystems and processes

229

6.2 Ecosystems and sustainability

250

6.3 Marine ecosystems

257

6.4 Biomes

261

Part 2

Chapter 7

Human Geography

Global systems and global governance

- 7.1 Globalisation
- 7.2 Global systems
- 7.3 International trade and access to markets
- 7.4 Global governance
- 7.5 Global commons
- 7.6 Antarctica and the Southern Ocean
- 7.7 The protection of Antarctica

Chapter 8

Changing places

- 8.1 The nature and importance of places
- 8.2 Changing places: relationships and connections
- 8.3 Changing places: meaning and representation
- 8.4 Representations of place and the use of quantitative and qualitative sources
- 8.5 Place studies

Chapter 9

Contemporary urban environments

- 9.1 Patterns of urbanisation since 1945
- 9.2 Urban forms
- 9.3 Social and economic issues associated with urbanisation
- 9.4 Urban climate
- 9.5 Urban drainage
- 9.6 Urban waste and its disposal
- 9.7 Other contemporary urban environmental issues
- 9.8 Sustainable urban development

Chapter 10

Population and the environment

- 10.1 Introduction – the relationship between population and the environment
- 10.2 Environment and population
- 10.3 Environment, health and well-being
- 10.4 Population change
- 10.5 Principles of population ecology applied to human populations
- 10.6 Global population futures

Chapter 11

Resource security

- 11.1 Resource development
- 11.2 Natural resource issues – Energy
- 11.3 Natural resource issues – Mineral ores
- 11.4 Natural resource issues – Water
- 11.5 Water security
- 11.6 Energy security
- 11.7 Mineral security
- 11.8 Resource futures

Part 3

Chapter 12

Skills and Fieldwork Investigation

Geographical skills and fieldwork

- 12.1 Qualitative skills and quantitative skills
- 12.2 Specific skills
- 12.3 Fieldwork investigation

A-level

Geography

For A-level
and AS

Develop in-depth knowledge and advanced geographical skills using this Student Book from the leading A-level Geography publisher*, fully updated for 2016 with detailed content coverage, fascinating case studies and assessment preparation materials.

Written by subject specialists with examining experience, this book helps you to:

- Learn, understand and revise the content you need to know using clear explanations of every topic and definitions of key terms
- Bring your study of geographical theory and concepts to life with up-to-date examples and case studies for each physical and human topic
- Build your cartographic, graphical and statistical skills through Skills Focus activities for each chapter and a separate skills section at the end of the book
- Reflect on your learning and map your progress with key questions throughout and end-of-chapter review questions
- Approach your exams with confidence by working through a variety of AS and A-level practice questions
- Be inspired by exciting fieldwork project ideas that help you plan and carry out your AS or A-level fieldwork and investigations

Authors

Malcolm Skinner is a former A-level Geography Chief Examiner and Chair of Examiners. He has written and edited many successful A-level Geography textbooks.

Phil Banks is an experienced author and teacher with examining experience. He now works as an educational consultant.

Paul Abbiss, **Helen Fyfe** and **Ian Whittaker** are all experienced Heads of Geography with examining experience at AS and A-level.
