

Brief Contents

- | | |
|--|--|
| 1 Introduction 1 | 10 Forecasting 397 |
| 2 Linear Programming: Basic Concepts 24 | 11 Queueing Models 446 |
| 3 Linear Programming: Formulation and Applications 64 | 12 Computer Simulation: Basic Concepts 499 |
| 4 The Art of Modeling with Spreadsheets 124 | 13 Computer Simulation with Analytic Solver 536 |
| 5 What-If Analysis for Linear Programming 151 | |
| 6 Network Optimization Problems 203 | |
| 7 Using Binary Integer Programming to Deal with Yes-or-No Decisions 243 | |
| 8 Nonlinear Programming 279 | |
| 9 Decision Analysis 334 | |

APPENDIXES

- A** Tips for Using Microsoft Excel for Modeling 606
- B** Partial Answers to Selected Problems 612

INDEX 616

CHAPTERS available at www.mhhe.com/Hillier6e

- | | |
|--|--|
| 14 Solution Concepts for Linear Programming | 18 Inventory Management with Known Demand |
| 15 Transportation and Assignment Problems | 19 Inventory Management with Uncertain Demand |
| 16 PERT/CPM Models for Project Management | 20 Computer Simulation with Crystal Ball |
| 17 Goal Programming | |
