Introduction: why write a book on information ethics? 1

| | |
|--|----|
| What will we cover in this chapter? | 1 |
| Introduction | 1 |
| The tools of data gathering | 2 |
| The tools of data analytics | 4 |
| With great power comes great responsibility | 8 |
| The data-driven dilemma | 9 |
| The innovator's dilemma | 11 |
| Societal value versus individual rights – the root of our own dilemmas | 12 |
| Introducing the rest of the book | 14 |
| Chapter summary | 15 |
| Questions | 15 |
| Further reading | 16 |
| References | 16 |

01 Ethics in the context of information management 19

| | |
|--|----|
| What will we cover in this chapter? | 19 |
| Ethics and the evolution of technology | 20 |
| The evolution of privacy and technology | 24 |
| Other ethical dilemmas | 25 |
| The drive for effective ethics in information management | 30 |
| Chapter summary | 33 |
| Questions | 33 |
| Notes | 34 |
| Further reading | 34 |
| References | 34 |

02 Introduction to ethical concepts and frameworks 36

| | |
|-------------------------------------|----|
| What will we cover in this chapter? | 36 |
| Introduction | 36 |

| | | |
|-----------|---|-----------|
| | Ethical theories you should know about | 39 |
| | Common elements of ethical frameworks | 47 |
| | Chapter summary | 50 |
| | Questions | 50 |
| | Note | 50 |
| | Further reading | 51 |
| | References | 51 |
| 03 | Ethics, privacy and analytics | 53 |
| | What will we cover in this chapter? | 53 |
| | Analytics and data science: an ethical challenge | 54 |
| | What is data analytics? | 55 |
| | The ethical issues in data analytics | 55 |
| | Chapter summary | 75 |
| | Questions | 76 |
| | Notes | 76 |
| | Further reading | 77 |
| | References | 77 |
| 04 | Information ethics and artificial intelligence: concepts and thought experiments | 81 |
| | What will we cover in this chapter? | 81 |
| | Introduction | 82 |
| | Defining AI | 83 |
| | Ethical issues in AI | 84 |
| | Principles for accountable algorithms | 88 |
| | Specific examples of developments | |
| | in AI with ethical impacts | 89 |
| | Who benefits? Justice and human dignity | |
| | in AI development | 91 |
| | What does AI tell us about us? | 92 |
| | Chapter summary | 93 |
| | Questions | 93 |
| | Further reading | 94 |
| | References | 95 |
| 05 | Ethics in the Data Management Body of Knowledge | 97 |
| | What will we cover in this chapter? | 97 |
| | Introducing the DAMA DMBOK | 98 |
| | Data governance | 98 |
| | Data architecture | 105 |

Data modelling 109
Data quality management 112
Data warehousing and business intelligence 116
Data science and 'big data' 119
Chapter summary 123
Questions 124
Notes 124
Further reading 124
References 125

06 Developing an ethical architecture for information management 126

What will we cover in this chapter? 126
Information ethics and architecture – what is the connection? 127
Implementing ethical architecture: common challenges 150
Zachman, ethical architecture and the long-term vision 151
Chapter summary 152
Questions 153
Note 153
Further reading 153
References 153

07 Introducing the Ethical Enterprise Information Management (E2IM) framework 156

What will we cover in this chapter? 156
Building a model for ethical enterprise information management 157
Ethics and big data 177
Conclusion 181
Chapter summary 183
Questions 183
Note 184
Further reading 184
References 184

08 Information ethics as an information quality system 186

What will we cover in this chapter? 186
Ethics as a quality system 187
Applying quality management principles to ethical information management 190

Chapter summary 219
 Questions 219
 Note 220
 Further reading 220
 References 220

09 Information ethics and data governance 223

What will we cover in this chapter? 223
 Introduction 223
 How data governance supports ethics 224
 Principles and modes of governance 226
 Chapter summary 251
 Questions 252
 Note 252
 Further reading 252
 References 253

10 Information ethics and risk: the rise of the Ethical Impact Assessment 255

What will we cover in this chapter? 255
 Introduction 256
 Looking for parallel models 258
 Privacy by Design 259
 Privacy Engineering 260
 The E2IM Ethical Impact Assessment model 263
 Chapter summary 281
 Questions 281
 Note 282
 Further reading 282
 References 283

11 Making the ethical information management change 284

What will we cover in this chapter? 284
 What is change management (and why does it often go wrong)? 285
 The value proposition for ethical information management? 307

| | |
|-----------------|-----|
| Chapter summary | 307 |
| Questions | 308 |
| Further reading | 308 |
| References | 309 |

And in conclusion... 310
