

## TABLE OF CONTENTS

Editorial Preface . . . . .	7
List of Participants . . . . .	11
Opening Addresses	
P. Lukl, President, Czechoslovak Cardiological Society . . . . .	13
J. D. Cottrell, Deputy Director, World Health Organization, Regional Office for Europe . . . . .	15
First Working Session: Is Essential Hypertension a Nosological Entity? How Precise is the Diagnosis? Has it got a Natural History?	
P. Lukl (discussion leader): opening remarks . . . . .	20
Lectures:	
B. Hood: Diagnostic Problems in Hypertension. The Changing Picture of the Disease after a Decade of Active Treatment . . . . .	21
Z. Fejfar and J. Widimský: Juvenile Hypertension . . . . .	33
Sir George Pickering: The Concept of Essential Hypertension as a Quantitative Disease . . . . .	43
General Discussion . . . . .	55
Second Working Session: Epidemiology of Essential Hypertension	
J. N. Morris (discussion leader): opening remarks . . . . .	80
Lectures:	
H. A. Schroeder: Influence of Finished Water Supplies on the Epide- miology of Cardiovascular Disease . . . . .	81
W. E. Miall: The Epidemiology of Essential Hypertension . . . . .	88
General Discussion . . . . .	103
Third Working Session: The Central Nervous System and Essential Hyperten- sion. I.	
Lectures:	
L. E. Hinkle, Jr. and H. G. Wolff: The Role of Emotional and Environmental Factors in Essential Hypertension . . . . .	129
M. Sokolow, B. L. Kalis, R. E. Harris and F. Bennett: Personality and the Predisposition to Essential Hypertension . . . . .	143
A. L. Miasnikov: The Significance of Disturbances of Higher Nervous Activity in the Pathogenesis of Hypertensive Disease . . . . .	153
General Discussion . . . . .	163
Fourth Working Session: The Central Nervous System and Essential Hyperten- sion. II.	
V. N. Chernigovskii (discussion leader): opening remarks . . . . .	190
Lectures:	
A. Zanchetti: Reflex Mechanisms Regulating Hypothalamic Autonomic Activity and Emotional Behaviour. Their Importance in Circu- latory Homeostasis . . . . .	191
P. K. Anokhin: The Physiological Basis of the Pathogenesis of Hypertensive States . . . . .	199
General Discussion . . . . .	223

<b>Fifth Working Session: Haemodynamics in Essential Hypertension.</b>	
E. D. Freis (discussion leader): opening remarks . . . . .	246
Lectures:	
B. Folkow: Haemodynamic Responses to Cortical and Hypothalamic Stimulation . . . . .	247
J. Brod: Haemodynamic Response to Stress and its Bearing on the Haemodynamic Basis of Essential Hypertension . . . . .	256
General Discussion . . . . .	265
<b>Sixth Working Session: Vessel Wall Factors in Essential Hypertension.</b>	
A. C. Corcoran (discussion leader): opening remarks . . . . .	294
Lectures:	
L. H. Peterson: The Mechanical Properties of the Blood Vessels and Hypertension . . . . .	295
S. W. Hoobler: Vascular Reactivity and Essential Hypertension . . . . .	314
General Discussion . . . . .	322
<b>Seventh Working Session: Metabolic Factors in Essential Hypertension. I.</b>	
F. Gross (discussion leader): opening remarks . . . . .	350
Lectures:	
S. Udenfriend: The Implications of Amine Metabolism in Blood Pressure Regulation . . . . .	351
H. Selye and E. Bayusz: Adrenal Cortex in Essential Hypertension, Precirculated text . . . . .	361
Presented text . . . . .	365
General Discussion . . . . .	373
<b>Eighth Working Session: Metabolic Factors in Essential Hypertension. II.</b>	
Lectures:	
C. Wilson: The Kidney and Essential Hypertension . . . . .	405
W. S. Peart: Renal Humoral Factors in Essential Hypertension . . . . .	418
General Discussion . . . . .	430
Summary Report . . . . .	451
Author Index . . . . .	459
Subject Index . . . . .	467
