INDEX	9
FOREWORD	11
PREFACE	13
1 ELECTRICAL CONDUCTION SYSTEM OF THE HEART	15
2 BASIC ELECTROPHYSIOLOGY OF THE HEART	17
3 ELECTROCARDIOGRAM, ELECTROCARDIOGRAM ELECTRODES AND CARDIAC MONITORING	20
4 ELECTRICAL AXIS AND VECTORS OF THE HEART	25
5 COMPONENTS OF THE ELECTROCARDIOGRAM WAVEFORM	31
5.1 P wave – physiological and pathological morphology	31
5.1.1 P mitrale	32
5.1.2 P pulmonale	33
5.2 QRS complex – physiological and pathological morphology	33
5.2.1 QRS complex terminology	34
5.2.2 Electric QRS alternans	36
5.2.3 Low QRS voltage	36
5.2.4 Concordance of QRS complex	37
5.3 T wave – physiological and pathological morphology	37
5.4 U wave – physiological and pathological morphology	39
6. ELECTROCARDIOGRAM INTERVALS AND SEGMENTS	41
6.1 Intervals	41
6.1.1 PR interval	41
6.1.2 RR interval	43
6.1.3 QT interval	44
6.2 Segments	45
6.2.1 TP segment	45
6.2.2 PR segment	46
6.2.3 ST segment	47

7. HEART RHYTHMS	48
7.1 Sinus rhythms	48
7.2 Atrial rhythms	49
7.2.1 Atrial flutter	50
7.2.2 Atrial fibrillation	51
7.3 Junctional rhythms	52
7.4 Ventricular rhythms	53
7.5 Implanted pacemaker rhythms	54
8 PREMATURE COMPLEXES	58
9 SINOATRIAL BLOCKS	62
10 ATRIOVENTRICULAR BLOCKS	64
11 BUNDLE BRANCH AND FASCICULAR BLOCKS	66
11.1 Right bundle branch block	66
11.2 Left bundle branch block	68
11.3 Hemiblocks	69
11.3.1 Left anterior hemiblock	69
11.3.2 Left posterior hemiblock	70
11.4 Bifascicular blocks	71
12 MYOCARDIAL INFARCTION AND ELECTROCARDIOGRAM	73
12.1 ST elevation myocardial infarction (STEMI)	74
12.2 Non-ST elevation myocardial infarction (NSTEMI)	76
12.3 Myocardial infarction, bundle branch block and paced rhythm	77
13 HEART CHAMBER ENLARGEMENT, CARDIOMYOPATHIES AND ELECTROCARDIOGRAM	79
13.1 Dilated cardiomyopathy	79
13.2 Hypertrophic cardiomyopathy	80
13.3 Restrictive cardiomyopathy	81
13.4 Takotsubo cardiomyopathy	81
13.5 Left ventricular hypertrophy calculation by electrocardiogram	82
13.5.1 The Sokolow-Lyon index	82
13.6 Low electric voltage	83
14 ELECTROLYTE IMBALANCE AND ELECTROCARDIOGRAM	84
14.1 Hyperkalemia	84
14.2 Hypokalemia	86
14.3 Hypercalcemia and hypocalcemia	88
14.4 Hypermagnesemia and hypomagnesemia	90

15 DRUG EFFECTS ON ELECTROCARDIOGRAM	92
16 SPECIFIC SYNDROMES AND OTHER CLINICAL FEATURES DIAGNOSED BY ELECTROCARDIOGRAM	96
16.1 The Wolff-Parkinson-White syndrome	96
16.2 Lown-Ganong-Levine syndrome	99
16.3 Mahaim syndrome	100
16.4 Pulmonary embolism	100
16.5 Hypothermia	101
16.6 Raised intracranial pressure	102
16.7 Pericarditis	103
16.8 Benign early repolarization	104
16.9 Chronic cor pulmonale	105
16.10 Sick sinus syndrome	106
16.11 Hyperthyreosis	106
16.12 Wellens syndrome	107
16.13 De Winter's T waves	108
16.14 Electrical alternans	109
16.15 Brugada syndrome	110
16.16 Ashman phenomenon	111
17 ECG INTERPRETATION STEP-BY-STEP	113
17.1 Step One: Determine the rhythm	113
17.2 Step Two: Determine the regularity	113
17.3 Step Three: Determine the rate	114
17.4 Step Four: Determine the electrical axis	115
17.5 Step Five: Analyze the intervals, segments, QRS complex, T wave and U wave	117
18 EXERCISE ECG TESTING	119
18.1. Indications for an exercise ECG test	119
18.2 The relative and absolute contraindications of exercise ECG test	120
18.3 The exercise ECG testing protocol	121
18.4 The interpretation of exercise ECG testing	123
19 VENTRICULAR TACHYCARDIA	124
19.1 Monomorphic ventricular tachycardia	124
19.2 Polymorphic ventricular tachycardia	126
19.3 Torsades de pointes	127
19.4 Long QT syndrome	128
19.5 Congenital short QT syndrome	129
