1	Why Film Photography?	1
1.1	Enjoying the Process	2
1.2	Too Many Options Make You Unhappy.....	5
2	Analog or Digital?	9
2.1	Film Grain.....	10
2.2	Arrangement.....	11
2.3	Sharpness.....	11
2.4	Area.....	12
2.5	Contrast Range.....	13
2.6	Angle of Light	14
2.7	The Bayer Pattern	15
2.8	Banding.....	16
2.9	White Balance vs. Film Type	17
2.10	Further Processing	19
3	Cameras and Film Formats	21
3.1	35mm.....	22
3.1.1	The Film	24
3.1.2	Rangefinder	25
3.1.3	Single-Lens Reflex Camera	27
3.2	Medium Format: 6×6," 6×7," and 6×9"	28
3.2.1	Film Types	30
3.2.2	Image Formats	32
3.3.2	Camera Types.....	34
3.3	Large Format: 4×5"	37
3.3.1	Large Format Cameras.....	39
3.3.2	Film and Film Holders.....	41
3.3.3	Camera Movement	42
3.4	Tips on Buying a Camera	44
3.4.1	Light Seals.....	44
3.4.2	Shutters.....	46
3.4.3	Lenses.....	48

4	Exposure	51
4.1	Stops.....	52
4.2	F-Numbers.....	53
4.3	Light Metering	54
4.3.1	Reflective Metering.....	54
4.3.2	Incident Metering	54
4.4	Without Light Meter	55
4.4.1	Sunny 16.....	56
4.5	With Light Meter	57
4.5.1	Handheld Light Meter	57
4.5.2	Smartphone.....	58
4.5.3	Gray Card	59
4.5.4	Professional Light Meter	59
4.6	Light Metering with the Zone System.....	60
5	Film	65
5.1	Black-and-White Film	68
5.1.1	From Color to Black-and-White.....	68
5.1.2	Orthochromatic Film	70
5.1.3	Panchromatic Film.....	72
5.1.4	Infrared (IR) Film.....	76
5.1.5	Infrared (IR) Film with Aura Effect	78
5.1.6	Color Filters.....	81
5.2	Color Film	83
5.2.1	Color Negative Film.....	84
5.2.2	Slide Film.....	86
5.2.3	Other Types of Film.....	88
5.2.4	WHO MAKES THESE “SPECIAL” FILMS?.....	94
5.3	Instant Film	94
5.4	ISO—The Film Speed	98
6	In the Laboratory	101
6.1	Industrial Laboratory	102
6.2	Professional Laboratory.....	102
6.3	Processing Yourself: Black-and-White	102
6.3.1	Overview: Negative Processing.....	102
6.3.2	Chemicals	103
6.3.3	Hardware.....	118
6.3.4	General Procedure for Film Processing.....	125
6.3.5	Troubleshooting	157
6.3.6	Digital Helpers.....	159
6.3.7	Community.....	163
6.3.8	Push and Pull	164

6.4	Processing Yourself: Color	170
6.4.1	The Press Kit	170
6.4.2	Temperatures	170
6.4.3	Step-by-Step C-41 Developing	170
6.4.4	Step-by-Step E-6 Developing	174
6.4.5	Useful Accessories	175

7 Post-Processing 177

7.1	Traditional	178
7.1.1	The Enlargement—General Principle	178
7.1.2	Equipment for a Black-and-White Laboratory	178
7.1.3	The Right Paper	179
7.1.4	Grades	180
7.1.5	The Contact Print	180
7.2	Hybrid Analog/Digital	181
7.2.1	Scanner Types	181
7.2.2	Scanner Parameters	184
7.2.3	Scanning Software	187
7.2.4	Scanner Profiling	188
7.2.5	Accessories	188
7.2.6	The Scanning Process	191
7.3	Digital Printing	208
7.3.1	Having Photos Printed: By a Discounter	208
7.3.2	Having Photos Printed: At a Professional Lab	209
7.3.3	Printing Photos Yourself	210
7.3.4	High-End Inkjet Prints	211
7.3.5	Profiling	213
7.3.6	Printing Workflow	214
7.4	Historical Processes	216
7.4.1	Cyanotype	216
7.4.2	Albumen Print	220

8 Presentation 225

8.1	Mats	226
8.1.1	It's All About the Right Size	227
8.2	Frames	228
8.3	Mounting Techniques	229
8.3.1	Matting	229
8.3.2	Mounting	230

9	Storage and Archiving	233
9.1	General Considerations.....	234
9.2	Storing Negatives	234
9.3	Prints	236
9.4	A Tidy House, A Tidy Mind	237
10	Fun with “Planned Accidents”	239
10.1	Cameras and Optics.....	240
10.1.1	The Box Camera	240
10.1.2	Diana, Holga, and Other Toy Cameras	243
10.1.3	The Pinhole Camera	245
10.1.4	The Subjektiv.....	249
10.1.5	Zone Plate	249
10.1.6	Lensbaby	249
10.2	Expired Film.....	252
10.2.1	Experimenting is Fun	253
10.2.2	Film Speed and Light Conditions	255
10.2.3	The Special Joys of Cross Processing.....	256
10.2.4	A Residual Risk Always Remains.....	257
10.2.5	Treated Film	257
10.3	Double and Multiple Exposure.....	258
	Appendix	269
A.1	Film, Chemicals, Accessories.....	270
A.2	Apps	271
A.3	Other	271
A.4	Further Reading.....	272
	Index	273
