

# Table of Contents

---

## Preface

1

## Section 1: Getting Started with Network Programming

---

### Chapter 1: Introducing Networks and Protocols

9

#### Technical requirements

9

#### The internet and C

10

#### OSI layer model

11

#### TCP/IP layer model

13

#### Data encapsulation

15

#### Internet Protocol

18

##### What is an address?

18

#### Domain names

21

#### Internet routing

22

##### Local networks and address translation

24

##### Subnetting and CIDR

26

##### Multicast, broadcast, and anycast

27

#### Port numbers

28

#### Clients and servers

29

#### Putting it together

29

#### What's your address?

30

### Listing network adapters from C

33

##### Listing network adapters on Windows

33

##### Listing network adapters on Linux and macOS

38

#### Summary

40

#### Questions

40

### Chapter 2: Getting to Grips with Socket APIs

41

#### Technical requirements

41

#### What are sockets?

42

#### Socket setup

43

#### Two types of sockets

45

#### Socket functions

47

#### Anatomy of a socket program

48

##### TCP program flow

49

##### UDP program flow

51

#### Berkeley sockets versus Winsock sockets

52

##### Header files

53

Socket data type	53
Invalid sockets	53
Closing sockets	54
Error handling	54
<b>Our first program</b>	54
A motivating example	55
Making it networked	56
Working with IPv6	65
Supporting both IPv4 and IPv6	67
Networking with inetd	69
<b>Summary</b>	69
<b>Questions</b>	70
<b>Chapter 3: An In-Depth Overview of TCP Connections</b>	71
<b>Technical requirements</b>	72
<b>Multiplexing TCP connections</b>	73
Polling non-blocking sockets	74
Forking and multithreading	74
The select() function	76
<b>Synchronous multiplexing with select()</b>	76
select() timeout	78
Iterating through an fd_set	79
select() on non-sockets	79
<b>A TCP client</b>	79
TCP client code	81
<b>A TCP server</b>	89
TCP server code	91
Building a chat room	97
<b>Blocking on send()</b>	99
<b>TCP is a stream protocol</b>	100
<b>Summary</b>	101
<b>Questions</b>	102
<b>Chapter 4: Establishing UDP Connections</b>	103
<b>Technical requirements</b>	103
<b>How UDP sockets differ</b>	105
UDP client methods	106
UDP server methods	107
<b>A first UDP client/server</b>	109
A simple UDP server	109
A simple UDP client	113
<b>A UDP server</b>	118
<b>Summary</b>	124
<b>Questions</b>	124

<b>Chapter 5: Hostname Resolution and DNS</b>	125
<b>Technical requirements</b>	125
<b>How hostname resolution works</b>	127
DNS record types	129
DNS security	131
<b>Name/address translation functions</b>	132
Using getaddrinfo()	132
Using getnameinfo()	135
Alternative functions	137
IP lookup example program	138
<b>The DNS protocol</b>	141
DNS message format	142
DNS message header format	142
Question format	144
Answer format	146
Endianness	147
A simple DNS query	147
<b>A DNS query program</b>	148
Printing a DNS message name	148
Printing a DNS message	150
Sending the query	156
<b>Summary</b>	164
<b>Questions</b>	164
<b>Further reading</b>	165

## Section 2: An Overview of Application Layer Protocols

<b>Chapter 6: Building a Simple Web Client</b>	169
<b>Technical requirements</b>	169
<b>The HTTP protocol</b>	171
HTTP request types	172
HTTP request format	173
HTTP response format	174
HTTP response codes	176
Response body length	177
<b>What's in a URL</b>	178
Parsing a URL	179
<b>Implementing a web client</b>	182
<b>HTTP POST requests</b>	193
Encoding form data	193
File uploads	195
<b>Summary</b>	196
<b>Questions</b>	196

<b>Further reading</b>	197
<b>Chapter 7: Building a Simple Web Server</b>	199
<b>Technical requirements</b>	199
<b>The HTTP server</b>	201
The server architecture	202
<b>Content types</b>	203
Returning Content-Type from a filename	204
<b>Creating the server socket</b>	205
<b>Multiple connections buffering</b>	206
get_client()	208
drop_client()	210
get_client_address()	211
wait_on_clients()	211
send_400()	212
send_404()	213
serve_resource()	213
<b>The main loop</b>	218
<b>Security and robustness</b>	224
Open source servers	227
<b>Summary</b>	227
<b>Questions</b>	228
<b>Further reading</b>	228
<b>Chapter 8: Making Your Program Send Email</b>	229
<b>Technical requirements</b>	229
<b>Email servers</b>	231
SMTP security	234
Finding an email server	234
<b>SMTP dialog</b>	238
<b>The format of an email</b>	240
<b>A simple SMTP client program</b>	241
<b>Enhanced emails</b>	252
Email file attachments	254
<b>Spam-blocking pitfalls</b>	255
<b>Summary</b>	257
<b>Questions</b>	257
<b>Further reading</b>	257
<b>Section 3: Understanding Encrypted Protocols and OpenSSL</b>	
<b>Chapter 9: Loading Secure Web Pages with HTTPS and OpenSSL</b>	261
<b>Technical requirements</b>	261
<b>HTTPS overview</b>	263

<b>Encryption basics</b>	gnibesv nenthu	265
Symmetric ciphers	abn3 bns abbO > noit	266
Asymmetric ciphers	efnuceG bna gniholnoM showtM :21 netq	267
How TLS uses ciphers	etnemenuper leasoin	268
<b>The TLS protocol</b>	gnnotinom >howten to easoquc ed	269
Certificates	etnemenuper leasoin	270
Server name identification	gnibesv nenthu	271
<b>OpenSSL</b>	gnibesv nenthu	272
Encrypted sockets with OpenSSL	abn3 bns abbO > noit	273
Certificates	etnemenuper leasoin	276
<b>A simple HTTPS client</b>	gnibesv nenthu	278
<b>Other examples</b>	gnibesv nenthu	285
<b>Summary</b>	gnibesv nenthu	285
<b>Questions</b>	etnemenuper leasoin	286
<b>Further reading</b>	gnibesv nenthu	286
<b>Chapter 10: Implementing a Secure Web Server</b>	bns vtnuea noitciloA	287
<b>Technical requirements</b>	etnemenuper leasoin	287
<b>HTTPS and OpenSSL summary</b>	gnibesv nenthu	290
Certificates	gnibesv nenthu	290
Self-signed certificates with OpenSSL	gnibesv nenthu	292
<b>HTTPS server with OpenSSL</b>	gnibesv nenthu	294
Time server example	gnibesv nenthu	296
A full HTTPS server	gnibesv nenthu	304
<b>HTTPS server challenges</b>	gnibesv nenthu	305
OpenSSL alternatives	gnibesv nenthu	306
Alternatives to TLS	gnibesv nenthu	306
<b>Summary</b>	gnibesv nenthu	307
<b>Questions</b>	gnibesv nenthu	308
<b>Further reading</b>	gnibesv nenthu	308
<b>Chapter 11: Establishing SSH Connections with libssh</b>	gnibesv nenthu	309
<b>Technical requirements</b>	gnibesv nenthu	309
<b>The SSH protocol</b>	gnibesv nenthu	310
<b>libssh</b>	gnibesv nenthu	311
Testing out libssh	gnibesv nenthu	311
Establishing a connection	gnibesv nenthu	312
<b>SSH authentication</b>	gnibesv nenthu	316
Server authentication	gnibesv nenthu	317
Client authentication	gnibesv nenthu	320
<b>Executing a remote command</b>	gnibesv nenthu	322
<b>Downloading a file</b>	gnibesv nenthu	325
<b>Summary</b>	gnibesv nenthu	330
<b>Questions</b>	gnibesv nenthu	330

<b>Further reading</b>	331
<hr/>	
<b>Section 4: Odds and Ends</b>	
<hr/>	
<b>Chapter 12: Network Monitoring and Security</b>	335
<b>Technical requirements</b>	335
<b>The purpose of network monitoring</b>	336
<b>Testing reachability</b>	336
Checking a route	338
How traceroute works	339
Raw sockets	341
<b>Checking local connections</b>	342
<b>Snooping on connections</b>	344
Deep packet inspection	348
Capturing all network traffic	351
<b>Network security</b>	352
Application security and safety	353
<b>Network-testing etiquette</b>	354
<b>Summary</b>	354
<b>Questions</b>	355
<b>Further reading</b>	355
<hr/>	
<b>Chapter 13: Socket Programming Tips and Pitfalls</b>	357
<b>Technical requirements</b>	357
<b>Error handling</b>	359
Obtaining error descriptions	360
<b>TCP socket tips</b>	363
Timeout on connect()	364
TCP flow control and avoiding deadlock	368
Congestion control	371
The Nagle algorithm	373
Delayed acknowledgment	375
Connection tear-down	378
The shutdown() function	380
Preventing address-in-use errors	382
Sending to a disconnected peer	384
<b>Socket's local address</b>	386
<b>Multiplexing with a large number of sockets</b>	387
<b>Summary</b>	388
<b>Questions</b>	389
<hr/>	
<b>Chapter 14: Web Programming for the Internet of Things</b>	391
<b>Technical requirements</b>	391
<b>What is the IoT?</b>	392
<b>Connectivity options</b>	392

Wi-Fi	393
Ethernet	394
Cellular	395
Bluetooth	396
IEEE 802.15.4 WPANs	397
<b>Hardware choices</b>	398
Single-board computers	398
Microcontrollers	400
FPGAs	402
<b>External transceivers and modems</b>	402
<b>IoT protocols</b>	404
<b>Firmware updates</b>	405
<b>Ethics of IoT</b>	406
Privacy and data collection	407
End-of-life planning	407
Security	408
<b>Summary</b>	410
<b>Questions</b>	410
<b>Appendix A: Answers to Questions</b>	411
Chapter 1, Introducing Networks and Protocols	411
Chapter 2, Getting to Grips with Socket APIs	412
Chapter 3, An In-Depth Overview of TCP Connections	414
Chapter 4, Establishing UDP Connections	415
Chapter 5, Hostname Resolution and DNS	416
Chapter 6, Building a Simple Web Client	417
Chapter 7, Building a Simple Web Server	418
Chapter 8, Making Your Program Send Email	419
Chapter 9, Loading Secure Web Pages with HTTPS and OpenSSL	419
Chapter 10, Implementing a Secure Web Server	420
Chapter 11, Establishing SSH Connections with libssh	421
Chapter 12, Network Monitoring and Security	422
Chapter 13, Socket Programming Tips and Pitfalls	422
Chapter 14, Web Programming for the Internet of Things	424
<b>Appendix B: Setting Up Your C Compiler on Windows</b>	425
Installing MinGW GCC	425
Installing Git	432
Installing OpenSSL	433
Installing libssh	434
Alternatives	438
<b>Appendix C: Setting Up Your C Compiler on Linux</b>	439
Installing GCC	439

## Table of Contents

---

<b>Installing Git</b>	440
<b>Installing OpenSSL</b>	440
<b>Installing libssh</b>	440
<b>Appendix D: Setting Up Your C Compiler on macOS</b>	443
<b>Installing Homebrew and the C compiler</b>	443
<b>Installing OpenSSL</b>	445
<b>Installing libssh</b>	447
<b>Appendix E: Example Programs</b>	449
<b>Code license</b>	449
<b>Code included with this book</b>	450
Chapter 1 – Introducing Networks and Protocols	450
Chapter 2 – Getting to Grips with Socket APIs	450
Chapter 3 – An In-Depth Overview of TCP Connections	450
Chapter 4 – Establishing UDP Connections	451
Chapter 5 – Hostname Resolution and DNS	451
Chapter 6 – Building a Simple Web Client	451
Chapter 7 – Building a Simple Web Server	452
Chapter 8 – Making Your Program Send Email	452
Chapter 9 – Loading Secure Web Pages with HTTPS and OpenSSL	452
Chapter 10 – Implementing a Secure Web Server	452
Chapter 11 – Establishing SSH Connections with libssh	453
Chapter 12 – Network Monitoring and Security	453
Chapter 13 – Socket Programming Tips and Pitfalls	453
Chapter 14 – Web Programming for the Internet of Things	454
<b>Other Book You May Enjoy</b>	455
<b>Index</b>	457
