|--------------------------------------------------------------------|----|
| INTRODUCTION ( <i>Jitka Mlíková Seidlerová</i> ) .....             | 15 |
| <b>1 MEDICAL HISTORY</b> ( <i>Jitka Mlíková Seidlerová</i> ) ..... | 17 |
| 1 Introduction .....                                               | 17 |
| 2 Individual components of medical history.....                    | 19 |
| <b>2 METHODS USED FOR PHYSICAL EXAMINATION</b>                     |    |
| ( <i>Jitka Mlíková Seidlerová</i> ) .....                          | 23 |
| 1 Inspection .....                                                 | 23 |
| 2 Palpation .....                                                  | 24 |
| 3 Percussion.....                                                  | 24 |
| 4 Auscultation.....                                                | 26 |
| 5 Sense of smell .....                                             | 26 |
| <b>3 EVALUATION OF THE PATIENT'S GENERAL APPEARANCE</b>            |    |
| ( <i>Jitka Mlíková Seidlerová</i> ) .....                          | 27 |
| 1 Evaluation of general appearance .....                           | 27 |
| 2 Evaluating the patient's environment .....                       | 33 |
| <b>4 EXAMINATION OF THE HEAD</b> ( <i>Jana Kupková</i> ) .....     | 34 |
| 1 Inspection .....                                                 | 34 |
| 2 Percussion .....                                                 | 36 |
| 3 Palpation .....                                                  | 36 |
| 4 Examination of the eyes .....                                    | 37 |
| 5 Examination of the cranial nerves .....                          | 39 |
| 6 Examination of the ears .....                                    | 41 |
| 7 Examination of the nose .....                                    | 42 |
| 8 Examination of the lips and the oral cavity .....                | 43 |

|                                                                                       |     |
|---------------------------------------------------------------------------------------|-----|
| <b>5 EXAMINATION OF THE NECK</b> ( <i>Jana Kupková</i> ) .....                        | 45  |
| 1 Inspection .....                                                                    | 45  |
| 2 Palpation .....                                                                     | 46  |
| <br>                                                                                  |     |
| <b>6 REMARKS ON THE EXAMINATION OF THE CHEST, ABDOMEN</b>                             |     |
| ( <i>Jitka Mlíková Seidlerová</i> ) .....                                             | 48  |
| 1 Examination of the chest .....                                                      | 48  |
| 2 Examination of the abdomen .....                                                    | 48  |
| 3 Examining the limbs .....                                                           | 53  |
| <br>                                                                                  |     |
| <b>7 EXAMINATION OF THE HEART</b> ( <i>Alois Mádle</i> ) .....                        | 54  |
| 1 The role of medical history and physical examination when examining the heart ..... | 54  |
| 2 Presenting complaint and medical history of heart disease .....                     | 55  |
| 3 Physical examination .....                                                          | 59  |
| <br>                                                                                  |     |
| <b>8 DIAGNOSTIC METHODS IN CARDIOLOGY</b> ( <i>Milan Hromádka</i> ) .....             | 81  |
| 1 Electrocardiography .....                                                           | 82  |
| 2 Ambulatory ECG (Holter) monitoring .....                                            | 99  |
| 3 Cardiac event recorders .....                                                       | 99  |
| 4 Echocardiography .....                                                              | 100 |
| 5 Cardiac stress testing .....                                                        | 102 |
| 6 Tilt table test .....                                                               | 105 |
| 7 Selective coronary angiography .....                                                | 106 |
| 8 Left ventriculography .....                                                         | 107 |
| 9 Right-sided cardiac catheterization .....                                           | 108 |
| 10 Electrophysiological examination of the heart .....                                | 108 |
| 11 Six minute walk test (6MWT) .....                                                  | 108 |
| 12 Laboratory methods in cardiology .....                                             | 109 |
| <br>                                                                                  |     |
| <b>9 MEASUREMENT OF BLOOD PRESSURE</b>                                                |     |
| ( <i>Jitka Mlíková Seidlerová</i> ) .....                                             | 110 |
| 1 Introduction .....                                                                  | 110 |
| 2 Non-invasive BP measurement .....                                                   | 112 |
| 3 Invasive BP measurement .....                                                       | 113 |
| 4 Ambulatory 24-hour BP monitoring .....                                              | 113 |

|                                                                                      |     |
|--------------------------------------------------------------------------------------|-----|
| <b>10 EXAMINATION OF THE RESPIRATORY SYSTEM</b> ( <i>David Havel</i> ) .....         | 114 |
| 1 Medical history of a patient with respiratory diseases .....                       | 114 |
| 2 Basic symptoms of respiratory diseases .....                                       | 116 |
| 3 Physical examination of the respiratory system .....                               | 125 |
| 4 Functional examination of the respiratory tract .....                              | 141 |
| 5 Bronchoscopy .....                                                                 | 146 |
| 6 Sonography of the chest .....                                                      | 147 |
| 7 Thoracic puncture (thoracocentesis) .....                                          | 148 |
| 8 Medical thoracoscopy (= medical pleuroscopy) .....                                 | 148 |
| 9 Typical findings in physical examination of the respiratory system .....           | 149 |
| <br>                                                                                 |     |
| <b>11 EXAMINATION OF THE BREASTS</b> ( <i>Jana Kupková</i> ) .....                   | 153 |
| 1 Introduction .....                                                                 | 153 |
| 2 Inspection .....                                                                   | 154 |
| 3 Palpation .....                                                                    | 154 |
| <br>                                                                                 |     |
| <b>12 EXAMINATION IN ANGIOLOGY</b> ( <i>Jana Hirmerová</i> ) .....                   | 156 |
| 1 Examination of peripheral arteries .....                                           | 157 |
| 2 Examination of the veins .....                                                     | 168 |
| 3 Examination of lymphatic vessels .....                                             | 176 |
| <br>                                                                                 |     |
| <b>13 EXAMINATION OF THE DIGESTIVE TRACT</b> ( <i>Eva Mayerová</i> ) .....           | 180 |
| 1 Medical history .....                                                              | 181 |
| 2 Symptoms of digestive disorders .....                                              | 182 |
| 3 Examination of the liver .....                                                     | 191 |
| 4 Physical examination of the organs of the digestive tract .....                    | 196 |
| 5 Laboratory methods in gastroenterology and hepatology .....                        | 199 |
| 6 Instrumental examination methods in gastroenterology .....                         | 205 |
| 7 Notes on imaging methods for examination of the digestive tract .....              | 209 |
| 8 Liver biopsy .....                                                                 | 211 |
| <br>                                                                                 |     |
| <b>14 EXAMINATION IN SUSPICION OF ACUTE ABDOMEN</b><br><i>(Tomáš Skalický)</i> ..... | 212 |
| 1 Introduction .....                                                                 | 212 |
| 2 Medical history .....                                                              | 213 |
| 3 Physical examination .....                                                         | 215 |
| 4 Laboratory and imaging methods .....                                               | 217 |

|                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------|-----|
| <b>15 EXAMINATION OF THE KIDNEYS AND URINARY TRACT</b>                                                |     |
| ( <i>Lada Malánová</i> ) .....                                                                        | 220 |
| 1 Introduction .....                                                                                  | 220 |
| 2 Medical history .....                                                                               | 221 |
| 3 Physical examination .....                                                                          | 223 |
| 4 Imaging tests .....                                                                                 | 227 |
| 5 Kidney biopsy .....                                                                                 | 228 |
| 6 Basic laboratory examination .....                                                                  | 229 |
| 7 Selected clinical syndromes .....                                                                   | 234 |
| <b>16 EXAMINATION IN ENDOCRINOLOGY AND SELECTED METABOLIC DISEASES</b> ( <i>Hana Grégrová</i> ) ..... | 238 |
| 1 Thyroid gland .....                                                                                 | 239 |
| 2 Adrenal glands .....                                                                                | 248 |
| 3 The pituitary gland .....                                                                           | 254 |
| 4 Diabetes mellitus .....                                                                             | 259 |
| 5 Osteoporosis .....                                                                                  | 261 |
| <b>17 EXAMINATION IN HAEMATOLOGY</b> ( <i>Samuel Vokurka</i> ) .....                                  | 263 |
| 1 Medical history and its specificity .....                                                           | 264 |
| 2 Physical examination and findings .....                                                             | 268 |
| 3 Selected specific disorders .....                                                                   | 270 |
| 4 Haematological examination .....                                                                    | 271 |
| <b>18 EXAMINATION IN RHEUMATOLOGY</b> ( <i>David Suchý</i> ) .....                                    | 274 |
| 1 Medical history .....                                                                               | 276 |
| 2 Symptoms of rheumatic disease .....                                                                 | 278 |
