|   |     |
|---|-----|
| <i>Dedication</i> . . . . .   | VII |
| <i>Introduction</i> . . . . .   | 1   |
| <i>Problems of Experimental Wound Healing Studies</i> . . . . .                                     | 3   |
| Selection of an Experimental Object . . . . .   | 3   |
| Experimental Wounds in Rats . . . . .   | 5   |
| Reproducibility of an Experimental Trauma . . . . .   | 11  |
| <i>Spontaneous Healing of Skin Defects</i> . . . . .  | 14  |
| Different Types of Skin Defects . . . . .   | 14  |
| Mechanical Skin Loss . . . . .  | 14  |
| Thermal Injuries . . . . .  | 16  |
| Electric Current Injuries . . . . .   | 25  |
| Radiation Injuries . . . . .  | 26  |
| Skin Destruction Caused by Tumours or a Skin Disease . . . . .                                      | 26  |
| Experimental Wound Healing Studies . . . . .  | 27  |
| Mechanical Skin Defects . . . . .   | 28  |
| Thermal Defects . . . . .   | 39  |
| Differences in the Course of Healing between Mechanical Skin Defects and Thermal Injuries . . . . . | 55  |
| Effect of Immediate Cooling of Experimental Dermal and Full-Thickness Burns . . . . .               | 58  |
| <i>Wound Infection</i> . . . . .  | 64  |
| <i>Removal of Necrotic Tissues</i> . . . . .  | 72  |
| Experimental Enzymatic Necrolysis of Full-Thickness Burns . . . . .                                 | 78  |
| Tangential Excision of Deep Dermal Burns . . . . .  | 81  |
| Radical Excision of Full-Thickness Burns . . . . .  | 86  |
| Scar Contraction in Different Full-Thickness Skin Defects . . . . .                                 | 96  |
| Clinical Study of Necrectomy . . . . .  | 97  |
| Conclusions for Clinical Practice . . . . .   | 99  |
| Necrotomy . . . . .   | 101 |

|   |     |
|---|-----|
| <i>Closure of Skin Defects</i> . . . . .  | 103 |
| Autotransplantation . . . . .   | 103 |
| Thickness of Dermo-Epidermal Skin Grafts . . . . .  | 105 |
| Indications for Split-Thickness Autografts . . . . .  | 108 |
| Short-Term Autograft Conservation and Delayed Grafting . . . . .                              | 110 |
| Temporary Skin Substitutes (TSS) . . . . .  | 111 |
| Role of Temporary Skin Substitutes . . . . .  | 112 |
| Desiccation of the Wound Surface . . . . .  | 113 |
| Different Kinds of Temporary Skin Substitutes . . . . .                                       | 117 |
| Effectiveness of Different Skin Substitutes in the Prevention of Dermis Desiccation . . . . . | 122 |
| In Vivo Experiments Testing Possible Adverse Effects of Long-Term TSS Application . . . . .   | 127 |
| Clinical Studies . . . . .  | 140 |
| Conclusions for Clinical Practice . . . . .   | 142 |
| Xenotransplantation . . . . .   | 143 |
| <i>Conclusions</i> . . . . .  | 152 |
| References . . . . .  | 154 |
